Data Scientist with 4+ years of experience pursuing an MS in Business Analytics & AI, specializing in building end-to-end AI/ML solutions with a strong background in data analytics, machine learning and business intelligence.

EDUCATION

The University of Texas at Dallas, Richardson, Texas

August 2024 – May 2026

Master of Science, Business Analytics & Artificial Intelligence

GPA 3.85

Manipal Institute of Technology, India

September 2016 – August 2020

Bachelor of Technology, Electronics & Communication Engineering

GPA 3.62

PROFESSIONAL EXPERIENCE

The University of Texas at Dallas, Richardson, Texas

Graduate Teaching Assistant

August 2025 – December 2025

- Mentored over 250 graduate and undergraduate students in Applied AI, Machine Learning and AWS Cloud Analytics, providing hands-on guidance and academic support assisting with lecture design and project oversight.

EXL Service, Bengaluru, India

Assistant Manager (Consultant 1)

July 2022 – June 2024

- Led design and implementation of 25+ Power BI and Tableau dashboards tracking customer engagement metrics, driving a 30% year-over-year increase in customer engagement for a leading American retail client.
- Built and deployed predictive models (regression, decision trees) in PyTorch to forecast customer retention, enabling targeted strategies that boosted retention rates by 15%.

Business Analyst

November 2020 – June 2022

- Designed and deployed 10+ Power BI dashboards tracking financial KPIs contributing to a 15% increase in the identification of actionable insights for the risk management team of an American financial services client.
- Developed optimized SQL queries for large scale data extraction from Snowflake and Azure Databricks reducing data retrieval time by 30%

TECHNICAL SKILLS

- Data Integration and Reporting – Snowflake, Azure Databricks, SQL, Python, R, SQL Server Management Studio (SSMS), Spark, MS Excel, Amazon S3, AWS Glue, Amazon Redshift, Athena, Power BI, Tableau, QuickSight
- Machine Learning: AWS Machine Learning Associate ([Link](#)), PyTorch, Scikit-learn, Keras (Tensorflow), Regression, Neural Networks, Clustering, Prompt Engineering, LLM, Hugging Face, Agent AI, AWS Bedrock, PEFT

ACADEMIC PROJECT EXPERIENCE

Food Delivery ETA Prediction using multiple Regression models ([GitHub Link](#))

February 2025 – April 2025

- Engineered a comprehensive feature pipeline (geodesic distance, order-to-pickup time, cyclical hour/weekday, weather/traffic/festival flags) with imputation and encoding to prepare data for modeling.
- Benchmarked six regressors (KNN, Decision Tree, Random Forest, XGBoost, SVR, MLP) via RandomizedSearchCV achieving a best performance of $R^2 = 0.832$, RMSE = 3.84 min for XGBoost and extracted key drivers for analysis.

Hospital Management System ([GitHub Link](#))

August 2024 – November 2024

- Designed and implemented a comprehensive database system for managing critical hospital operations, including patient records, doctor assignments, appointment scheduling, and billing processes in PostgreSQL.
- Implemented advanced SQL features such as triggers, views, and stored procedures to automate processes

Retail Supply Chain Analytics Dashboard ([Dashboard Link](#))

December 2024 – January 2025

- Developed a comprehensive dashboard to analyze supply chain performance across multiple product categories, utilizing advanced visuals, donut drill-downs and in-depth order fulfillment analysis to showcase sales trends and category rankings for a retail chain called FreshNest Market in Power BI.

UTD CareerSpark — AI-Powered Career Guidance Platform ([GitHub Link](#))

September 2025 – November 2025

- Built an intelligent multi-agent system using AWS Bedrock AgentCore, FastAPI, and React to deliver personalized, real-time career recommendations for UT Dallas students integrating job-market analytics, course data, and AI-driven planning agents to provide adaptive learning paths deployed using App Runner and Amplify.
