 - App insights, Queues, Table Storage, API Management, Subscriptions, Function Apps, CI/CD Pipeline
- APIs
- GitHub & Azure DevOps (PRs, CI/CD)
- SQL
- Agile (Scrum)

EXPERIENCE

Axonify Inc - Waterloo, Canada - *Software Engineer*

June 2019 - PRESENT

- Led migration of legacy Backbone codebase to React
- Worked on Microsoft Teams Integration
 - Created custom app & bot
 - Azure used for CI/CD and bot deployments
- Did overhaul of UX redesign to be more modern

- Presented at NRF (National Retail Federation) and company a primary reason for our projected growth this year
- Added accessibility to our pages (WCAG-aligned)
 - Includes changes to elements and colors used
 - Includes readability for all languages (including RTL)
 - Allows screen reader to clearly articulate what's on screen
 - Allows for more keyboard navigation
- Applied BMAD (Business Modeling Agile Delivery) methodology to align long-term technical work with business outcomes.
- Use Cursor Agents to speed up development

Poolcorp - Covington, Louisiana - *Software Engineer II*

March 2025 - February 2026

- Improved CIT
 - Created optimization logic that would source inventory from the best warehouse and is determined by a scoring based on distance, inventory, and whether it needed split sourcing from multiple warehouses.
- Integrated Fulfillment Service Center for Shopify Customers
 - Created Admin UI Block using React to display inventory from our available warehouses
 - Created webhook that can accept fulfillment requests and create orders in our Prelude system
 - Created Function Apps that poll our open orders and submit the tracking numbers and complete fulfillment once shipped

BYOND - Remote - *Game Developer*

2019

- Built multiplayer RPGs using BYOND (DM), implementing real-time combat systems, state management, and progression mechanics
- Created 4 games which garnered a player base of over 5,000 and generated over \$20,000.

EDUCATION

Georgia State University - *Bachelor's Degree in Computer Science*

Spring 2020
