SUMMARY

Full-Stack Software Developer with 4 years of experience designing and scaling enterprise applications for 10,000+ users. Skilled in C#, .NET, JavaScript, PHP, and RESTful API design, with proven success optimizing performance, automating workflows, and reducing support volume. Recognized for problem-solving under pressure and collaborative execution in agile environments. Awarded Employee of the Month for innovation and technical excellence.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript, SQL, HTML, CSS, PHP, Ruby
- **Frameworks & Libraries:** .NET, Laravel, AngularJS, Backbone.js, React Native, Redux, Node.js, Ruby on Rails, Stripe.NET, discord.js, Stripe.js
- **Databases:** SQL Server, MySQL, PostgreSQL, SQLite, phpMyAdmin, SSMS, DataGrip
- **Cloud & Development Tools:** AWS, Azure, GitHub, GitLab, Postman, Visual Studio, Visual Studio Code, Power BI, Selenium
- **Agile Methodologies:** Agile, Scrum, RESTful API Design, CI/CD
- **Collaboration & Workflow:** Jira, Microsoft Teams, Slack
- **Payment & Integration Tools:** Stripe

EXPERIENCE

Software Developer | OmegaFi | Remote | 2022-2025

OmegaFi provides integrated financial and operational technology solutions for fraternities and sororities, supporting chapters, house corporations, headquarters, and foundations. Its platforms help organizations increase revenue visibility, reduce financial risk, improve time efficiency, and streamline day-to-day operations.

- Spearheaded the development and enhancement of key applications including ICS and OmegaRecruit, leveraging C#, .NET, JavaScript, TypeScript, and HTML to improve performance and functionality.
- Led the optimization of OmegaSites and OmegaOne applications using PHP, Laravel, JavaScript, and Backbone.js, introducing new features that enhanced performance, improved usability, and strengthened platform stability.
- Implemented and optimized RESTful APIs and integrated third-party APIs to improve data communication and expand system capabilities.
- Designed and maintained Business Logic (BLL) and Data Access (DAL) layers to support cleaner architecture and more efficient data handling.
- Collaborated with cross-functional teams to troubleshoot and resolve production issues, increasing uptime and improving user experience.
- Actively contributed to Agile development cycles by participating in daily stand-ups, sprint planning, and retrospectives, helping accelerate delivery and strengthen team communication.
- Reported, prioritized, and resolved over 1,200 support tickets throughout tenure, reducing average resolution time and improving customer satisfaction.
- Demonstrated reliability and ownership by being on call to resolve urgent issues, preventing application outages and maintaining seamless operations.
- Recognized with the Employee of the Month Award for innovation, teamwork, and consistently exceeding performance expectations.

EDUCATION

Flatiron School | Software Engineering Bootcamp | Full-Stack Web Development | 2021

Immersive full-stack program covering JavaScript, React, Ruby on Rails, and SQL. Developed multiple full-stack applications, mastered agile workflows, and gained real-world experience collaborating on production-ready software.

Misericordia University | Bachelor of Science, Information Technology | 2020

TECHNICAL PROJECTS

- **Sinking Squids** – [GitHub](#) | [Demo](#) Interactive Battleship-style web app built with React.js, JavaScript, and Ruby on Rails, featuring real-time board logic and a persistent leaderboard.
 - **Game Review** – [GitHub](#) Full-stack review platform using Ruby on Rails and Active Record with OmniAuth Facebook OAuth authentication and dynamic forms.
 - **Goal Tracker** – [GitHub](#) | [Demo](#) Personal productivity tracker using Rails and JavaScript with a custom API and real-time progress visualization.
-

ADDITIONAL ACTIVITIES

Hackathon Developer | Continued Education (Udemy) | eSports Club Member | Student Government Computer Club
