

TANJUARA TASLIM

Address: 3602 Barcroft View Ter. Falls Church. VA - 22041 | **Mobile:** (703)389-4325 | **Email:** ara.taslim.tanju@gmail.com

US Citizen (Active Public Trust Clearance)

Professional Summary

- **8+ years of QA experience** in federal and healthcare domains, with expertise spanning the **Software Development Life Cycle (SDLC)** and **Agile methodologies (Scrum, SAFe)**, ensuring high-quality, compliant application delivery.
- Adept at **collaborating with cross-functional teams** business analysts, developers, product owners, and clinicians to refine requirements, align testing with business goals, and foster continuous improvement.
- Skilled in **manual testing** across Functional, Regression, Integration, Smoke, Sanity, UAT, & Cross-Browser testing, delivering consistent validation of business-critical workflows.
- Proficient in **test planning, test case design, and Requirement Traceability Matrix (RTM)** development to ensure comprehensive coverage of functional, technical, and compliance requirements.
- Experienced in **defect management** using **Jira, Azure DevOps (ADO), ServiceNow, and HP ALM**, with strong focus on severity/priority assignment, traceability, and stakeholder communication.
- Strong background in **automation frameworks**, building and maintaining **hybrid (Data-Driven, Keyword-Driven, Page Object Model)** and **BDD frameworks** using **Selenium WebDriver, Java, TestNG, Maven, and Cucumber/Gherkin**.
- Hands-on experience integrating automation with **CI/CD pipelines (Jenkins, Git/GitHub)** to enable continuous regression testing, nightly builds, and automated release readiness reporting.
- Expertise in **element locators** (XPath, CSS, ID, Name, Class) for developing reliable, reusable automation scripts across complex web applications.
- Designed and executed **Data-Driven Testing** strategies to validate workflows against multiple datasets and edge cases.
- Conducted **API testing** using **Postman** for RESTful services and **HL7/FHIR** healthcare interfaces, ensuring seamless interoperability across federal and healthcare systems.
- Performed **backend testing** using **SQL Server and MySQL**, writing advanced SQL queries for data validation, joins, stored procedures, and migration testing.
- Ensured compliance with **HIPAA, Section 508, WCAG 2.1, ADA, FISMA, and NIST 800-53** standards, executing accessibility testing with **WAVE, JAWS, ANDI, and CCA**.
- Delivered detailed **defect dashboards, execution reports, and compliance documentation** for leadership and regulatory bodies.
- Innovated with **AI-driven testing** using **AWS Bedrock** to automate test case generation, predict defects, and optimize regression suites, significantly reducing manual effort and accelerating release cycles.
- **Proficient with Microsoft 365 (MS365)—including advanced Excel (pivot tables, formulas), Word, PowerPoint, SharePoint Online, OneDrive, and Teams—to streamline test documentation, reporting, collaboration, and productivity across Agile teams.**

TECHNICAL SKILLS

- **Methodologies & SDLC:** Agile (Scrum, SAFe), Waterfall, Test Driven Development (TDD), Behavior Driven Development (BDD), Software Development Life Cycle (SDLC), Quality Assurance Life Cycle (QALC)
- **Microsoft 365 Suite (MS365):** Expert in MS Word, Excel (formulas, pivot tables, data validation), PowerPoint, OneDrive, SharePoint Online, Outlook, Teams; used for documentation, test reporting, dashboarding, and collaboration across Agile teams

- **Test Management & Defect Tracking:** Azure DevOps (ADO), Jira, ServiceNow, HP ALM (Quality Center)
- **Automation Frameworks & Tools:** Selenium WebDriver, TestNG, JUnit, Maven, Hybrid (Data-Driven, Keyword-Driven, Page Object Model), BDD with Cucumber/Gherkin
- **Programming & Scripting:** Java, SQL, HTML, CSS, XML (test data validation and integration workflows)
- **CI/CD & Source Control:** Jenkins, Git/GitHub; test environment setup with Eclipse & IntelliJ IDEA
- **API & Web Services Testing:** Postman (REST APIs), HL7/FHIR interface validation, Swagger; XML-based validation for data exchange
- **Databases & Backend Testing:** SQL Server, MySQL; advanced SQL queries for data validation, joins, stored procedures, migrations, and backend workflows
- **Accessibility & Compliance:** Section 508, WCAG 2.1, ADA, HIPAA, FISMA, NIST 800-53; testing with WAVE, JAWS, ANDI, and Color Contrast Analyzer (CCA)
- **AI & Cloud Testing:** AWS Bedrock for AI-driven test case generation, defect prediction, and regression optimization
- **Testing Types:** Functional, Regression, Smoke, Sanity, Integration, System, GUI, UAT, Positive/Negative, Backend, Compatibility, Performance, Accessibility
- **Collaboration & Reporting:** MS Teams, Confluence, SharePoint, Outlook; preparing Requirement Traceability Matrix (RTM), test execution reports, defect dashboards, and release summaries.

PROFESSIONAL EXPERIENCE

QA Engineer

United States Department of Commerce

04/2021 to Current

Washington, D.C.

