PROFESSIONAL SUMMARY

Results-driven QA Automation Engineer with 9+ years of expertise in end-to-end test automation, specializing in Playwright and Selenium frameworks. Proven track record of delivering high-quality software across healthcare, e-commerce, education, and finance domains. Expert in building scalable automation frameworks with CI/CD integration, API testing, and accessibility compliance (WCAG 2.1 AA). Skilled in Agile methodologies, cross-functional collaboration, and leveraging AI tools (GitHub Copilot) to accelerate test development and increase coverage by 25%.

CORE COMPETENCIES

- Playwright & Selenium WebDriver
- API Testing (REST/GraphQL)
- CI/CD Integration (GitHub Actions)
- BDD/Cucumber (Gherkin)
- Java, JavaScript, SQL
- Accessibility Testing (WCAG 2.1 AA)
- TestNG, Postman, Swagger
- Page Object Model (POM)
- Agile/Scrum Methodologies
- JIRA, Zephyr, Azure DevOps
- Git, GitHub, GitLab
- AWS, Cross-Browser Testing

PROFESSIONAL EXPERIENCE

QA Automation Engineer (Contract) | GlobalLogic, Chicago, IL

Oct 2025 – Feb 2026

- Architected and implemented comprehensive Playwright automation framework for UI, API, and E2E workflows across Chromium, Firefox, and WebKit, improving testing efficiency by 25%
- Designed custom test fixtures, hooks, and reusable utility functions using Page Object Model (POM) architecture to enhance automation stability, scalability, and maintainability
- Integrated Playwright automation with CI/CD pipelines (GitHub Actions), enabling automated regression testing on every pull request and build deployment
- Performed advanced debugging using Playwright Trace Viewer, video recordings, and screenshots to identify and resolve flaky tests, reducing maintenance time and improving test reliability
- Executed parallel and cross-browser test executions to validate compatibility and accelerate feedback cycles for development teams
- Developed Playwright-based API tests to validate backend services alongside UI flows, ensuring complete end-to-end coverage
- Led accessibility quality assurance initiatives utilizing keyboard navigation and screen reader validation to identify and remediate WCAG 2.1 AA violations in semantic structure and visual contrast

QA Engineer | Modern Campus, Remote

Dec 2022 – Dec 2023

- Designed and maintained automated test scripts using Playwright, achieving 30% improvement in testing efficiency and coverage
- Conducted comprehensive API testing for Spring Boot/Java-based microservices and validated GraphQL queries/mutations using Apollo Client
- Performed end-to-end accessibility testing integrating Axe DevTools with manual screen reader and keyboard checks to detect and remediate WCAG 2.1 AA issues across focus order and ARIA implementation
- Led User Acceptance Testing (UAT) for each release cycle, collaborating directly with end users to validate business requirements and ensure product quality
- Developed Cucumber BDD scenarios using Gherkin syntax and executed multi-browser testing across IE, Firefox, and Chrome
- Utilized JIRA and Zephyr for defect tracking and resolution, and wrote SQL queries to verify data integrity across front-end and back-end systems
- Created comprehensive user guides and onboarding materials to enhance software adoption and user engagement

Career Development & Upskilling

Jan 2024 – Sep 2025

- Maintained and enhanced technical skills through freelance QA consulting projects on Upwork, delivering automation solutions for diverse clients
- Completed advanced training in AI-powered testing tools, Model Context Protocol (MCP) integration, and Large Language Models (LLMs) for test automation
- Developed proof-of-concept projects demonstrating shift-left AI testing methodologies and automated test generation workflows

QA Engineer | Foxtrot Ventures, Inc., Chicago, IL

Feb 2022 – Nov 2022

- Developed and executed automated test cases using Selenium WebDriver with Java and TestNG, streamlining regression testing for web applications
- Created Requirement Traceability Matrices (RTM) and collaborated with cross-functional teams to refine user stories and gather requirements
- Performed comprehensive UI and compatibility testing across multiple browsers (Firefox, Chrome, IE) and maintained automation code repositories in GitHub
- Facilitated client meetings to document requirements and coordinated between stakeholders and engineers to align on project goals and deliverables
- Conducted API testing using Postman and Swagger to ensure backend functionality and integrated with Azure DevOps CI/CD pipelines

Previous Experience

- Software QA Analyst | Supremo Astute Technologies, Mangaluru, India (Jul 2020 – Apr 2021)
- QA Analyst | Land Trades Builders & Developers, Mangaluru, India (Dec 2017 – Mar 2020)
- Software QA Analyst | Vijayanath Interiors & Exteriors Pvt. Ltd, Mangaluru, India (Jan 2012 – Aug 2015)

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) | Alva's College of Education, Moodbidri, India (2008 – 2011)

Specialization: *Software Development Life Cycle (SDLC), Data Structures & Algorithms*

Certification: ISTQB Certified Tester
