

Marvin Romero

646-300-1946 | marvin.r02@gmail.com | marvin-r.replit.app

Summary

Front-End/UI Developer with over 7 years of experience designing and developing responsive, user-friendly interfaces. Skilled in HTML5, CSS3, JavaScript, and modern UI frameworks like React, Angular, and VueJS. Proven ability to optimize applications for performance, ensure web accessibility compliance, and translate UX designs into functional, engaging web experiences. Adept at implementing cross-browser compatibility and responsive design to enhance user satisfaction.

Skills

- Javascript (Vanilla, ES6+), React, React Native, Angular, C#, VueJS, Svelte, Java, Typescript, Node.js, AJAX API's, Rest APIs, AWS, CRUD, ECMAScript, CI/CD, Docker, Cypress, Unit Testing, Jest, JQuery, Redux, GitLab, Git, Django, Storybook, ANT, MUI, Tailwind, Database, Elasticsearch, SCSS, CSS, SASS, D3, React Hooks, Figma, Flutter, MongoDB, JIRA, HTML, Bootstrap, Adobe Illustrator, Robofont, Adobe Photoshop, Wix, Wordpress, Squarespace, OAuth, OpenAPI

Work Experience

Seminole County Clerk of Court and Comptroller

Jul 2025 - Present

Front-End/UX Engineer

- Designed and developed a unified front-end dashboard in Svelte and React/NEXT.js for five distinct CMS teams within the Seminole Clerk County Comptroller's office, streamlining access to case information and improving workflow efficiency.
- Leveraged SignalR for live front-end updates, ensuring that case assignments and worklists are automatically synchronized and up-to-date across all user sessions.
- Collaborated with multiple departmental teams to gather requirements and deliver tailored front-end solutions that meet the unique needs of each team.
- Embedded multiple legacy CMS platforms using iFrame integration, enabling in-dashboard case access and maintaining a consistent user experience across systems.

ServiceNow

Apr 2024 - May 2025

Service Management /TSE Engineer

- Diagnosed and resolved complex ServiceNow platform issues across core ITSM modules (Incident, Problem, Change), improving resolution time by 35% through root cause analysis and structured debugging.
- Partnered with developers and product engineers to design scalable fixes and improve knowledge base content, reducing repeat customer escalations by 25%.
- Authored technical documentation and best-practice guides for configurations, customizations, and workflow optimizations to enhance platform reliability.
- Delivered proactive customer communication and guided clients on performance tuning, leading to a 20% boost in customer satisfaction scores.
- Supported integrations with Flow Designer, Service Catalog, and SharePoint, ensuring smooth data automation and workflow consistency.

The Home Depot

Sep 2022 - Mar 2024

Front-End/UX Engineer

- Designed and documented React component libraries using Material UI and Ant Design, enabling design consistency across multiple enterprise teams and reducing UI build time by 40%.
- Directed a front-end technical assistance initiative, improving development efficiency by 30% through structured code reviews and pair programming.
- Collaborated with UX designers in Figma to deliver pixel-perfect, responsive interfaces, improving accessibility scores to WCAG 2.1 AA standards.
- Automated TypeScript validation and formatting via GitHub Actions and AWS Lambda, ensuring code quality in CI/CD pipelines.
- Enhanced UI performance with reusable hooks and modular architecture, reducing component re-renders by 20% and improving Lighthouse metrics.

BNL Consulting - CDC WISQARS Project

Mar 2022 - Sep 2022

Front-End Engineer

- Developed interactive data visualizations using D3.js and SVGs, improving user comprehension of public health data by 25%.
- Developed dynamic, responsive UI elements to enhance user interactions and minimize selection errors by 20%.
- Designed export features for existing components and datasets, facilitating efficient data management and accessibility, which streamlined data handling processes.
- Built Storybook-tested reusable React components to ensure consistent and accessible UI design across CDC dashboards.
- Implemented scalable Java-based services to support front-end UI functionality, improving data processing speeds.
- Leveraged Node.js to retrieve data from the backend and populate an interactive US map, improving data visualization and user interaction for better user experience.
- Partnered with designers to refine data-driven UI flows that reduced user error rates by 20% and improved navigation clarity.

Superfly Marketing Group

Aug 2021 - Feb 2022

Front-End Engineer

- Built cross-platform applications in React, Vue, and Svelte, achieving a responsive, high-performance UX across mobile and desktop.
- Collaborated with UX teams to produce interactive visual elements for web and mobile platforms, enhancing overall user satisfaction.
- Demonstrated strong proficiency in responsive and mobile design principles, ensuring optimal user experience across devices and screen sizes.
- Implemented and optimized reusable React components using React Hooks, simplifying updates and maintenance of the website's user interface.
- Conducted cross-browser testing and resolved UI bugs to ensure consistent functionality and responsive behavior across all devices.
- Developed APIs for mobile and web applications using AWS API Gateway and Lambda functions, which improved connectivity and server-side functionality.
- Improved brand engagement by enhancing SVG animations and visual elements, reducing bounce rate by 15%.
- Created and maintained mobile applications with React Native, boosting performance and user engagement on both iOS and Android platforms.

INSPIRAVE

Mar 2020 - Jan 2021

Front-End Engineer

- Collaborated with remote back-end teams to ensure seamless integration, resulting in a 20% reduction in development time.
- Led front-end architecture design for enterprise web apps, improving scalability and UX performance by 15%.
- Established robust integrations with third-party APIs and applications, enhancing website functionality and increasing user engagement by 25%.
- Engineered REST APIs and Java integrations for seamless data exchange, reducing API response time by 20%.
- Improved mobile UX with React Native prototypes, increasing session retention by 25%.

Bond & Co.

Jul 2018 - Feb 2019

Software Engineer

- Developed React components, managing data flow with external libraries integration, which enhanced application efficiency and user experience.
- Customized and adapted engineering workflows with tools like Jira and Postman, optimizing development processes and team collaboration.
- Built React interfaces and scalable SCSS systems, improving page load performance across multiple platforms.
- Automated design processes with C# scripting in RoboFont, enhancing productivity for creative engineering teams.

Education

Queens College | Queens, NY

Bachelor of Science

V SCHOOL | Salt Lake City, UT

Certificate, Full Stack Web Development

GENERAL ASSEMBLY | New York, NY

Certificate, Javascript Development
