

TANAY DALAL

Chicago, IL | (224) - 432 - 8632 | Dalaltanay53@gmail.com | LinkedIn: [linkedin.com/in/tanaydalal7](https://www.linkedin.com/in/tanaydalal7)

Professional Summary:

- Backend Software Engineer with 3 years of hands-on experience building and scaling backend systems for banking and financial clients.
- Strong expertise in Java, Spring Boot, REST APIs, SQL, and AWS Cloud services.
- Proven track record in transaction processing systems, performance optimization, CI/CD automation, and cloud deployments.
- Comfortable working in fast-paced Agile environments and collaborating with cross-functional teams.

Technical Skills:

- **Languages & Frameworks:** Java, Spring Boot, Node.js, Python
- **Backend & APIs:** RESTful Services, Microservices Architecture, RabbitMQ
- **Databases:** MySQL, SQL, MongoDB
- **Cloud & DevOps:** AWS (EC2, Lambda, S3), Docker, Jenkins, Kubernetes
- **Tools & Practices:** Agile, Git, CI/CD, Monitoring & Troubleshooting

Professional Experience:

Discover Network - Backend Software Engineer (Banking & Payment Systems)

Chicago, IL | Jan 2023 – Present

- Designed and enhanced Spring Boot-based backend microservices supporting payment and financial transaction workflows similar to Discover Network-style platforms.
- Built and maintained secure REST APIs for transaction authorization, validation, and response handling, ensuring low latency and high availability.
- Implemented idempotent transaction processing logic to prevent duplicate payments and ensure data consistency across distributed services.
- Developed business rule engines for transaction checks including amount validation, account status, and error handling.
- Optimized MySQL queries, indexing strategies, and schema design, reducing transaction processing and lookup latency by 30–40%.
- Deployed backend services on AWS EC2, leveraged AWS Lambda for asynchronous and event-driven workflows, and used AWS S3 for audit logs and transaction records.
- Integrated logging, monitoring, and retry mechanisms to track transaction states, failures, and recoveries.
- Collaborated with QA, DevOps, and product teams in an Agile environment to ensure secure, compliant, and stable releases.
- Supported production systems by analyzing logs, resolving performance issues, and improving backend reliability for high-volume financial traffic.

Alight Solutions - Software Engineer (Backend & Cloud)

Chicago, IL | May 2022 – Dec 2022

- Developed Spring Boot microservices handling enterprise-scale financial and transactional data.
- Developed and maintained backend APIs using Node.js and Python within enterprise systems
- Improved transaction throughput by ~30% through backend optimization and efficient API design.
- Automated CI/CD pipelines using Jenkins and Docker, improving deployment reliability.
- Assisted in optimizing SQL queries used in financial reporting and transaction workflows.
- Worked closely with senior engineers in Agile sprints, gaining exposure to production-grade backend systems
-

KEY PROJECTS:

Pricing & Fee Calculation Engine Java | Spring Boot | AWS | MySQL

- Implemented backend pricing and fee calculation logic for financial transactions.
- Improved processing performance by ~40% through query and logic optimization.
- Deployed scalable services on AWS EC2 and Lambda.

Financial Reporting APIs Spring Boot | REST APIs | MySQL

- Built backend APIs for transaction reporting and reconciliation dashboards.
- Designed optimized SQL queries ensuring data accuracy and consistency.

CERTIFICATIONS

- AWS Certified Developer – Associate
- AWS Certified Cloud Practitioner

EDUCATION

- Bachelor of Information Technology & Management | May - 2024
Illinois Institute of Technology
