

ANUPAMA JOIS

IT Software Quality Assurance & Testing Specialist | QE Test Engineer | Strategy & Operations
anupamajois@gmail.com | Houston, Texas

SUMMARY

Quality Assurance & Testing Analyst with 15+ years of experience in functional testing for Web-based, Client-Server, and Oracle-based retail applications. Expertise in Oracle Retail Suites and Oracle ERP systems within Enterprise and E-Commerce sectors. Skilled in test strategy design, functional, regression, and performance testing, and collaborating with cross-functional teams to ensure high-quality results. Proven ability to optimize testing processes, enhance application reliability, and contribute to business competitiveness in dynamic environments.

CORE COMPETENCIES

- Oracle Retail Suite
- Oracle Fusion
- Oracle EPM modules/cubes
- EcoSys by Hexagon
- JD Edwards
- Flex PLM
- Functional Testing
- Manual and Automation Testing
- Integration Testing
- Requirement Traceability Matrix
- Database testing
- IAS Unison PRISM-Federal
- UAT Testing
- Negotiation & Communication Skill
- Test Strategy & Test Plan
- Team Building & Leadership

CAREER HIGHLIGHTS

During my career so far, I've gained proven expertise in QA testing for Retail, Federal, Oracle ERP and Flex PLM application optimizing processes, and driving business competitiveness. Here are the focussed highlights

Expertise in Software Quality Engineer and Testing

- Conducted functional, system, Integration and regression testing for complex enterprise systems, including the Integrated Acquisition System(IAS) Unison PRISM, Oracle Retail Suites, JD Edwards, Oracle Fusion and EcoSys systems
- Designed and executed detailed test strategies, test cases, and Requirement to Test case tracing and defect tracking processes and Test reporting using tools like Jira, HP Quality Center/QLM, QMetry. Microsoft Azure DevOps

Automation and API Testing Proficiency

- Utilized the open-source Playwright automation framework to build and execute test cases for Oracle EPM Financials (EPBCS) and Oracle Fusion Applications, integrating all test scripts into CI/CD pipelines and GitHub repositories
- Implemented Robotic Process Automation (RPA) for IAS using UI Path Orchestrator, streamlining processes and monitoring deployed bots effectively.
- Performed comprehensive API testing using Postman for ERP JD Edwards and IAS PRISM applications, creating test suites and automating end-to-end P2P process validations to enhance testing efficiency and accuracy.

Leadership and Team Management

- Managed offshore and onsite teams for script creation, execution, and defect resolution, ensuring timely delivery and quality compliance.
- Led daily stand-ups and defect triage meetings, fostering collaboration between cross-functional teams and ensuring project milestones were met.
- Generated test reports, identified risks, callouts during testing phases.
- Demonstrated strong leadership and teamwork by collaborating closely within an Agile environment, actively participating in daily standups, sprint planning, backlog refinements, and other Agile ceremonies to ensure alignment, transparency, and continuous delivery

Data Validation and Backend Testing Expertise

- Performed comprehensive database validation using tools such as SQL Developer and Excel, ensuring data integrity and accuracy in critical systems, including source-to-target data set comparison.

- Validated backend data for high-volume integration systems like Oracle RMS, RPM, and Allocation, supporting complex business processes and compliance requirements.

Industry-Specific Testing and Support

- Conducted integration and end-to-end testing for the ERP integration with Ecosys in telecommunications tower and small cell construction systems, covering key business functions such as Project lifecycle and Budget Release phases, purchase orders, receipts, and more.
- Performed end-to-end testing for integrated Retail suits and integrations systems, addressing business-critical functions like Product life cycle, PO, Receipt, Allocation, Replenishment, and Invoicing.
- Provided application support for systems like Yahoo Search and Shell Trading, resolving incidents and improving system uptime through proactive troubleshooting.

WORK EXPERIENCE

Crown Castle – Tele-Communications and Infrastructure

Senior QE Engineer

Dec 2022 – Present

As a Quality Engineer at Crown Castle, I ensured the quality of ERP systems within an Agile framework by performing functional and integration testing, resolving defects, optimizing processes, and supporting UAT testing.

