

---

## SUMMARY

Data Analyst with 4+ years of experience using Python, SQL, and data visualization tools to analyze, clean, and transform data into actionable insights across healthcare, finance, and R&D environments. Strong background in exploratory data analysis, reporting automation, dashboarding, and stakeholder support. Experienced in applying advanced analytics techniques, with exposure to NLP and semantic search as a value-add.

---

## Technical Skills:

**Languages:** Python, SQL, R

**Databases:** PostgreSQL, MySQL

**Tools:** Tableau, Power BI, Excel, Git, dbt, Azure

**Analytics:** Data Cleaning, EDA, Reporting Automation, Regression, A/B Testing, KPI Analysis

**Additional:** NLP (BERT/DistilBERT), Semantic Search, Data Storytelling

---

## EDUCATION

**Master of Science in Data Science**, *SUNY Old Westbury, New York* - 2025

**MBA in International Business**, *IP University, India* - 2018

**Bachelor of Science in Mathematics**, *University of Delhi, India* - 2016

---

## PROFESSIONAL EXPERIENCE

### NSF| Graduate Research Assistant

Aug 2024-Aug 2025

- Analyzed and processed large healthcare text datasets using Python to support research analytics and reporting.
- Built automated data pipelines for cleaning, transforming, and analyzing healthcare datasets.
- Performed exploratory data analysis to identify trends, patterns, and insights for research stakeholders.
- Developed interactive Streamlit dashboards to track key metrics (Precision, Recall, F1-Score) in real time.
- Applied A/B testing techniques to evaluate analytical models and improve output reliability.
- Collaborated with cross-functional research teams to translate data findings into actionable insights.

### Teachers Federal Credit Union Bank| FSR

July 2022-Dec 2022

- Conducted financial and credit risk analysis, reducing delinquency rates by 8%.
- Performed income and expense analysis, improving approval accuracy by 15%.
- Developed SQL and Python workflows to clean, validate, and analyze financial datasets, reducing manual effort by 25%.
- Built automated financial reports to improve reporting accuracy and timeliness.
- Supported business decisions by translating data insights into clear recommendations.

### Nestle Health Science | R&D Technician

Dec 2021 – May 2022

- Integrated and analyzed multi-source R&D datasets, improving data consistency by 25%.
- Cleaned and validated research data using Python to enable high-quality analysis and reporting.
- Built Tableau and Power BI dashboards for leadership to monitor research insights and trends.
- Conducted exploratory analysis using Python and R to support product development decisions.
- Partnered with cross-functional teams to optimize data collection and reporting processes.

### Infoedge | Sales Analyst

Jan 2018 – Sep 2020

- Analyzed customer behavior and sales trends using Python and SQL, contributing to a 20% revenue increase.
- Conducted market and competitive analysis, improving market share by 10%.
- Reduced sales cycle time by 25% by streamlining reporting and analytics processes.
- Created customer segmentation dashboards using SQL and Tableau to support targeted marketing campaigns.
