

Leela Sai Rushendra Varma Mudunuri

Miami, FL | 3059753286 | mlsrvarma@gmail.com | [in Rushendra Varma](#)

Summary

Data Analyst with 3+ years of experience in healthcare analytics, proficient in SQL, Python, Power BI and ETL pipeline development. Designed automated dashboards and streamlined data workflows to improve reporting accuracy by 30% and reduce manual reporting time by 40%. Skilled in partnering with stakeholders to define BI requirements and applying advanced analytics to drive data-driven decision-making.

Skills

- **Technical Skills:** SQL, Python, C, Pandas, NumPy, Scikit-learn, TensorFlow, PyCharm, Jupyter Notebook
- **Programming & Analytics:** Python (Pandas, NumPy, Scikit-learn, TensorFlow), SQL, C, Analytical Skills, Data Analysis, Machine Learning, Business Intelligence
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn, BI Tools
- **Data Engineering & ETL:** IICS, Spark, Power Query, Data Cleaning, Feature Engineering, Automation Pipelines, Azure Data Factory, Cloud Infrastructure
- **Databases:** MySQL, SQL Server, Oracle
- **Productivity & Tools:** Advanced Excel (Pivot Tables, Power Query, VLOOKUP, HLOOKUP), Jupyter Notebook, PyCharm, Power-Point, Word
- **Domain Knowledge:** Healthcare Analytics, Claims Data, Patient Data, Fraud Detection, Operational Metrics, Demand Forecasting

Experience

ADNAB Research | *Data Analyst*

Mar 2025 - Present

- Performed advanced data analysis by cleaning, validating, and consolidating large-scale healthcare datasets using SQL and Advanced Excel, improving reporting accuracy by 30% and enhancing trend analysis.
- Designed and automated Business Intelligence dashboards in Power BI to track KPIs and inventory trends, reducing manual reporting time by 40% and delivering actionable visual insights to stakeholders.
- Implemented ETL pipelines using Azure Data Factory to streamline data integration, enhance real-time data visibility, and support data-driven decision-making.
- Conducted root-cause analysis on data discrepancies, implementing corrective actions that improved data integrity and reduced errors by 25%.

Florida International University | *Data Analyst / Scientist*

Oct 2022 - Feb 2025

- Developed machine learning fraud detection models using Logistic Regression, Random Forest, and LSTMs on CMS datasets, achieving 92% detection accuracy and strengthening data-driven decision-making.
- Engineered features from procedure codes, diagnosis patterns, provider behavior, and chronic conditions to uncover hidden fraud patterns, leveraging demand forecasting techniques to enhance analytical reporting.
- Constructed interactive dashboards and visualizations in Python and Power BI to improve executive reporting efficiency by 35% and effectively communicate complex data insights.
- Delivered comprehensive data insights and reports to stakeholders, facilitating strategic operational optimization and continuous data quality improvement.

Grip Sparks Foundation | *Data Analyst Intern*

Jun 2021 - Dec 2021

- Analyzed large-scale customer datasets using SQL and machine learning techniques, identifying key behavioral trends to improve targeting strategies.
- Applied emerging AI/ML techniques to optimize predictive models, enhancing real-time decision-making.
- Collaborated with cross-functional teams to maintain and improve ML models, ensuring long-term scalability and improving prediction accuracy by 20%.

Education

Florida International University | *Masters, Data Science* (GPA: 3.7/4.0)

Aug 2022 - Apr 2024

Sathyabama University | *Bachelors, Computer Science* (GPA: 8.5/10)

Aug 2018 - May 2022

Projects

Medical Provider Fraud Detection | *Florida International University*

- Built and optimized machine learning models (Logistic Regression, Random Forest, LSTM, Autoencoders) using CMS healthcare data, achieving 92% fraud detection accuracy.
- Engineered features from procedure codes, diagnosis patterns, provider behavior, and chronic conditions to identify hidden fraud trends and anomalies.
- Developed interactive visualizations and presented insights to stakeholders, enabling early fraud detection and improving compliance reporting.