- Lead end-to-end and system integration testing for Oracle Fusion, JD Edwards, Ecosys project management and Vertex Tax systems ensuring seamless integration and optimal functionality across enterprise applications during new Ecosys application implementations.
- Designed and executed detailed test plans, test cases, and scenarios based on business and system requirements, delivering high-quality results using QMetry Test Repository and Jira Project management tools
- Performed functional, integration, and regression testing, collaborating with cross-functional teams (Business, Technical, and Scrum) to resolve critical defects and providing support for UAT testing as required.
- Participated in daily Scrum activities and sprint ceremonies, playing a key role as a QE in ensuring product quality, driving project progress, ensuring timeline adherence, and supporting IT and business initiatives.

DTC Global services

DevOps Tester USDA

Jan 2021 – July 2022

The Integrated Acquisition System (IAS) at USDA streamlines procurement and contract management. As a DevOps tester, I contributed to unit testing, functional and automation API testing, RPA, and integration validation and smoke testing of Prod env to enhance system efficiency.

- Conducted system functional testing of IAS features, including Purchase Orders, Document Creation, Requisition, and approval workflows (such as rejection, approval, and review).
- Performed automation testing efforts using UI Path orchestrator for Robotic Process Automation (RPA), improving efficiency in deployment processes and tracking BOTS.
- Conducted comprehensive API testing using Postman, developing reusable test suites for functional, regression, and end-to-end testing to ensure application stability, including testing the creation of Purchase Orders before the User Interface was available for functional testing.
- Performed integration and performance testing within DevOps pipelines, collaborating with developers to ensure smooth, continuous integration and delivery.
- Performed data validation, integrity checks, and performance testing using SQL, ensuring backend systems supported smooth application workflows.

Academy Sports & Outdoors

Senior Software Quality Assurance Engineer/SQA Lead/SQA Analyst

Sep 2011 – June 2020

In this role, I have led and participated in Flex PLM, Oracle Retail Suites testing, managing teams, designing strategies, executing test cases, and ensuring defect resolution.

- Performed functional testing of the Flex PLM product lifecycle and integration testing between Flex PLM and the Oracle RMS module, ensuring quality and seamless system integration. Additionally, provided support for UAT testing with business users.
- Led testing for Oracle Retail Suites (RMS, RPM, Replenishment, Allocation, Resa, Invoice Match), ensuring seamless functionality and integration across systems.

- Managed both offshore and onsite teams, overseeing test script creation, execution, and defect fix retesting while monitoring progress through daily calls.
- Designed test strategies, tracked issues, and led defect triage meetings to ensure timely resolution and successful delivery.
- Developed detailed test cases based on business, system, and functional requirements, executing them to validate business processes.

Shell Trading North America
QA Analyst

Nov 2010 – Jun 2011

- Designed and executed comprehensive test plans and test cases for Functional, Integration, and Regression testing, ensuring accurate validation against expected results and seamless system integration.
- Collaborated with developers to resolve application defects, utilized tools like Quality Center and SM7 for bug tracking and incident management, and optimized troubleshooting with SQL and CTRL-M operations.

Yahoo Inc
Search Analyst

Sep 2007 – Jun 2010

- Developed ad hoc reports using SQL to generate metrics for Regency testing and performance analysis.
- Conducted comprehensive testing of Yahoo SERP features, including organic pages, TAU verification, and contextual ad relevance, utilizing tools like Rel-tools and Aletheia.

TECHNICAL SKILLS

ERP Systems

- Oracle Fusion, JD Edwards ERP Systems
- Oracle EPM modules (Planning and Forecast, Workforce planning, ROI)
- Oracle Retail Merchandising System (ORMS). Oracle Retail Pricing Management (ORPM)
- Oracle Retail Sales Audit (Resa). Oracle PeopleSoft
- EcoSys Project Management by Hexagon,
- Vertex Tax system
- River sand Product Information Management (PIM)
- NOVA PIM Retail Application
- Flex PLM, Point of Sale (POS)
- Federal Government IAS system Unison PRISM

Testing tools/Automation

- QMetry, Microsoft Azure DevOps, Jira, HP Quality Center/ALM 12.5, Zephyr, Bugzilla, ServiceNow
- Automation testing tools: Playwright, Postman, UI path orchestrator

Testing Types and Methodologies

- Functional, System Integration, Automation, Ad-hoc, Smoke, System, End to End, Regression, Database testing, and API Testing
- Methodologies: Agile, Waterfall, and DevOps

Domain Knowledge

- Telecommunication Construction, Retail, Supply Chain Management, Oil & Gas, E-Commerce, Federal Government IAS system Unison PRISM

EDUCATION

Mysore University | Mysore, India
Bachelor of Law & Legal Studies

May 1998
