SUMMARY

Software Engineer with 3+ years of consulting experience delivering backend, integration, and data solutions using Java, Python, and JavaScript. Expertise in HL7, Mirth Connect, data workflows, API integrations, and system interoperability. Trained in Technical Architecture, SAP, and Power BI, with a strong foundation in SQL, data modeling, and cloud-based applications.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL, HTML, CSS
- **Frameworks:** React, Angular, Spring Boot
- **ERP Systems:** SAP
- **Apps:** AWS, Mirth Connect, Power BI, Git, Jira, GenAI, Oracle, Excel
- **Data:** DAX, Data Modeling, Pandas, JSON, CSV, XML, RESTful APIs
- **Concepts:** HL7, API Integration, Agile Sprint, sensitive data, CI/CD, Data visualization, Data Analysis, ETL, Client Communication

EXPERIENCE

Accenture

Sep 2022 - Dec 2025

Advanced App Engineering Analyst

Fortune 100 Health Client

Jul 2025 - Dec 2025

JavaScript Developer

- Developed migration of data workflows using Oracle SQL and JavaScript, optimizing process speeds by 55%.
- Collaborated with backend teams to extend Mirth Connect API functionality adding 3 new software features.
- Contributed internal tools and new product features to support development of 3 new deployment initiatives.
- Developed java application Java Spring Boot to enhance data integration with API.
- Applied JavaScript expertise to improve system design and interoperability, increasing system efficiency.

Fortune 100 Public Service Client

Nov 2024 - Dec 2024

SQL Analyst

- Documented and analyzed complex SQL queries enhancing query analysis efforts for over hundreds of data points.
- Developed Power BI dashboard enhancing data accessibility to stakeholders.

Fortune 1000 CMT Clients

Sep 2024 - Oct 2024

Python Developer

- Developed over 40 automated data workflows leveraging Python, Pandas, and SQL for data manipulation and reporting.
- Implemented GitHub Organizations for streamlined change management and version control.
- Structured and exported data to CSV for downstream analysis and visualization resulting in reusable functions.
- Utilized Open3D and Jupyter Notebooks to visualize and manipulate 3D point cloud data helping secure client engagement for Accenture.

Accenture Health Client

Oct 2023 - May 2024

JavaScript Developer

- Designed and implemented JavaScript based error handling mechanisms increasing data reliability.
- Integrated HL7 messaging formats to parse and convert healthcare data for improved interoperability.
- Conducted client meetings, maintained documentation, and ensured development traceability weekly.

Accenture Public Service Client

May 2023 - Oct 2023

Customer Support Analyst

- Triaged a growing volume of customer tickets during post-COVID surge.
- Maintained top-tier performance, consistently ranked among the top 10 performers over a 6+ month period.
- Improved customer satisfaction by streamlining ticket handling and providing proactive support strategies.

CERTIFICATIONS & TRAINING

- Accenture Technical Architecture
- Accenture SAP Functional
- Google Machine Learning Engineer
- DataCamp Intermediate Certifications: DAX, Data Modeling in Power BI, SQL
- AWS Cloud Practitioner -inactive | AWS Cloud Architect | AWS Cloud Developer

EDUCATION

Quinnipiac University

Aug 2018 - Jun 2022

Bachelor of Science, Software Engineering

- **Coursework:** Four years including; Java development, data structures, algorithms, and application design, Angular and TypeScript
