

# Venkata Sai Chaitanya Mediseti

## DATA ANALYST

Location: Buffalo, NY | Phone: +1 716-491-3428 | Email: [venkatasaimediseti08@gmail.com](mailto:venkatasaimediseti08@gmail.com) | [linkedin.com/in/chaitanya-mediseti](https://www.linkedin.com/in/chaitanya-mediseti)

### SUMMARY

**Data Analyst** with **3+ years** of experience specializing in transforming enterprise data into strategic assets. Expertise orchestrates **end-to-end data pipelines** using **SQL, Python, and ELT frameworks**, while engineering interactive dashboards in **Power BI and Tableau**. Proficiently applies **data modeling, statistical analysis, and machine learning** techniques to **automate reporting**, ensure governance, and deliver **scalable BI solutions** that drive efficiency and inform critical business decisions.

### TECHNICAL SKILLS

**Data Analysis & Reporting:** Data Cleaning & Validation, Exploratory Data Analysis (EDA), Descriptive & Diagnostic Analytics, Trend & Pattern Analysis, Ad-hoc Reporting, KPI Development  
**Programming & Querying:** SQL (Joins, Subqueries, CTEs, Indexing), Python (Pandas, NumPy, Matplotlib, Seaborn), R (Basics), Excel VBA  
**Business Intelligence & Visualization:** Tableau, Power BI, Looker, Advanced Excel Dashboards, Data Storytelling, Interactive Reports  
**Databases & Data Management:** MySQL, PostgreSQL, SQL Server, Data Warehousing Concepts, ETL Processes, Data Modeling  
**Statistics & Analytics:** Statistical Analysis, Hypothesis Testing, Regression Analysis, A/B Testing, Forecasting, Sampling Techniques  
**Tools & Platforms:** Microsoft Excel (Pivot Tables, Power Query, Macros), Google Sheets, Jupyter Notebook, Git/GitHub, Azure/AWS (Basic)  
**Data Governance & Quality:** Data Accuracy Checks, Data Documentation, Metadata Management, Data Privacy & Compliance

### PROFESSIONAL EXPERIENCE

**BNY Mellon**  
**Data Analyst**

**Buffalo, NY**  
**March 2025 – Present**

- Pioneered a Python ETL pipeline** to **automate** the aggregation of trade surveillance data, **reducing manual** compilation time by **15 hours weekly** for the compliance team.
- Automated** 5 key daily risk metric reports using advanced **SQL queries** and **Power BI**, eliminating 20 hours of manual effort per week and improving data accuracy for regulatory reviews.
- Developed** a suite of interactive **Tableau dashboards** for portfolio performance and **NAV calculations**, enabling analysts to generate client-ready insights 2 days faster each reporting cycle.
- Implemented** a new data validation framework that identified and rectified over **1,000 inconsistencies in securities master data**, directly strengthening the foundation for Basel III reporting.
- Collaborated** with the **Model Risk Management** team to document and validate data inputs for key risk models, ensuring adherence to strict SR 11-7 and internal governance standards.
- Streamlined** the monthly **SEC and MiFID II** regulatory reporting process by creating standardized data templates, reducing the pre-submission review period by 3 business days.

**Cipla**  
**Data Analyst**

**Bengaluru, India**  
**January 2021 – June 2023**

- Orchestrated an end-to-end supply chain data pipeline** using **SQL and Python**, optimizing **inventory levels** and **reducing excess stock** by **\$500K annually**.
- Engineered an automated ETL process** in **Python** to consolidate sales data from 12 disparate sources, **saving 15 hours per week** in manual reporting effort.
- Designed** a comprehensive **Tableau** dashboard for real-time sales performance tracking, enabling a sales team of 50 to identify and target underperforming regions.
- Spearheaded** a data quality initiative that cleaned and standardized **10,000+ patient records**, improving the accuracy of compliance and market-share reports.
- Automated** the monthly **inventory reconciliation process**, reducing manual validation time by **20 hours per month** and minimizing stock discrepancies.
- Translated complex forecasting models** into actionable insights for the **supply chain team**, directly supporting the launch strategy for **3 new pharmaceutical products**.
- Accelerated** the month-end financial closing process for the sales department by **2 days through streamlined data aggregation** and validation scripts.

### CERTIFICATIONS & PUBLICATIONS

- Data Science with Python - Coursera
- Microsoft Certified: Azure Data Fundamentals
- [Detection and Classification of Leukaemia using Artificial Intelligence](#)

### EDUCATION

**University at Buffalo**

Master of Professional Studies in Data Science

**Buffalo, NY**

August 2023 – May 2025

### PROJECTS

#### End-to-End Healthcare Cost & Utilization Analytics Platform

- Constructed** a unified data architecture integrating **EHR, claims, and operational datasets**, establishing a single source of truth that enhanced cross-departmental reporting consistency and accelerated data retrieval by 40%.
- Instituted** a predictive analytics **module utilizing machine learning (Python, scikit-learn)** to forecast patient admission rates and identify high-cost procedure drivers, directly informing strategic planning that reduced operational costs by 8% annually.
- Devised** and deployed a self-service analytics portal in **Power BI** for clinical and **administrative stakeholders**, featuring **on-demand, user-directed drill-through capabilities** that reduced ad-hoc reporting requests by **60%** and **empowered data-driven resource allocation**.
