PROFESSIONAL SUMMARY

Results-driven Data Analyst with **5+ years** of experience transforming complex datasets into actionable business insights across financial services, retail, and pharmaceutical industries. Expertise in advanced SQL, Python, data visualization (Tableau, Power BI), and statistical analysis to drive strategic decision-making and operational excellence. Proven track record developing automated reporting solutions, conducting exploratory data analysis, and collaborating with cross-functional stakeholders to deliver high-impact analytics solutions.

TECHNICAL SKILLS

Programming & Scripting: SQL (Advanced), Python (Pandas, NumPy, Scikit-learn), R, VBA
Data Visualization: Tableau, Power BI, Looker, Google Data Studio, Excel Advanced Analytics
Databases: SQL Server, Oracle, MySQL, PostgreSQL, Snowflake, BigQuery
Statistical Analysis: A/B Testing, Hypothesis Testing, Regression Analysis, Time Series Forecasting, Predictive Modeling
ETL & Data Processing: Apache Spark, Azure Data Factory, Alteryx, SSIS, Data Warehousing Concepts
Cloud Platforms: AWS (S3, Redshift, Athena), Azure (Synapse, Data Lake), Google Cloud Platform
Analytics Tools: Google Analytics, Adobe Analytics, Jupyter Notebooks, SAS, SPSS
Business Intelligence: DAX, MDX, Data Modeling, KPI Development, Dashboard Design
Collaboration Tools: JIRA, Confluence, Git, Microsoft Office Suite (Advanced Excel, PowerPoint)
Methodologies: Agile, Scrum, Data Governance, Requirements Gathering, Stakeholder Management

PROFESSIONAL EXPERIENCE

JP Morgan Chase

New York, NY / Remote

Sr. Data Analyst

July 2024 – Present

- Analyze complex financial datasets using **SQL and Python** to identify trends, anomalies, and opportunities for risk mitigation and revenue optimization across consumer banking portfolios managing **\$500M+ in assets**
- Develop and maintain interactive **Tableau and Power BI dashboards** providing real-time visibility into key performance indicators including transaction volumes, fraud detection rates, customer retention metrics, and portfolio performance for executive leadership
- Conduct advanced statistical analysis and **A/B testing** on customer engagement initiatives, measuring impact of digital banking features and providing data-driven recommendations that increased mobile app adoption by **22%**
- Build automated reporting solutions using **Python (Pandas, NumPy)** to streamline monthly regulatory reporting processes, reducing manual effort by **15 hours per month** and eliminating reporting errors
- Collaborate with product managers, business stakeholders, and technology teams to translate business requirements into analytical frameworks, defining KPIs and success metrics for new product launches
- Perform exploratory data analysis on customer transaction patterns to identify cross-selling opportunities, segmenting customer base and supporting targeted marketing campaigns that generated **\$2.3M in additional revenue**
- Design and implement **SQL stored procedures and views** in Snowflake to optimize data retrieval performance, reducing query execution time by **40%** for frequently accessed reports
- Conduct root cause analysis on operational issues using data from multiple sources including transaction logs, customer feedback systems, and third-party vendors, presenting findings and recommendations to senior management
- Participate in Agile sprint ceremonies including daily standups, sprint planning, and retrospectives, ensuring timely delivery of analytics deliverables aligned with business priorities
- Create comprehensive documentation for data models, analytical methodologies, and dashboard user guides, enabling self-service analytics adoption across 12 business units

Walmart

Data Analyst

Hyderabad, India

Feb 2021 – Dec 2023

- Analyzed large-scale retail datasets (**100M+ transactions annually**) using **SQL, Python, and BigQuery** to optimize inventory management, pricing strategies, and supply chain operations across 4,700+ stores

- Developed comprehensive **Power BI dashboards and reports** tracking sales performance, inventory turnover, supplier metrics, and customer purchasing patterns, enabling data-driven decision-making for category managers and regional directors
- Conducted predictive analytics and demand forecasting using **time series analysis and regression models** to optimize inventory levels, reducing stockouts by **18%** and excess inventory costs by **\$4.2M annually**
- Performed customer segmentation analysis using clustering algorithms and RFM analysis, identifying high-value customer cohorts and supporting personalized marketing strategies that increased repeat purchase rate by **15%**
- Built automated ETL pipelines using **Azure Data Factory** to consolidate data from point-of-sale systems, e-commerce platforms, and supplier databases into centralized data warehouse, ensuring data quality and consistency
- Collaborated with merchandising and operations teams to design and execute **A/B tests** for promotional campaigns, analyzing test results and providing recommendations that improved campaign ROI by **27%**
- Created ad-hoc analyses and custom reports for executive leadership addressing strategic questions related to market trends, competitive positioning, and expansion opportunities in key product categories
- Implemented data quality monitoring frameworks using **SQL and Python scripts** to identify and resolve data anomalies, improving overall data accuracy by **35%** and reducing reporting discrepancies
- Designed and maintained data models and dimensional schemas in **Snowflake data warehouse**, supporting scalable analytics for supply chain optimization and financial planning teams
- Presented analytical findings and business recommendations to cross-functional stakeholders including VPs and C-level executives through compelling visualizations and executive summaries
- Mentored junior analysts on **SQL** best practices, data visualization techniques, and analytical methodologies, conducting training sessions and code reviews to elevate team capabilities
- Supported seasonal planning initiatives by analyzing historical sales trends, promotional effectiveness, and external factors (weather, holidays, economic indicators) to forecast demand during peak shopping periods

Pfizer

Hyderabad, India

Data Analyst

Jan 2020 – Feb 2021

- Analyzed clinical trial data and pharmaceutical sales metrics using **SQL, Python, and SAS** to support drug development decisions, regulatory submissions, and commercial launch strategies
- Developed interactive **Tableau dashboards** visualizing clinical trial enrollment rates, adverse event reporting, patient demographics, and protocol compliance metrics for research teams and medical affairs
- Conducted statistical analysis on patient outcomes data from Phase II and III clinical trials, performing **hypothesis testing and regression analysis** to evaluate efficacy and safety endpoints
- Collaborated with biostatisticians, clinical operations teams, and regulatory affairs to ensure data integrity and compliance with FDA guidelines (21 CFR Part 11) and ICH-GCP standards
- Built automated reporting workflows using **Python and VBA** to generate weekly enrollment reports, data quality metrics, and study milestone trackers, reducing manual reporting time by **20 hours per week**
- Performed market analysis and competitive intelligence research to support commercial strategies for new drug launches, analyzing prescription trends, market share data, and physician prescribing patterns
- Created data validation scripts and quality control procedures to identify missing data, outliers, and protocol deviations in clinical databases (Oracle Clinical, Medidata Rave), ensuring high data quality standards
- Supported pharmacovigilance activities by analyzing adverse event reports and safety signals, creating summary reports for regulatory submissions and internal safety review committees
- Designed and maintained **SQL queries and views** in Oracle database to extract and transform clinical and commercial data for ad-hoc analyses and standard reporting requirements
- Participated in cross-functional project teams for new therapeutic area initiatives, contributing analytical expertise to inform strategic planning, resource allocation, and investment decisions
- Documented analytical methodologies, data dictionaries, and standard operating procedures (SOPs) to ensure reproducibility and knowledge transfer within the analytics team

EDUCATION

Eastern Illinois University

Charleston, IL

Master of Science in Data Analytics

May 2025

- **Relevant Coursework:** Advanced Statistical Methods, Machine Learning, Data Mining, Big Data Analytics, Database Management, Business Intelligence.
