EDUCATION

University of North Carolina at Chapel Hill

Bachelor of Science in Computer Science; Minor in Data Science

Chapel Hill, NC

2021 – 2025

SKILLS

Programming: Python 3, Swift, C, C++, JavaScript/Typescript, SQL, HTML, CSS, Prolog, Scheme, Haskell, Java, Golang, C#

Tools: Amazon AWS, Jenkins, Git, Docker, Kubernetes, OpenShift, Socket.IO, Bash

PROFESSIONAL EXPERIENCE

UNC Department of Computer Science

January 2025 – May 2025

Undergraduate Teaching Assistant (Foundations of Software Engineering)

Head TA (Community)

- **Led code review sessions for 200+ students**, providing actionable feedback on Git workflows, API integration, and component architecture.
- Facilitated pair-and-team design exercises and guided students through **full-stack** topics including Angular, relational database design, event-driven programming, component architecture, and RESTful APIs. Explaining and debugging HTTP request/response lifecycles for students, reinforcing service reliability concepts.

MavenCode

July 2024 – May 2025

Software Developer Intern

Remote

- Optimized and deployed ML models (Random Forest, XGBoost, Neural Nets) end-to-end, improving prediction reliability and scalability via hyperparameter tuning and cross-validation.
- Built and maintained high-throughput data pipelines in Python/Apache Beam for embeddings, web scraping, and ML inference, with containerized execution on Google Kubernetes Engine for 40% faster processing.
- Collaborated in a multi-repo ML codebase, delivering production-ready, peer-reviewed modules and ensuring robust integration across large-scale systems.

Renaissance Computing Institute

January 2024 – May 2024

Research Software Engineer/Architect Intern

Chapel Hill, NC

- Navigated a large shared codebase, applying **Git** workflows and **CI/CD** pipelines to safely implement new functionality.
- Engineered data management features in **C# (.NET)** and **TypeScript (Angular)** for the READDI AC system, improving molecular structure search accuracy by 40% and reducing processing time by 25% for 30+ daily users.
- Developed a custom LLM using **PyTorch & scikit-learn** to tokenize and categorize datasets, reducing data processing time by 50%. Implemented an Encoder-Decoder neural network architecture for similarity matching, increasing prediction accuracy and decreasing manual entry errors by 60%.

Computer Science Experience Labs @ UNC

August 2023 - Present

Full Stack Software Engineer / XL Ambassador

Chapel Hill, NC

- Developed and implemented a room reservation and college advising system for the CSXL web app, serving 500+ weekly users with **Angular**, **TypeScript**, and **PostgreSQL**, enhancing user experience (minimizing redundant emails) and enabling efficient room bookings for students and faculty.
- Improved backend efficiency by optimizing API routes and database management with **FastAPI** and **ORM**, leveraging higher-order functions, abstraction barriers, and **Kubernetes DevContainers** to enhance scalability and maintainability.

Amazon Web Services

June 2023 – July 2023

Solutions Architect/Cloud Computing Extern

Externship

- Architected cloud infrastructure with Kubernetes, reducing deployment times by 40% for an employee directory app in collaboration with a 5-member cross-functional team.
- Designed a scalable & reliable system using AWS services (S3, EC2, VPC, IAM, ECS, EKS, ECR, API-GW, Lambda) to optimize data management efficiency, enhancing the user experience for multiple employees.

PROJECTS

Carolina Boxing (React, PostgreSQL, RestAPIs)

Spring 2023

- Designed and developed a full-stack web platform for the Carolina Boxing student organization using React, PostgreSQL, and REST APIs for member/trainer logins, event management, and payment integration.
- Working on deployment and integration with existing Squarespace infrastructure to serve **200+ active members and trainers** through a secure, modern, and scalable portal.

LEADERSHIP EXPERIENCE

National Society of Black Engineers @ UNC-CH

September 2022 – May 2024

President & Reinstater

Chapel Hill, NC

- Reinstated and scaled NSBE chapter from **5 to 40+** active members over 2 years, rebuilding infrastructure and driving campus engagement
- Led **8-member eboard**, organizing weekly events and initiatives supporting **35+** members academic/professional growth
