

Software developer with **around 10 years** of IT experience in design, development, implementation, integration, debugging and testing of various web and mobile applications. Expertise in Software Development using Microsoft Technologies such as **ASP.Net, MVC, VB.Net, C#, Web forms and services, SQL, Agile/ SCRUM methodology**, collecting and analyzing large data sets, implementing business intelligence procedures and developing data marts supported by strong data mining, analytical, **communication, management and leadership skills**.

Professional Summary

- Excellent experience in **Software Development Life cycle**, requirements gathering, designing, developing, testing, debugging.
- Proficient in **Database Design, Management**, Data Mining, Mapping, Tuning and Security.
- Experience **Predictive analytics, Perspective analytics**, Risk & Marketing analytics.
- Implemented in **Agile Methodology** for full lifecycle of the project such as planning analysis, prototyping, design implementation, testing, release and following for next iteration as per needs.
- Extensive experience in User Interface (UI) development using Angular 5/6/7/8/9/10/12, ASP.NET, HTML, XML, Java Script, jQuery, CSS3, Ajax, Angular JS.
- Experience in implementing Windows Communication Foundation (**WCF**) Service for Business Logic Layer for Service Oriented Architecture, Windows Presentation Foundation (**WPF**) and Windows Workflow Foundation (**WWF**).
- Sound knowledge of **RDBMS** - SQL Design, Querying, Indexing and Transaction processing.
- Developed Constraints, Join, Views, and Triggers in **SQL Server** including Writing Views, Stored Procedures, Functions, Cursors and Triggers for search and accessing data from various databases.
- Designing and developing Web & Windows (Client/Server) based and N - Tier Applications using C#, Entity Framework, Web Services, CSS, Blazor, Net Core, Odata and SQL Server
- Experienced in TSQL, PL-SQL, **OLAP and OLTP** database environments and No SQL Platforms.
- Experience with logical/ physical Data Modeling, Star, Snowflake Schema, fact & dimension tables.
- Experienced with **Microsoft Application** building blocks for .Net projects (Data Access, Exception and Error Handling, Caching and Configuration Management Application Blocks).
- Worked on deploying web sites to cloud platforms like **Windows Azure, SQL Azure**.
- Extensive knowledge of **.NET security features** such as Authentication & Authorization, Windows-based Authentication, Forms-based Authentication, Authorizing Users and Roles.
- Experienced in **XML Web Services** (SOAP, WSDL and UDDI), Service Oriented Architecture [**SOA**]
- Worked on Angular 6 from RC to stable version of **Angular 6**.
- Used [SQLite.NET](#) with Xamarin. Forms and MVVM for reading and writing data to a local SQLite database.
- Successfully implemented various multi-tiered .NET applications, client/server, web based and n-tier business/commercial applications using C#, HTML5, CSS3, JavaScript, TypeScript, jQuery, Ajax, Json.NET, ASP.NET MVC, ADO.NET, ASP.NET, IIS, SQL Server 2005 /2008/2012/2014, DB2 7.0, ADO.NET Entity Framework 6.0, Oracle, SSIS, SSRS and SSAS.
- Worked for Devops Platform team responsible for specialization areas related to Chef for Cloud Automation.
- Extensive Knowledge on **.NET Design Patterns** including Dependency Injection (DI), Inversion of Control (IOC), MVVM (Model-View-View-Model) and MVC (Model-View-Control).
- Strong experience in data site retrieval and manipulation using **ADO.NET**
- Experience in design using **Object Oriented** Programming Principles like Inheritance, Polymorphism.
- Enhancing and deploying the **SSIS** Packages from development server to production server.
- Used Six Sigma methodology for quality improvement.
- **ER/ Dimensional Data Modeling**, Normalization techniques, Analytical Decision with Optimization.
- Skilled in creating interactive reports and dashboards using **Visualization & BI Tools**.

- Experienced in debugging, testing, **error logging** and resolving bottlenecks, utilizing **UNIT** testing framework, and followed Test Driven Development (**TDD**) to develop the Web applications for verifying the cross –platform code implementation and integrity.
- Development languages and technologies utilized **C# .NET, C# WinRT/UWP, WPF, WCF, C++, JSON, JavaScript, python.**
- Skilled in **deploying and configuring** NUnit-based test automation within CI/CD pipelines using Jenkins, Azure DevOps, and GitHub Actions.
- Experienced in **developing, designing, and implementing** robust unit and integration test cases using NUnit for .NET applications.
- Experience in Application development and Production support environment and cross platform web-based applications troubleshooting.
- Expertise in understanding user requirements and translating business requirements into technical solutions with excellent problem solving and troubleshooting capabilities.
- **Excellent Team Player, Quick learner**, Self-starter and enthusiastic to learn and work on new technologies.

