Summary

Detail oriented and result driven Software Engineer with 14+ years of experience in designing, developing and implementing applications. Extensive knowledge of IVA and SMS applications. Proficient in a wide range of programming languages including Node.js, JavaScript, Java, Python, PHP, and more. Strong expertise in databases (Oracle, MySQL, Informix, MongoDB), cloud services (Google Cloud, Docker, Kubernetes), and CI/CD tools (Jenkins, Ansible). Experienced with Agile, Scrum, and DevOps methodologies, and adept at using a variety of IDEs, version control systems, and collaboration tools. Proven ability to lead projects and collaborate with cross-functional teams to deliver high-quality software on time.

Technical Skills

- Languages: Node.js, JavaScript, Java, Python, PHP ASP.NET, C/C++, Perl, Shell, Tcl, VB, VB.net
 - Database: Oracle, Informix, MySQL, MS SQL, PostgreSQL, MongoDB
 - Cloud Services and CICD: Google Cloud, Docker, Kubernetes, Jenkins, Ansible
 - Operating System: Windows, Linux
 - Methodologies: Agile, Scrum, DevOps, OOP
 - IDE: Eclipse, IntelliJ IDEA, Visual studio, PhpStorm, PyCharm, VS code
 - Version Control and collaboration: Git, GitHub, Gitlab, CVS, SVN, Mercurial, Perforce, Jira, Confluence, Trello, ServiceNow
 - Technology and Tools: SoapUI, Postman, Big Query, Apache Ant, Maven, Crystal Report, DB Visualizer, DBeaver, Docker, WinSCP, Jenkins, Ansible, Artifactory, WSSI, WSO2, APIGEE, HTML, VXML, CSS, XSLT, PHPUnit, Junit, JNI, Jest, CCNA, UML, JSON, XML
-

Professional Experience

Software Engineer

West Technology – Omaha, NE

Feb,2011 Present

- Developed and maintained conversational AI application including Intelligent virtual assistant (IVA), IVR system, and SMS-based interactions using natural language, dialog flow.
- Migrate legacy application to Google Cloud Platform.
- Build business module standard workflow template for banking, healthcare, pharmacy, insurance, retail.
- Involved in full Software Development Life Cycle including requirement analysis, design, coding as well as testing and deployment using CICD process
- Lead projects and collaborated with cross-functional teams to define and optimize user experiences and interfaces for virtual assistants, delivering high-quality software on time.
- Designed and developed IVA and IVR applications for major clients like Comcast, DIRECTV, AT&T, and IBM using Node.js, JavaScript, Java, Python, PHP, Google Dialog flow, and proprietary languages, while managing and supporting multiple projects simultaneously.

- Developed SOAP and REST-based web services and engineered middleware solutions for seamless communication between IVR systems and clients API
- Contributed to database design by creating optimized tables, views, stored procedures, user-defined functions, and triggers.
- Developed scripts for efficient data loading into databases and retrieving data for outbound calling systems.
- Develop reports to show metrics such as total hang ups, transfers, self-service and containment
- Created test cases and conducted unit and regression testing using JUnit, PHP Unit, xUnit and Jest to ensure software reliability.
- Developed build scripts for application promotion through CI/CD pipelines and served as a code reviewer, managing pull requests to ensure code quality and streamline workflows
- Collaborated as a key member of the design approval team, driving efficient development processes and timely deliveries.
- Provided training to new team members on advanced tools, technologies, and domain expertise to ensure seamless onboarding and knowledge transfer.
- Provided on-call support for production services.

Developer

University of Nebraska - Omaha, NE

Aug,2008 – Dec,2010

- Designed and developed web applications for bioinformatics and biologist utilizing PHP, Java, JNI and MySQL.
- Integrated simulator into the website for easy access to simulation results.
- Designed and implemented database schema to manage user roles and permission.

Software Programmer

CAS Software Development center -Kathmandu, Nepal

Jan,2007 – Jun,2008

- Analyzed user requirement and business need to design, develop and implement application solutions for health and bank system in VB, VB.net and Oracle.
- Developed and managed tables, store procedures ensuring data integrity and optimal performance.
- Utilized Crystal report to generate client specific reports.
- Involvement in providing support for the system.
- Provide technical support and training to users

Lecturer

College of Applied Business, Nepal

St. Lawrence College, Nepal

Jun,2007-Jun,2008

- Data Communication and Networking
- Database Management System
- C Programming

Education

M.S. - Management Information Systems

University of Nebraska - Omaha, NE

Dec,2010

B.E - Electronics Engineering

Kathmandu Engineering College - Kathmandu, Nepal

Feb ,2007
