Data Analyst | BI Analyst | SQL | Tableau | Excel | Power BI | ETL/ELT

Professional Summary

Results-driven Data Analyst / BI Analyst with 15+ years transforming complex manufacturing, logistics, and eCommerce data into actionable insights. Expert in SQL, Tableau, Power BI, and Excel automation with a proven record of uncovering \$1M+ in savings, improving KPI visibility by 35%, and streamlining ETL/ELT pipelines across enterprise systems. Adept at aligning analytics solutions with executive decision-making to improve operational performance and reporting efficiency by up to 40%.

Education & Certifications

- M.B.A. – Supply Chain Management, Bethel University, McKenzie, TN
- M.A. – Education, Bethel University, McKenzie, TN
- B.S. – Business Administration, Bethel College, McKenzie, TN
- Lean Six Sigma Green Belt – University of San Diego
- PGP – Cloud Computing – University of Texas at Austin

Professional Experience

Business Intelligence Analyst | Blue Oval SK (BOSK) | May 2024 – Present

- Designed, developed, and deployed interactive Tableau dashboards tracking vendor performance and supply chain metrics, improving executive decision-making speed by 35%.
- Created and optimized SQL stored procedures and joins, improving report efficiency by 30% and ensuring data consistency across ERP and BI systems.
- Automated ETL and ELT pipelines using Excel Power Query and VBA, reducing manual preparation time by 25%.
- Partnered with vendors and procurement leadership to analyze pricing trends, enabling \$1M+ in cost savings through strategic negotiation backed by analytics.
- Acted as a bridge between technical data teams and business operations, ensuring dashboards aligned with leadership KPIs and vendor performance expectations.

BI / Data Analyst – PIM | Yamaha Motor Co. | Feb 2024 – May 2024

- Integrated InRiver PIM and Brandfolder DAM systems using SQL queries and Power Query pipelines to centralize product and digital asset data.
- Developed Tableau dashboards visualizing sales, marketing, and distribution performance, reducing report turnaround by 40%.

- Improved product launch timelines by 18% through automated cross-functional workflows between PIM and ERP systems.
- Delivered weekly insights to 15+ product managers, enabling faster decisions on product availability and pricing accuracy.
- Automated recurring reports using VBA macros and Power Query, improving data consistency and reducing analyst workload by 15%.

Operations Data Analyst | FedEx Express | May 2022 – Feb 2024

- Built KPI-driven dashboards for workforce performance, safety, and compliance, increasing visibility and operational efficiency by 10%.
- Automated reports for over 100 employees using Excel macros and SQL views, reducing manual reporting time by 35%.
- Served as a client-facing data partner translating analytics into operational improvements that improved on-time delivery by 8%.
- Implemented ETL workflows with Power Query to consolidate workforce, scheduling, and productivity data across multiple systems.

Data Analyst | Pitney Bowes | Nov 2019 – Aug 2021

- Designed SQL-based data pipelines integrating ERP, SAP, and TMS data sources to track logistics performance and cost efficiency.
- Built Tableau and Power BI dashboards that reduced reporting delays by 28% and provided leadership with actionable insights.
- Partnered with finance and operations leaders to uncover \$1M+ in annual savings through improved freight optimization and vendor spend tracking.

Earlier Data Analyst Roles | Syncreon, Staples | 2014 – 2019

- Developed SQL ETL workflows and Tableau dashboards supporting sales, logistics, and warehouse operations, lowering reporting errors by 30%.
- Led data validation during ERP migration ensuring 100% accuracy across systems.
- Automated Excel reporting using VBA and Power Query, improving reporting speed by 50%.
- Supported ERP-based reporting for procurement, inventory, and pricing processes.

Selected Projects

- Tableau Dashboard: Created Vendor Performance dashboard for BOSK VMI program, reducing procurement turnaround by 25%.
- SQL Analytics: Built ranking and window-function queries to track 1.2M+ transactions across multiple ERP systems.
- Excel Automation: Built Power Query & VBA workflows consolidating pricing data from 4 regional databases, cutting reporting time by 70%.

Technical Skills

Languages & Tools: SQL (MSSQL, MySQL, PostgreSQL), SSRS, SSIS, Tableau, Power BI, Python

Applications: Excel (VBA, Power Query, Macros, XLOOKUP, PivotTables), SAP, Dynamics 365, Salesforce, InRiver PIM, Brandfolder DAM

Focus Areas: Data Modeling, Data Wrangling, Data Warehousing, ETL/ELT, Forecasting, KPI Dashboarding, Statistical Analysis, Vendor Analytics, Reporting Automation
