

FULL-STACK SOFTWARE AND CLOUD SECURITY ENGINEER

Clayton Allmond

Suitland, MD

☎ 240-416-7010 | ✉ claytonallmond@gmail.com

[LinkedIn](#) | [GitHub](#)

SUMMARY

Security-focused full-stack software engineer with hands-on experience building and securing web applications using **JavaScript, Node.js, React, and PostgreSQL**. Recently earned **CompTIA Security+**, with strong foundational knowledge of **IAM, encryption, network security, risk management, and secure application design**. U.S. Air Force veteran with a background in high-stakes operational environments and collaborative, client-facing technical work. Seeking entry-to-mid-level roles in **cloud security, application security, or DevSecOps**.

CERTIFICATIONS

- **CompTIA Security+ (SY0-701) – 2025**
 - **AWS Certified Developer – Associate** (*In Progress, Expected 01/2026*)
 - **Certificate – Software Engineering**, Thinkful | 2023
-

TECHNICAL SKILLS

Languages & Frameworks

JavaScript (ES6+), Node.js, React, Express, Python

Security & Cloud Foundations

Authentication & Authorization, IAM concepts, Encryption (at rest & in transit), Secure API Design, OWASP principles, Network Security fundamentals, Risk & Threat Awareness

Backend & Data

REST APIs, PostgreSQL, Knex.js, SQL

Frontend & Interactive UI

React, React Three Fiber, Three.js, HTML, CSS, jQuery

Testing, DevOps & Tooling

Mocha, Chai, Git/GitHub, CI/CD basics, Heroku, Vercel, Linux fundamentals

Design & Creative Tech

Figma, Webflow, Blender, Spline

PROJECTS

Restaurant Reservation System | Full-Stack Application

React, Node.js, PostgreSQL, REST APIs

- Designed and implemented a full-stack reservation platform for fine-dining workflows.
- Built RESTful APIs with Node.js and Express, implementing structured routing and input validation.
- Managed relational data using PostgreSQL and Knex.js queries.
- Applied secure development practices, including environment-based configuration and server-side validation.
- Deployed production-ready application with logging and error handling.

[\[Link\]](#)

Decoder Ring Application | Secure Logic & Testing Project

Node.js, Mocha, Chai

- Developed an encryption/decryption utility emphasizing data integrity and correctness.
- Applied **test-driven development (TDD)** using Mocha and Chai to validate cryptographic logic paths.

- Strengthened understanding of **encoding, transformation, and secure data handling concepts** relevant to application security.

[\[Link\]](#)

Unbeatable Tic Tac Toe | Algorithmic Logic Project

React, JavaScript

- Engineered an AI opponent using the **Minimax algorithm** to ensure optimal gameplay.
- Built a responsive, interactive UI using React.
- Demonstrated structured problem-solving, algorithmic thinking, and state management.

EXPERIENCE

United States Air Force – Structural Apprentice, Civil Engineer

2010 – 2014

- Maintained and inspected mission-critical facilities in compliance with strict safety and operational standards.
 - Operated in high-accountability environments requiring procedural accuracy and risk awareness.
 - Developed teamwork, technical discipline, and documentation habits transferable to secure systems engineering.
-

Freelance Audio Engineer / Music Producer

2012 – 2019

- Delivered client-driven technical projects under deadline using complex digital toolchains.
 - Translated creative requirements into reliable technical execution through iterative feedback.
 - Applied versioning, structured workflows, and quality control similar to agile development practices.
-

Line Cook – Death & Company | 2023 – 2024

- Executed time-sensitive tasks in high-pressure environments requiring precision and coordination.
- Collaborated across teams to maintain consistency, quality, and operational efficiency.

Prep Cook – Red Bear Brewing | 2022 – 2023

- Organized workflows and task prioritization to meet production schedules.

Delivery Driver / Event Support – Blue Vanda Designs | 2019 – 2021

- Coordinated logistics and delivery timelines for high-value client events.
-

EDUCATION

- **Certificate – Software Engineering**, Thinkful | 2023
