

AJAY CHEBROLU

FULL STACK DEVELOPER

(404) 913-4422 • ajay.c@mailjobhub.com • [LinkedIn](#) • Open to Relocate

PROFESSIONAL SUMMARY

- Full Stack Developer with 3+ years delivering scalable applications using **Java, Spring Boot, Angular, React, and TypeScript**, focused on clean architecture, performance, and reliability.
- Proficient in building test-driven backend services, optimizing **API throughput**, and integrating modern databases and messaging systems to support high-availability enterprise solutions.
- Skilled in developing secure, responsive user interfaces and enhancing developer productivity through AI-assisted coding, leveraging **GitHub Copilot** and intelligent automation tools.
- Expert in **CI/CD**, containerization, and cloud deployment using **Docker, Kubernetes**, and industry DevOps platforms, ensuring consistent release quality within **Agile** and **Scrum** environments.

EXPERIENCE

PNC Financial Services

USA

Full Stack Developer

January 2025 - Present

- Architected end-to-end **Java, Spring Boot microservices** for the customer onboarding platform, reducing service response latency by 32% through optimized **Spring MVC** controllers, PostgreSQL indexing, and asynchronous **Kafka** event flows.
- Implemented secure authentication and authorization workflows using **Spring Security** and **JWT**, enabling 100% compliance with internal InfoSec standards and cutting unauthorized access attempts by 40% across high-traffic APIs.
- Developed **React.js** and **Material UI** front-end modules for payments and loan-processing dashboards, enhancing UI load performance by 28% using Redux-based state normalization and code-splitting aligned with UX guidelines.
- Orchestrated containerized deployments using **Kubernetes** and **AWS EC2**, improving application availability to 99.98% and enabling seamless blue-green releases for high-risk production rollouts.
- Optimized distributed transaction pipelines by integrating **Kafka** for real-time account-activity streaming, cutting batch-processing time from hours to minutes, and improving fraud-detection event throughput by 45%.
- Automated **CI/CD workflows** using **GitHub Actions**, introducing automated JUnit test suites and code-quality gates that reduced deployment defects by 35% and accelerated release cycles from bi-weekly to weekly.
- Enhanced developer productivity by integrating **GitHub Copilot** and **ChatGPT API** into the internal **DevOps toolchain**, cutting code-review turnaround time by 22% while maintaining strict **SDLC** and **Agile/Scrum** compliance.

Accenture

India

Jr. Full Stack Developer

July 2021 – November 2023

- Developed **Angular** and **TypeScript** front-end modules for enterprise workflow applications, improving page rendering speed by 25% through **Tailwind CSS** optimization, lazy loading, and reusable **UI component design**.
- Engineered RESTful APIs using **Spring Boot, Spring REST, and Spring Data JPA**, reducing CRUD operation latency by 30% by tuning Hibernate queries and implementing efficient repository patterns for high-volume transactional data.
- Enhanced microservice reliability by integrating **RabbitMQ** for asynchronous job processing, raising message delivery success rate to 99.9% and improving throughput for time-sensitive process automations.
- Executed **TDD** practices using **JUnit** and **Mockito**, achieving 92% code coverage and reducing defect leakage by 40% across critical modules validated through Postman-based functional testing.
- Streamlined **CI/CD pipelines** using **Jenkins** and **GitLab**, cutting deployment time by 35% via automated build triggers, **Docker** containerization, and **Azure DevOps** release orchestration.
- Maintained production-grade deployments on **Azure Kubernetes Service (AKS)** and automated routine workflows using **Azure Logic Apps**, improving system uptime to 99.95% and minimizing manual intervention in recurring operational tasks.

SKILLS

Project Management & Methodologies: SDLC, Agile, Scrum, TDD, Jira

Programming Languages: Java (8/11/17), J2EE (Servlets, JSP, EJB, JMS), SQL, PL/SQL

Front End: HTML5, Tailwind CSS, JavaScript, TypeScript, Material UI, React.js, Redux/NgRx, Angular

Backend: Spring Boot, Spring REST, Spring MVC, Spring Cloud, Spring Data JPA, Hibernate

Security & Compliance: Spring Security, OAuth2.0, JWT

Database & Message Brokers: MySQL, PostgreSQL, MongoDB, Firebase, Apache Kafka, RabbitMQ

Cloud: AWS (EC2, SQS, SNS, Code Deploy, CloudWatch), Azure (Azure DevOps, Azure Kubernetes Service, Azure Logic Apps)

CI/CD and DevOps Tools: Maven, Gradle, Git, Jenkins, Docker, Kubernetes, GitHub Actions, GitLab

Tools & Technologies: IntelliJ IDEA, Postman, Unit Testing (JUnit, Mockito), Cypress

AI & Developer Productivity: GitHub Copilot, ChatGPT API Integration, AI-Assisted Code Generation, Test Case Automation

EDUCATION

Master of Science in Cybersecurity | Lindsey Wilson College, Columbia, Kentucky

August 2025

B.Tech in Computer Science and Engineering | Vignan's Foundation for Science, Technology & Research, Guntur, India

May 2023