- Followed **SDLC methodologies** and worked in a fast-paced **Agile environment**, actively participating in **sprint planning, daily scrums, and retrospectives**.
- Reviewed **business requirements, functional specifications, and technical designs**, collaborating closely with **analysts, developers, and product owners** to ensure accurate interpretation and test coverage.
- Performed **manual testing** across multiple environments, including **Functional, Regression, System, Integration, Usability, and Cross-Browser testing**.
- Authored and executed detailed **Test Plans, Test Cases, and Test Scenarios**, aligning coverage with business and federal requirements.
- Managed and tracked **defects** using **Jira**, linking them to test cases, assigning **severity and priority**, and driving resolution through daily triage meetings.
- Designed, enhanced, and supported a **hybrid automation framework** using **Selenium WebDriver, Java, TestNG, Cucumber (BDD), and Maven**, fully integrated into **Jenkins pipelines** for automated nightly builds and continuous regression testing.
- Maintained automation test environments in **Eclipse and IntelliJ**, optimizing framework scalability and reducing execution time.
- Applied **XPath, CSS, ID, and Class locators** to build reliable and reusable automation scripts for dynamic applications.
- Developed **Data-Driven Testing** frameworks in Selenium with TestNG, validating workflows against multiple datasets.
- Conducted **API testing** using **Postman**, validating **REST endpoints** in SOA-based architecture applications.
- Performed **SQL validation and backend testing** with **SQL Server**, writing advanced queries to verify **data integrity, joins, and backend workflows**.

- Produced **Defect Status Reports** and automated **Jira dashboards**, keeping stakeholders updated on test progress, risks, and issue resolution.
- Ensured adherence to **federal compliance standards**, performing **Section 508 accessibility testing** with **WAVE, JAWS, ANDI, and CCA**.
- **Implemented AI-powered testing using AWS Bedrock**, applying **LLMs for automated test case generation, defect prediction, and regression optimization**, significantly improving test efficiency and reducing manual workload.

QA Tester

05/2019 to 02/2021

General Services Administration (GSA)

Washington, D.C.

- Applied **SDLC and Agile practices**, contributing to **sprint planning, daily stand-ups, and requirement walkthroughs** for GSA's federal acquisition and e-Gov systems.
- Partnered with **business analysts, developers, and QA peers** to review requirements and design detailed **Test Plans, Test Cases, and Test Scenarios** supporting procurement and vendor management workflows.
- Executed extensive **manual testing** including **Functional, Regression, Integration, System, UAT, and Cross-Browser testing** across **FAS applications and document management systems**.
- Prepared and maintained **test data sets** for **E-File modules** and executed **manual test cases**, maintaining traceability to requirements.
- Managed and tracked **defects** using **Azure DevOps (ADO)** and **ServiceNow**, logging issues, assigning priorities, and following through on resolutions.
- Enhanced and maintained an **automation framework** with **Selenium WebDriver, Java, TestNG, and Maven**, executing automated **Regression and Smoke suites** for stability in GSA applications.
- Configured **Jenkins pipelines** to run smoke tests on new builds and regression jobs for monthly release cycles.
- Utilized **XPath and CSS selectors** to create stable and reusable locators for automation scripts.
- Conducted **API testing** with **Postman**, validating REST endpoints used in integrations with **federal systems like SAM.gov and FPDS-NG**.
- Performed **SQL queries** in **SQL Server** to validate **data mapping, joins, and audit trails** supporting federal reporting requirements.
- Delivered **test execution reports, defect dashboards, and release summaries** to leadership for tracking project readiness.
- Coordinated and supported **User Acceptance Testing (UAT)** with federal stakeholders to validate compliance before deployment.
- Ensured adherence to **federal compliance standards**, including **Section 508 accessibility testing** and **FISMA/NIST 800-53 security controls**, to support system certification and authorization.

QA Analyst

08/2017 to 04/2019

INOVA Health

Falls Church, VA

- Followed **SDLC methodologies** and participated in **Agile ceremonies** including daily scrums, sprint planning, and retrospectives to align QA with Inova's healthcare projects.
- Analyzed **business requirements** and contributed to **Test Plans, QA strategies, and test documentation** for **EHR/EMR modules, patient portals, and billing systems**.
- Performed **manual testing** including **Functional, Regression, Smoke, Sanity, Unit, and End-to-End system testing**, focusing on **appointment scheduling, lab result uploads, and prescription management**.
- Authored and maintained **Test Cases, Test Scenarios, and Test Case Execution Matrices**, ensuring complete coverage of **clinical workflows and insurance claims processes**.

- Managed **defects** using **HP ALM (Quality Center)** and **Jira**, logging issues with severity/priority, attaching screenshots, and linking to test scripts for reproducibility.
- Generated **daily execution reports, defect metrics, and QA dashboards** for leadership and compliance teams.
- Developed and executed **SQL queries** to validate **claims data, patient records, and data migration/transformation** processes across Inova's clinical databases.
- Conducted **cross-browser and web testing** to validate patient-facing portals for accessibility, performance, and reliability.
- Automated selected **regression test cases** using **Selenium WebDriver**, reducing repetitive testing for **patient portal workflows**.
- Collaborated with **clinicians, business users, and compliance teams** during **User Acceptance Testing (UAT)**, ensuring solutions met healthcare requirements and gained stakeholder sign-off.
- Provided **QA perspective feedback** in design walkthroughs and occasionally acted as **Scrum Master** to guide sprint activities.
- Ensured adherence to **HIPAA privacy rules** and performed **Section 508 accessibility testing** on **patient-facing applications**, validating usability for all patients.
- Supported testing of **HL7/FHIR interfaces** to confirm accurate exchange of clinical data between EHR systems, labs, and insurance systems.

EDUCATION

- Master of Arts in Political Science
National University
- Bachelor of Arts in Political Science
National University

PROFESSIONAL CERTIFICATIONS

- **Scrum Master (Certificate Id: 39332131388597)**
- **CompTIA Security+ (Candidate Id: COMP001022408725)**
