US Citizen | 404-933-9105 | [cnifadkar3@gatech.edu](mailto:cnifadkar3@gatech.edu) | [linkedin.com/in/chaitanya-nifadkar](https://www.linkedin.com/in/chaitanya-nifadkar) |

## EDUCATION

### Georgia Institute of Technology — College of Computing

*Master of Science in Computer Science: Machine Learning*

Atlanta, GA

January 2025 – May 2026

### Georgia Institute of Technology — College of Computing

*Bachelor of Science in Computer Science: Artificial Intelligence*

Atlanta, GA

August 2020 – Decemeber 2024

## EXPERIENCE

### Coinbase

May 2025 – July 2025

*Software Engineer Intern (Backend)*

*Remote*

- Designed and developed backend web services using object-oriented principles to support internal applications used by 30+ engineers and product stakeholders.
- Implemented REST-based APIs and server-side logic to process, validate, and persist application data, handling over 5M records per execution.
- Designed relational database schemas and wrote optimized SQL queries to ensure reliable data storage and retrieval across multiple services.
- Debugged and resolved production issues across backend components, reducing recurring application errors by 40%.
- Collaborated in an Agile development environment, participating in sprint planning, code reviews, and cross-team design discussions.

### Siemens

May 2024 – August 2024

*Software Engineer Intern*

*Alpharetta, GA*

- Developed backend application logic for enterprise systems using Python and Java, supporting forecasting and reporting workflows across 12 business units.
- Built database-backed services to ingest and process over 1M records per run, improving data accuracy and reducing processing failures by 35%.
- Applied software development lifecycle best practices including requirements gathering, implementation, testing, and documentation.

### Automatic Data Processing (ADP)

May 2023 – August 2023

*Software Engineer Intern*

*Alpharetta, GA*

- Developed backend utilities and scripts to support internal web applications and reporting tools used by finance and operations teams.
- Implemented database management logic and batch processing workflows to automate generation of 70+ reports per day.
- Improved backend performance by optimizing SQL queries and processing logic, reducing execution time by 30%.

## PROJECTS

### Backend Web Application for Data Management | *Python, REST APIs, SQL*

December 2024

- Designed and implemented a backend web application to manage structured data through RESTful endpoints.
- Built server-side logic to validate inputs, enforce business rules, and persist records in a relational database.
- Handled CRUD operations over 150,000+ records while maintaining consistent performance and data integrity.

### Cloud-Deployed Application Service | *Python, Docker, Cloud Services*

May 2023

- Developed a backend service and deployed it to a cloud environment using containerization.
- Implemented logging and error handling to support debugging and operational monitoring.
- Improved deployment reliability and reduced setup time by 50% through standardized build processes.

## TECHNICAL SKILLS

**Programming Languages:** Python, Java, SQL, C++, JavaScript

**Back-End Development:** REST APIs, Server-Side Scripting, OOP

**Databases:** Relational Databases, Database Design, SQL Optimization

**Cloud & DevOps:** Cloud Services, Docker, Git

**Development Practices:** Software Development Lifecycle, Agile Development, Debugging, Code Reviews