Technical Skills

IDE	Visual Studio 2019/2017/2015/2013/2012/2010
Web server	Microsoft Internet Information Services – IIS (5.0/6.0/7.5/8.0)
Programming Languages	C#, VB.NET, JavaScript
.Net Technologies	.Net Framework 4.5.1/4.5/3.5/3.0 Asp.net (4.5/4.0/3.5/2.0/1.1/1.0), Web Forms, WinForms, Web Controls, Custom Controls, User Controls, Telerik Controls, Web Services, RESTful Web Services, Ajax, ADO.net, LINQ, WCF, EF code first & db. first, C# - OOP, C# - SOLID, C# - ORM, C# - Design Patterns, C# - Testing
Internet Programming	HTML5, Angular 1/2+, Node.js, ReactJS, XML, CSS3, XSL, XSLT, WSDL, SOAP, JSON, jQuery, Bootstrap CSS, Typescript cocepts.
IDE	Visual Studio 2019/2017/2015/2013/2010
UI Frameworks	HTML5, CSS3, Angular JS, Angular 2/4/5/6/7/8/9/10/12, Node.js, RxJS, Redux
Version Control Tools	Team Foundation Server 2010, SVN, GIT

Work Experience

Client: BCBS – Chicago,IL

July 2021 – Till date

Role: Sr.Net Full Stack Developer

Responsibilities:

- Involved different phases of the **Software Development Life Cycle (SDLC)** including Requirement analysis, Designing, Programming, Testing, and Documentation.
- Designed and developed **secure cloud & web applications with .Net and Azure PAAS** technologies
- Developed API's using **Azure API** Apps.
- Developed UI screen with requirements authorized end client specifications and expectations.
- Developed reusable Angular components like headers, footers, custom alert, and communication thread components for UI Screen development.
- Develop a WPF WinForms client to utilize the WCF services and display the data in from forms.
- Designed and customized **MS Dynamics 365** forms and **ribbons**.

- Upgraded applications in **Angular 10 to latest version Angular 11** to improve the performance and resolving peer dependencies in Node packages when performing the upgrade.
- Experienced working on developing **Web API using ASP.NET Core micro services** and integrated with front-end application using HTTP client API.
- Developed dynamic **UI components** using **ReactJS, Vue.js, Angular**, and **Blazor** for seamless user experiences.
- Implementing **Azure Logic Apps, Azure Functions, Azure Storage, and Service Bus Queues** for large enterprise-level ERP Integration systems.
- Designed and implemented **RESTful APIs in .NET Core** for seamless front-end and back-end integration with ReactJS applications.
- Implemented client side functionality using JQuery.
- Developed and integrated SSRS reports into .Net Web application pages.
- Create and maintain multiple, complex MS Access databases.
- Developing front-end screens using HTML5, Angular, Blazor, JavaScript, Json, CSS and Bootstrap.
- **Implemented** seamless data synchronization between Blazor UI and NoSQL/SQL databases using Entity Framework Core and SignalR.
- **Integrated** Entity Framework with ASP.NET Core and .NET applications for seamless ORM-based data access.
- **Developed** dynamic web applications using Blazor WebAssembly and Blazor Server, enabling real-time interactivity without frequent server requests.
- **Configured** CI/CD pipelines using Azure DevOps or GitHub Actions for automated builds, testing, and deployment of Blazor applications.
- Design and development Database and flow for Application in **Asp.net MVC 4 and Dotnet Core 3.1+, .NET 6.0, WebAPI/ RestAPI, and C#.net**.
- Used CSS with JQuery to create impressive GUI along with HTML.
- Knowledge on data extraction for huge number of records using **Azure Data Factory (ADF)**.
- Knowledge on the **Azure DevOps** and its process of creation of the tasks, pull requests, Git repositories.
- Created the **Web API controllers in ASP. NET MVC to build, maintain Restful API's**, also consumed API's client side using Angular data binding.
- Used Xamarin test cloud to automate testing.
- Consumed and created **SOAP & REST** interfaces.
- Worked with BMC remedy to document and keep track of various stages of production issues and changes requests for production deployment.
- Proficient in relational database like, RDBMS, DB2, MS Access, SQL Server 2000/ 2005 and Oracle.
- Implemented fixes for **security vulnerabilities**.
- Experience in RDBMS Concepts, Database Management Systems, Database Physical and Logical design, Data Mapping, Table normalization, Data Modeling.
- Worked with business analysts to understand their business models and goals.
- Improved the performance and responsive time of application.
- Developed Application using ASP.NET MVC 4.0 with Razor View Engine C in Visual Studio 2012.
- Developed **server-side rendering (SSR) solutions** with ReactJS and .NET APIs to improve SEO and page load speeds.
- Implemented RESTful APIs with **ASP.NET Core** and integrated them with **ReactJS** components for seamless data fetching and real-time updates.
- Automated builds and deployments of ReactJS and .NET applications using **Docker, Kubernetes, and CI/CD pipelines**.
- Experience in RDBMS Concepts, Database Management Systems, Database Physical and Logical design, Data Mapping, Table normalization, Data Modeling.
- Designed and developed **.NET Core microservices** integrated with **ReactJS** and **Vue.js** for high-performance distributed systems.
- Working with WinForms to provide Graphical user Interface components to the .Net Framework.

