Experience

Ubertester

Remote

Test Engineer - Freelance

Jan 2026

- Performed mobile testing across iOS and Android platforms, including WiFi analysis and network behavior validation.
- Tested payment and e-commerce flows (PayPal Vault, GCash) on mobile and web environments.
- Provided client support and worked closely with the Project Manager to track issues and support mobile releases.

Testlio

Remote

Test Engineer - Freelance

Dec - Jan 2026

- Conducted payment and e-commerce testing, including PayPal Vault (iRocket) and GCash (Southgate) integrations.
- Performed mobile, web, and iOS testing to ensure secure, accurate, and consistent transactions.
- Collaborated with Project Managers to support clients, track issues, and validate releases.

Edufied

Remote

Quality Assurance Engineer Leads

September - Jan 2026

- Conducted manual testing and supported the deployment of Edufied's Filpass V2 from staging to production environments, ensuring functionality and usability throughout.
- Conducted automated and API testing using Playwright and Postman to verify system integrations and endpoints.
- Logged and retested 200+ bug tickets to assessed WCAG 2.2 compliance, FPAS, Filpass, SeekPass, Jobstreet pages.
- Created most of the V1 | V2 Filpass Helpdesk Articles - Charla and Release Notes and Trainee Assessment for Employee.
- Produced system documentation and optimized the FilPass chatbot's response to client inquiries
- Conducted web application penetration testing using W3AF, identifying SQL injection, XSS, and security misconfigurations, and collaborating with developers and project managers to report, retest, and verify fixes.
- Helpdesk Description Updated Using Sanity AI, ThunderBolt/ Codex for API Testing of Web Application.

Utest

Remote

QA Tester - Freelance

August - Jan 2026

- Completed 29+ uTest Academy modules on QA fundamentals, tools, and testing processes.
- Reported reproducible bugs with clear steps, logs, and screenshots.
- Executed test cases, exploratory tests, and usability reviews across web, mobile android adblogs, and desktop apps.

- Worked with QA teams, Product Managers, and TTLs to deliver accurate and high-quality test results.

Yenprovment

QA Manual Tester - Freelance

Remote

July - September 2025

- Performed comprehensive manual, alpha, and exploratory testing on e-commerce websites. User Acceptance Testing.
- Documented test cases and bug reports using Google Sheets and Google Docs, ensuring clear communication of issues.
- Managed tasks and tracked project progress using Trello and mobile applications to ensure functionality, usability, and performance.
- Volunteer Seller.ph | Saucedemo E-commerce | Xsplit Beta Testing

Dataforce

Data Annotator - Freelance

Remote

July - August 2025

- Transcribed audio and video data with high accuracy, converting spoken content into structured, text-based formats.
- Ensured clarity, consistency, and adherence to transcription guidelines, including speaker identification and timestamping.
- Reviewed and corrected transcriptions to maintain quality standards and reduce errors.
- Worked with diverse datasets to support AI model training and natural language processing (NLP) systems.

Alignerr

AI Trainer - Freelance

Remote

March - June 2025

- Annotated and evaluated Facebook Messenger conversations for message quality, relevance, and appropriateness.
- Classified conversations as good, bad, or needs improvement based on quality and policy guidelines.
- Assessed user intent and response alignment to improve AI-generated conversations.
- Followed strict quality standards and used Hubstaff for time tracking in a remote freelance setup.

Online Jobs

Data Annotator/Data Labeling - Freelance

Remote

Jan- Feb 2025

- Performed accurate data annotation and labeling for computer vision datasets using the Roboflow platform.
- Annotated products and objects in images using bounding boxes, polygons, and classification labels based on client guidelines.
- Ensured high-quality labeled data to support machine learning and AI model training.
- Reviewed and validated annotations to maintain consistency, accuracy, and compliance with project requirements.
- Collaborated remotely with clients to follow dataset specifications, labeling standards, and deadlines.
- Managed multiple annotation tasks efficiently in a freelance, remote work environment.
- Maintained data confidentiality and adhered to quality assurance (QA) processes.

