PROFESSIONAL EXPERIENCE

Java Developer

PulseWave Systems | April 2025 - Dec 2025

- Designed and delivered cloud-native microservices using Java, Spring Boot, and Spring MVC, supporting scalable, high-availability AWS deployments.
- Built and optimized AWS-based architectures (compute, storage, networking) to improve performance, security, and cost efficiency for enterprise clients.
- Implemented CI/CD pipelines with Jenkins, enabling automated builds, testing, and deployments across multiple environments.
- Developed and maintained RESTful APIs with robust debugging, unit/integration testing, and SQL-backed data persistence.
- Collaborated in a consulting environment to translate business requirements into secure, maintainable solutions, contributing to HTML5/CSS3 UI components where needed.

Software Developer (SAP Commerce Cloud)

Southwire | Jan 2022 - Feb 2025

- Built a customer-facing web portal on the SAP Commerce Cloud using Java, Spring Boot, JavaScript, and React, improving customer self-service capabilities by over 75%.
- Automated performance and load testing using Jenkins CI/CD pipelines.
- Managed zero-downtime production deployments and backups on cloud infrastructure orchestrated with Kubernetes.
- Created advanced SQL queries and Python scripts for efficient ingestion of 10,000+ product data rows.
- Developed responsive UI content pages using React, JSP, HTML, and CSS, integrated with Java and Spring MVC.
- Created instant order and delivery notification emails using Java, Spring MVC, REST APIs, and Thymeleaf, enhancing customer satisfaction ratings by 35%.
- Implemented Google Analytics tracking, enabling real-time monitoring of user behavior, conversion rates, and traffic sources.
- Delivered product demos and collaborated in daily Agile SCRUM meetings to align with cross-functional teams and business leaders.

Systems Developer

Apex Systems | Nov 2020 - Sep 2021

- Expanded Java Spring Boot REST APIs for an insurance platform processing 500,000+ health records.
- Deployed Java-based Docker microservices to AWS ECS, ensuring scalable and reliable healthcare application delivery.
- Improved MongoDB performance with indexing to accelerate claims data access in healthcare applications.
- Developed efficient Oracle SQL queries through Java for data retrieval and reporting in insurance microservices.

Software Engineer

Westgate Resorts | Aug 2019 - Aug 2020

- Corrected billing logic in Java Spring Boot REST requests, saving over \$300K annually in processing fees.
- Improved Oracle SQL query efficiency by optimizing Hibernate ORM usage for faster data retrieval.
- Drafted Swagger API documentation to streamline cross-team API usage and reduce confusion.
- Ensured 100% uptime with production deployments onto Linux Tomcat servers.
- Utilized JUnit, Mockito, and Test-Driven Development to reduce QA cycle time by 25%.
- Implemented Spring Security for PCI/DSS compliant protection of Java Spring RESTful endpoints.

SKILLS

Languages & Frameworks:

Java, JavaScript, Python, HTML5, CSS3, XML, JSON, Spring Boot, Spring Data, Spring MVC, Spring Security, React, JSP, Thymeleaf, Hibernate

Databases:

Oracle, MongoDB, SAP HANA, NoSQL, SQL

Tools & Platforms:

SAP Commerce Cloud, AWS ECS, Jenkins, JUnit, Mockito, Swagger, Tomcat, Linux, IntelliJ IDEA, VSCode, Git, Google Analytics, JIRA, Postman, Docker, Kubernetes

Development Practices & Methodologies:

REST APIs, CI/CD Pipelines, Agile, SCRUM, Test-Driven Development (TDD), Test Automation, Microservices, Containerization, PCI/DSS Compliance

EDUCATION

Bachelor of Science in Information Technology

University of Central Florida, College of Engineering & Computer Science

Graduated: Aug 2019
