SUMMARY

Global Supply Chain Manager with 5 years of experience optimizing workflows and coordinating logistics across multi-department programs. Skilled in process documentation, advanced Excel analysis, milestone tracking, and inventory management to enhance operational efficiency. Demonstrated ability to standardize procedures, coordinate cross-functional meetings and scheduling, and produce clear reports and presentations for stakeholders.

PROFESSIONAL EXPERIENCE

Kuehne + Nagel

Senior Global Health Supply Chain Manager

Mar 2021 - Aug 2025

- Delivered operational readiness and timely execution across 8 government-funded health programs valued at \$114M annually by supporting procurement planning, coordinating cross-functional teams, tracking milestones against program timelines, defining project scope, managing risks, and leveraging supply chain and operations management principles to meet program objectives.
- Managed international logistics operations and freight forwarding partnerships across global suppliers by overseeing freight forwarders, coordinating international shipments, ensuring customs compliance and import/export documentation accuracy, and optimizing inventory management and distribution to support procurement timelines.
- Utilized Infor Nexus and SAP S/4HANA to monitor end-to-end order lifecycles, validate transactional data, and provide real-time status updates to procurement, logistics, and external stakeholders, supporting timely decision-making and issue resolution.
- Improved vendor delivery performance and reduced performance exceptions by 18% by managing vendor contracts and purchase orders through Agile project management methodologies, continuously monitoring KPIs, implementing performance reviews, and driving corrective actions through structured issue management and stakeholder communication.
- Enhanced executive visibility into procurement status, inventory levels, and operational risks by developing Power BI and advanced Excel dashboards and presentations that tracked purchase order status, demand forecasts, budget variance, and risk assessments, allowing leadership to make informed planning decisions.
- Partnered with procurement teams to support sourcing initiatives, developing and managing RFx, evaluating vendor responses, and enabling data-driven supplier selection that accelerated contract decisions.
- Supported adoption of the Infor Nexus system by documenting business requirements, conducting user testing, and delivering training that improved reporting accuracy and visibility across the organization.
- Coordinated urgent, temperature-controlled shipments with end-to-end purchase order management and project coordination by conducting root cause analysis of carrier issues, applying problem-solving to resolve delays, and managing inventory levels and safety stock to prevent stockouts of critical supplies.

Global Health Supply Chain Specialist

Mar 2020 - Mar 2021

- Achieved a 21% reduction in invoice processing time by leading process standardization initiatives, mapping SOPs, identifying bottlenecks through data analysis, collaborating with finance and vendor teams to implement workflow improvements, and documenting lessons learned for future optimization.
- Managed day-to-day shipment data, ensuring purchase order accuracy and regulatory compliance, including validation of order quantities, specifications, and supplier documentation, maintaining a 99% PO data accuracy rate in information systems.
- Conducted detailed data analysis of global shipments using LMIS and Advanced Excel to track transit time variance, freight documentation accuracy, and vendor performance; developed KPI reports and presentations for in-stock rates and OTIF measures, enhancing demand forecasting and shipment reporting.
- Delivered critical COVID-19 response project for ventilators and medical equipment by conducting emergency demand planning for surge requirements, expediting purchase orders with air freight vendors, coordinating order scheduling and meeting cadences through daily standup meetings, managing exceptions, and providing real-time status updates to executive stakeholders.
- Developed standardized SOPs and workflow documentation for freight communication protocols, contract authoring, and shipment exception handling by applying process documentation and standardization techniques, streamlining processes and standardizing training materials.
- Enhanced freight documentation accuracy and regulatory compliance by managing shipment data validation for purchase orders and international documentation (Bills of Lading, Air Waybills, Shipping Instructions), conducting root cause analysis of compliance issues, and collaborating with cross-functional stakeholders to implement corrective action plans aligned with import/export requirements.

SKILLS & COMPETENCIES

- **Supply Chain Management:** Supply Chain and Operations Management, Project Management, Inbound and Outbound Logistics, Procurement planning, Demand planning, 3PL and Vendor Relationship Management, RFx Development, IDIQ Contracting, Cross Functional Stakeholder Collaboration, Client Relationship Management, Executive Communication
- **Logistics & Distribution:** International Shipping and Incoterms, Freight Audit and Payment Support, FAR Compliance, Import/Export Compliance
- **Systems & Tools:** Supply Chain Network Platform Experience (Infor Nexus, GTNexus), SAP S4HANA ERP, AI-Assisted Development Tools (VSCode, Claude), Advanced Excel, Jira, PowerBI
- **Analysis & Continuous Improvement:** Operational Dashboards and KPI Reporting, OPEX and Continuous Improvement, Process Documentation and Standardization, Analytical Skills, Data Analysis

EDUCATION

Antwerp Management School

Master's Degree, Supply Chain Management

James Madison University

Bachelor's Degree, International Business

CERTIFICATIONS

- **Enterprise Resource Planning with SAP (TERP10 on S/4HANA):** University Duisburg-Essen
- **Jira Fundamentals Certified:** Atlassian