Outlier.AI

A.I Developer/Engineer

Remote

December 2024 - June 2025

- Assessed AI tasks and validated AI-generated code for accuracy and logic.
- Wrote clean, efficient solutions to coding problems and optimized performance.

- Created human-readable summaries, problem statements, and explanations.
- Developed test cases to verify code functionality and edge cases.

Accenture

Associate Software Engineer- Application Development

Role: Trainee / Team Member

Technology Platforms: Marvels Design Tester, Salesforce, UI/UX

Responsibilities:

- Participated as Scrum Master in Agile case study projects, facilitating stand-ups, sprint planning, and retrospectives.
- Supported UI/UX testing and design validation using Marvels.
- Assisted in test documentation, requirement analysis, and cross-team collaboration. Worked with QA teams, Product Managers, and TTLs to deliver accurate and high-quality test results.

Hybrid
May - Nov 2024

Node.js Development

Role: Back-End Developer

Technology Stack: Pluralsight, JavaScript, Express.js, MongoDB, Jest Testing, Postman, ScannerQube, LeetCode

Responsibilities:

- Developed RESTful APIs using Node.js and Express.js.
- Performed backend logic implementation and MongoDB database access for CRUD operations.
- Conducted API testing using Postman and unit testing using Jest.
- Practiced secure coding, debugging, and code reviews via ScannerQube.
- Strengthened problem-solving skills through algorithm training on LeetCode.

Amazon Q

Role: Certified Developer

Technology Platform: AWS

Responsibilities:

- Completed Amazon Q Enablement Training focused on generative AI usage for development workflows.
- Applied Amazon Q for AI-powered code generation, automation, and productivity tasks.

Amazon Web Services (AWS)

Role: Trainee / Developer

Technology Platform: AWS

Responsibilities:

- Completed training on Serverless architecture (Lambda) and EC2 deployment fundamentals.
- Built and deployed training projects demonstrating basic cloud development and automation.

Training & Development

Phase 1: React.js Web Application — Employee Applicant Assist System

Linked with Google Sheets for lead generation and applicant management.

Phase 2: Mobile Development — Native Development Training (Udemy)

Phase 3: AWS Developer — Focus on EC2 and Serverless components

Projects

Website Usability Tester - Capmus.com / E-commerce

Freelance Online Jobs (Client)

- Performed user acceptance testing and usability feedback during early development, Start up Website.
- Identified UI/UX issues, logged potential bugs, and recommended improvements for smoother functionality.
- Collaborated with the team by sharing practical insights from a user's perspective.

Educational

University of Nueva Caceres

B.S Information Technology

Thesis: Student Assistant Management System

Naga, Philippines

Aug 2019 - June 2023

STI College Naga

Senior High School

Science, Technology, Engineering, Mathematics (STEM)

Naga, Philippines

June 2017 - 2019

Skills & Interests

Technical:

Testing Tools: Postman (API Testing), Playwright (Automation), Cypress, Selenium

Manual Testing: Regression, Sanity, Smoke, Backward compatibility, UAT, Exploratory, Functional

Accessibility Testing: Manual WCAG testing, Accessibility Insights

Methodologies: Agile, Scrum

Project Management: Jira, Miro, MS Teams

Email Testing: Testmail, Mailinator, Webuzo

Programming: C++, C#, JavaScript, Python, PHP

Backend Development: Node.js, Express.js, MongoDB (CRUD operations, REST API development)

Web Development: HTML, CSS (Tailwind, Bootstrap)

Technical Writing: Helpdesk, Patch / Release Notes

Version control & Tools: GIT, Microsoft Office, Canva

Data Analysis: Google Sheets, Excel

Database: SQL, Database Modeling (ERD), dbdiagram.io

Soft Skills: Time Management, Critical Thinking, Communication, Attention to Details, Collaboration, Curiosity, Empathy, Problem-Solving
