- Experienced in AWS CodeArtifact, AWS Toolkit, Database maintenance, SQL, MySQL, Oracle Server Maintenance, Snowflake, REST API, SOAP API
- Adept in Windows Server-based environments and networks

WORK EXPERIENCE

API INTEGRATION DEVELOPER	2023 - Present
Truesense Marketing, Remote	
- Developed and maintained 80+ data pipelines using Azure Data Factory, Fivetran and custom REST APIs to ingest data from sources like Salesforce, Facebook, Google Ads, Mailchimp, HubSpot. - Integrated data into cloud data warehouses including Snowflake, BigQuery, and Redshift, performing SQL-based transformations. - Enabled business intelligence by ensuring reliable data flow to visualization tools such as Tableau, Power BI, and Looker. - Developed and managed integrations handling diverse data formats including JSON, XML, and CSV within the Azure cloud platform. - Served as the technical lead for integrations, providing cross-functional support and creating detailed documentation for all pipeline architectures.	
TECHNICAL SUPPORT ANALYST	2023 - 2025
Journal Technologies, Remote	
- Provide litigation and legal clientage with technical support, troubleshooting and training on proprietary software. - Manage on average 15 tickets per week, prioritizing, logging issues from initial contact to resolution and updating the support Knowledge Base - Keep customers, internal teams, and external professional services up to date on relevant tickets via phone, email and proprietary portal CRM. - Maintain on-call rotational hours and enforce security policies following CIJIS guidelines on workstations, mobile devices, communications and other endpoint systems in accordance with organizational and federal requirements. - Configure case management software using built-in administrative user interface including forms (screens), searches, and workflow - Create business rules and custom scripts within the software using Groovy and Velocity and Jasper Reporting	
CUSTOMER DATA ENGINEER	2022 - 2025
Magnus Technologies, Remote	
- Developed Docker Workflows utilizing Postman & PHP scripts to decode and rate VINS of vehicles being transported. - Supported more than 50+ customers with distinct websites, environments, accounting and workflows. - Managed and completed a consistent queue of 10-30 tickets daily ranging in priority and effort to complete. - Worked with internal support to troubleshoot issues and finetune deliverables for customers over Slack and Teams. - Wrote complex queries in SQL to pull reports, insert and update customer records as needed.	
DATA MIGRATION SPECIALIST	2022 - 2024
Kologik, Remote	
- Executed data migrations and data quality efforts focused on standardization, automation, validation, and data de-duplication. - Migrated existing and new customer data into Kologik systems within a 90-day contract period. - Developed new migration scripts as well as maintained and updated existing scripts for each new type of client or migration - Generated and maintained data migration documentation and data dictionaries for Kologik systems. - Provided troubleshooting and technical discovery for customer support on migrated data and Kologik system data.	
DATA ENGINEER (CONTRACT)	2021 - 2023
Youredi, Veruna, Neocol, Remote	
- (Youredi) Developed custom API for 204, 210, 214 and 990 EDI mappings in service to logistic and trucking clientage. - (Veruna) Developed custom migration scripts and code towards data discovery, data mapping, ETL processes and User Acceptance Testing (UAT). - Collaborated with project leadership, managers, developers, and other stakeholders, communicating an estimation of work, scope of required resources, and realistic schedules for implementation and delivery. - Provided troubleshooting, technical discovery and customer support on migrated data as well as legacy source data. - (Neocol) Subject matter expert (SME) for migration projects and procedure for Salesforce, CPQ Billing, EPIC, Zendesk, AWS Database Migration Service (DMS), Jira, HubSpot, Google Cloud, Oracle, Workday, - Experienced in first response technology such as JMS, CAD, RMS for Tyler Data, Justice Solutions, Kologik, PTS Solutions and eDocs - Assisted in the configuration and deployment of Analytics tools such as Microsoft SQL Server, SAP Business Objects, Oracle ODI & Oracle BI, Tableau, Salesforce, CPQ Billing, Workday, Kologik and Veruna AMS.	

TECHNICAL CONSULTANT2019 - 2021

Bold Group, Remote

- Worked with clients to manage data conversion and data manipulation in Tableau, Excel, MSSQL, Manitou, SedonaOffice and AlarmBiller
- Performed detailed data analysis and data mapping on live databases to fulfill project requirements, follow best practice for maintaining data integrity and accurately consult with clients.
- Effectively managed multiple projects from start to finish by communicating timeline, expectations, deliverables while handling scheduling, conversion scope and giving best business practice recommendations when necessary.
- Provided client support with conversion issues with direct contact using tools such as phone, email and web application tools like GoToAssist and Microsoft Teams.

PROGRAMMER/ANALYST2018 - 2019

Ohio Public Employees Retirement System, Columbus OH

- Performed analysis on SQL and application data to make reports or troubleshoot technical issues.
- Designed and tested program logic, program scripts, and prepared them for production operation.
- Designed, tested, and implemented SQL procedures and functions for investment team and application support to improve data quality for regulatory and modeling purposes.
- Integrated financial system procedures and programs using Tableau, SQL Server Integration, Python, Docker and Opswise.

EDUCATION

FRANKLIN UNIVERSITY - **Master of Science – Computer Science - 3.6 Cumulative GPA**

OHIO UNIVERSITY - **Bachelor of Science – Computer Science**