- Developed Web applications and Web Services using **ASP.NET, C#, MVC4 with Razor, Entity Framework 5/6, LINQ, HTML5, CSS3, JavaScript, AngularJS and Bootstrap UI**.
- Used **C#, MVC, ASP.Net Web API, web forms** in the application with **MVC 5.0** Razor Engine. Service layer was developed using **ASP.Net Web API for RESTful services**.
- Ensuring that the test that relies on external resources uses them explicitly, allocates them before testing, and releases when done/failed.
- **Deployed** automated test suites in CI/CD pipelines to streamline the validation process and improve software quality.
- Implemented **unit and integration testing** using **xUnit, Jest, and React Testing Library** to ensure application stability.
- **Integrated** NUnit with Jenkins and Azure DevOps for continuous testing and reporting, ensuring seamless test execution.
- Debugging using firebug and web developer tools on Chrome, Firefox, and Internet Explorer.
- Adopted **Git** for version controlling and JIRA for project tracking.

Environment: Angular 11/12, JIRA, Typescript, ASP.Net, CSS3, NPM, WCF, WPF, JSON, SASS, Blazor, React.JS, .NET Framework, Entity Framework, API.

Client: KPMG- Chicago,IL

Oct 2019 – June 2021

Role: Sr.Net Developer

Responsibilities:

- Experienced working on developing **Web API using ASP.NET Core micro services** and integrated with front-end application using HTTP client API.
- Gathering the requirements from teams and coordinating with different teams to complete the End-to-End process of testing.
- Experience using **Azure Resource Manager** templates to deploy resources in Azure and troubleshooting the customer's Templates.
- Refactor frontend code from Blazor to Angular to improve performance and compatibility
- Built microservices-based solutions using .NET Core, integrated with ReactJS and Vue.js front-end components.
- Developed dynamic single-page applications (SPA) using ReactJS, Vue.js, and Blazor for responsive interfaces.
- Created reusable **ReactJS** components and modularized **.NET Core** backend services to support agile, scalable, and maintainable code.
- Developed dynamic single-page applications (SPA) using **ReactJS** on the front-end and **.NET Core** on the back-end, improving user interface responsiveness
- Developed the site **using JQuery, HTML, CSS and JavaScript** to maintain consistent look and feel throughout the application.
- Created User Interface pages with Razor views and partial views.
- Involved reviewing code and collaborating with the team members to resolve
- Always actively participate in four ceremonies: Sprint planning meeting, Daily Scrum, Sprint review meeting, and Sprint retrospective meeting.
- Coded, tested Tin validation reports with percentage of missing Tax ID using Excel, Visual C , .NET Crystal Reports and Ms Access.
- Used C# in Xamarin to create native mobile application
- **Integrated** Blazor applications with microservices-based backends, leveraging gRPC and REST for high-performance communication.
- Designed and implemented responsive UI layouts leveraging Blazor's CSS isolation and Bootstrap integration.
- **Implemented** Azure App Service integration for hosting Blazor applications, ensuring high availability and security.
- Designed and coded the WinForms to do analysis on existing xml files and creating offline images.
- Responsible for maintaining and expanding **AWS (Cloud Services) infrastructure using AWS Stack** especially worked with database setup and maintenance and created **AWS EC2 instances**.
- Hands on experience in using Azure Functions and Web jobs.

