SUMMARY

Full-stack TypeScript engineer shipping React and Next.js UI, Node.js services, and Postgres with tests, CI/CD, and clear docs. Adds Python for APIs or tooling when useful. Focused on reliable delivery, performance, accessibility, and security. Interested in growth and chances to own impactful projects.

EXPERIENCE

Zaronology | Sparks, CA

Full Stack Engineer | 07/2024 - Present

- Architected a real estate platform with a React and TypeScript admin and a Next.js 15 portal. Shipped 15+ features including maps, advanced filtering, and Stripe billing. Served 1,000+ daily users with 95% mobile responsiveness.
- Designed AWS serverless architecture using Lambda, DynamoDB, S3, SQS, and ECS Fargate to process 50,000+ property records daily, implementing automated data pipelines with Node.js/NestJS backend that integrates county websites, Zillow APIs, and third-party services with comprehensive error handling and real-time monitoring.
- Developed an automated data extraction system using ECS tasks and SQS message queues, optimizing workflows and delivering complete features for 67+ Florida counties.

NTx Ventures | Sparks, CA

Full Stack Engineer | 03/2023 - 07/2024

- Rebuilt an interactive data visualization platform with a mobile-friendly UI in two months, saving \$15K and boosting client satisfaction by 25%, demonstrating a commitment to enhancing user experience and delivering quality results.
- Created a web scraping platform that enhanced diagnostics by 45% and streamlined workflows, saving 15hr/week.
- Led front-end development of SEO/SEM applications, collaborating with UX/UI designers to analyze and visualize competitor data, highlighting effective teamwork and communication.

ChartRequest | Anaheim, CA

Junior Full Stack Engineer | 08/2022 - 03/2023

- Built a legal records UI that increased user efficiency 20 percent and streamlined document handling.
- Migrated payments to Stripe and improved transaction speed 40 percent, validating flows with Postman.
- Implemented inactivity auto sign-out to reduce security risk 25 percent and aligned changes with code reviews and CI/CD.

Averatist | Anaheim, CA

Apprentice Front-End Developer | 01/2022 - 08/2022

- Led a front-end migration from plain JavaScript and revamped styling, and completed a backend database migration, accelerating development speed 20%, cutting page load times 50%, and improving Time to Interactive.

Beach Coders | Anaheim, CA

Front End Dev Instructor | 02/2021 - 01/2022

- Instructed one-on-one classes on JavaScript, DS, Algorithms, and MERN stack, educating 53 unique students, highlighting a commitment to effective knowledge transfer.