- Employed **Azure DevOps** for continuous integration and deployment (CI/CD) pipelines, automating the build and deployment process for **ReactJS** and **.NET Core** projects.
- Designed and implemented application using ASP.NET MVC 4.0 with Razor View.
- Implemented react JS code to handle cross browser compatibility issues in **Mozilla, IE 7, 8, 9, Safari and FF**.
- Used Middleware, Redux-Promise in application to retrieve data from Back-End and to also perform RESTFUL services.
- **Deployed** Entity Framework-based applications in containerized environments using Docker and Kubernetes for scalable database interactions.
- **Developed** and maintained stored procedures, views, and functions using Entity Framework with raw SQL and LINQ queries.
- Developed the application using MVVM pattern in C# and WPF.
- Designed and implemented for fully automated Server build management, monitoring and deployment using DevOps Technologies like Chef, Ansible
- Create and maintain SQL Server tables, functions and stored procedures for ODBC-connected MS Access databases.
- Interacted with Testing Team, Scrum Masters, and Business Analysts for fixing of Issues.
- Responsible for implementing UI mockups, integrating third party REACT libraries, and handling/creating Redux store data.
- **Implemented** data-driven and parameterized tests in NUnit to cover multiple test scenarios efficiently.
- **Configured** NUnit test runners and logging mechanisms to capture detailed test execution reports and improve debugging.
- Enhanced security by implementing **OAuth 2.0** and **JWT-based authentication** in **ReactJS** frontend integrated with **ASP.NET Core API**, ensuring secure data transmission and user authorization.
- Used Version control system GIT and bitbucket as code repository.

Environment: C#, ASP.NET, Web API, MVC, VSTS, GIT,Blazor, Angular 6/10,Javascript,React.JS,HTML,MSSQL,Nunit,Visual Studio,

Client: Cypher Cloud- India

Feb 2016 – May 2019

Role: .Net Developer

Responsibilities:

- Developed complete modules of the three applications/ web portals in **ASP. NET MVC with C# classes and backend complex SQL procedures** and queries.
- Developed .NET Core MVC modules, integrated REST APIs and SDKs into enterprise applications.
- Implemented Vue.js and Blazor components to improve performance and UI responsiveness.
- Designed a data access layer using Entity Framework Core with optimized SQL procedures and stored functions.
- Integrated NUnit testing frameworks for unit, functional, and regression testing.
- Leveraged Azure services and CI/CD pipelines for smooth deployments and automated testing.
- Developed micro services for the complex mapping and Integrated services.
- Involved in development of new code, problem analysis, break/fix and architecting application modules.
- Worked on applications software development efforts from deployment through the maintenance support process.
- Used **ASP.NET MVC** Page Controller pattern to add functionality to individual pages such that to accept input from the page request, invoke the requested actions on the mode.
- **Implemented** role-based access control (RBAC) and fine-grained authorization in Blazor applications for secure and compliant user management.
- **Integrated** OAuth2 and OpenID Connect authentication mechanisms in Blazor applications for secure third-party login capabilities.
- Conducted and participated in code walkthroughs intended to ensure adherence to quality standards and consistency of code.
- Created Web API as a back-end and performed database operations (CRUD) through Entity Framework.
- Designed and implemented the Core components for the application, which included a Data Access Layer(DAL) and Business Logic layer(BLL).

- Created the Web API controllers in ASP. NET MVC to build, maintain Restful API's, also consumed API's client side using Angular 6 data binding.
- Developed Web pages with Data bound controls like Data Grid, Data List and Data Repeater using methods like Data Binding and Data Templating.
- Used Microsoft Azure IaaS, PaaS and SaaS Architecture, Strategy and Planning. Working knowledge of VS2019 with Azure.
- Upgraded notification system in generating consolidated email to reduce the number of outflows.
- Wrote test cases and performed full-fledged manual testing for the enhancements.
- Use **Window Azure** to deploy the application on cloud and managing the session.
- Responsible for Designing and Developing the Reusable UI Components Like MVC Master Pages "Layouts and Nested Layouts", "View Start" and MVC User Controls "Partial Views", creating custom site pages, lists, views and master pages.
- Implemented MVVM pattern for the Application Development in Agile Methodology.
- Involved in several String tests for different integrations.
- Created CI/CD pipeline for applications.
- Tested the developed application, unit testing for various use cases and documented the results for getting approval from business users.
- Published Web services using C# to interact with other applications and exposed them using REST and HTTP.
- Developed solutions for diverse programming scenarios in C#, employing Object Oriented Programming (OOP) concepts such as: encapsulation, inheritance, polymorphism, and abstraction.
- Involved in creating responsive User Improved application performance using Azure Search and SQL query optimization.
- Interface, implementation of code behind the functionality, database modelling, creating tables and in writing stored procedures using PL/SQL.
- **Integrated** NUnit with REST API testing frameworks to validate web service functionality.
- **Implemented** NUnit parallel test execution to reduce test runtime and improve efficiency.
- Used JIRA to keep track of outstanding bugs to reduce downtime, increase productivity, and improve communication.
- Reviewed code and performed unit, functional and integrated testing to ensure quality standards are attained.

Environment: .NET Framework 4.5, C#, ASP.NET MVC5, VB.NET, Web API, WCF Services Visual Studio 2020, ASP.Net MVC 5.0/4.0, Entity Framework 6.0/4.3, .Net Framework 4.5, IIS, TFS, Visual Studio 2019, Web API, Kendo UI, Bootstrap, Angular, GIT, XML, JSON, REST API, Restful Services, DOM, NUnit, Crystal Reports.

Bajaj Finserv- India

Aug 2014 – Jan 2016

Role: .Net/WebDeveloper

Responsibilities:

- Applied statistical techniques and analysis on large data sets to present survey results effectively.
- Worked in Agile Methodology (Scrum) to meet timelines with quality deliverables.
- Collaborated with other staff and prepared visual and interactive dashboards for university admissions and enrolment data in Excel, IBM Cognos, Crystal Reports and Tableau.
- Developed Automated Model-Enhancement module to summarize large volumes of data into key insights quickly using python, SQL and reduced development efforts by 40%.
- Segmented admissions and enrollment data to get homogeneous groups of students by year to help administration plan budgets and scholarship programs.
- Performed deep dives to determine key features offered by the institution that attracted the students.
- Explored QlikView and Tableau Visualizations like bar graphs, scatter plots, pie-charts and geographic visualizations utilizing action, local and global filters.
- Built a random forest predictive model in R to identify potential enrollment for the next academic year.

- Used Visual Studio 2015 for developing Web based applications and implemented business logic in .Net CORE 1.0 Framework.
- Worked with business analysts to gather and transform Technical & Business User requirements.
- Implemented web security using encryption and form -based authentication technologies for reporting and complaint filing procedures. Tested/De-bugged web-browser using Firebug.
- Automated tasks by creating PL/SQL stored procedures, Triggers, Cursors, Functions, Views, and dynamic SQL. Enhanced it by creating exceptions for error handling.
- Used simplified client and server-side validation, better session management using ASP.NET MVC.
- Created a Data Layer object in C# language which gives the common classes of methods to execute stored procedures into a Data Set, Data Table and Data Reader.
- Involved in writing complex queries including T-SQL & Developed Database Triggers to enforce Data and Referential Integrity.
- Developed Windows forms and Screen layouts in Visual Studio.net maintaining consistent look and feel of the User controls. Also used various data objects like Dataset and GridView.
- Implemented various features like Partial classes, Anonymous types, Read-Only Properties, polymorphism, and inheritance in building data entity models.
- Building the new application from scratch and involved in migrating the application from Angular 2.0 to Angular 4/5 and .Net 4.5 to Net CORE 1.0.
- Applied Themes and CSS styles for UI design of Web Pages and Used Ajax and JavaScript to minimize number of Page Refresh.
- Designed a database in MS-SQL and created stored procedures, functions, views to reduce the complication of front-end SQL queries and triggers to enforce entity relationships.
- Developed dynamic responsive web application, custom directives, and tabbed pages by using AngularJS directives with Bootstrap which is further integrated with web services.
- Used jQuery to traverse through a DOM tree and manipulated nodes in the tree. Implemented Drag and Drop functionality using jQuery framework.
- Implemented XML parsing & JSON parsing for data handling on different applications.
- Handled all aspects of the web application including maintaining, testing, debugging, and deploying.
- Designed, modeled, and architected multithreaded, enterprise n-tier software agent using WCF web service hosted in a windows service.
- Manage all CM and version control tools (SVN, GitHub) and their usage / process ensuring traceability, repeatability, quality, and support.
- Implemented various core framework level changes, design patterns, and efficient data structures.
- Followed agile software development practice paired programming, test-driven development TTD and scrum status meetings.
- Used TFS (Team Foundation Server) for all the source code maintenance among the whole team.
- Worked with QA team during Preproduction testing process for the projects and data.

Environment: Visual Studio 2008/2012/2013, WCF, Web Services, ASP.NET Framework 4.0, .Net Core 1.0, ADO.NET, TFS, SQL server 2008, Cognos, R, QlikView, Tableau, C#, SQL Server 2008, ASP.NET 3.0, GIT, Angular 2.0, Bootstrap, MVC, XML, HTML5, CSS3, Java Script, oracle9i/8i, SSRS, Entity Framework.

Educational Details: MBA from SRM College in 2010
