SUMMARY

Business Data Analyst with 7+ years of experience transforming complex datasets into actionable insights using SQL, Python, Tableau and Power BI. Expert in requirements analysis, stakeholder collaboration, and predictive modeling. Consistently drives cost savings and operational improvements through data-driven solutions and strategic recommendations.

SKILLS

Methodologies & Frameworks: SDLC, Agile (Scrum, Kanban), Waterfall

Programming Languages: Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn, TensorFlow), SQL, R

Database: Microsoft SQL Server, PostgreSQL, MySQL

Business Analysis: Requirements Gathering, FRD/BRD Documentation, UAT Testing, Cost/Benefit analysis, Impact analysis, SWOT Analysis, GAP Analysis, User Story Mapping, Use Cases, Risk Analysis, Change Management, Business Process Modeling, JAD sessions, User interviews

Stakeholder Management: Cross-Functional Collaboration, Training Programs, End-User Support, Stakeholder Communication

Data Visualization Tools: Tableau, Power BI, Advanced Excel

Project Management and Version Control: Jira, Confluence, MS Project, SharePoint, ServiceNow, Git, GitHub

Soft Skills: Critical Thinking, Problem Solving, Attention to Detail, Strategic Planning, Analytical thinking, Team Collaboration, Leadership

EDUCATION

Master of Science in Information Technology | University of North Carolina At Charlotte, NC

December 2024

Bachelor of Technology in Computer Science | Jawaharlal Nehru Technological University, India

May 2017

PROFESSIONAL EXPERIENCE

Business Data Analyst | Mc Kesson, North Carolina

January 2025 - Current

- Led cross-functional **stakeholder sessions** documenting clinical **supply chain analytics** requirements for EHR enhancements, translating business problems into 20 **user stories** establishing analytics roadmaps saving \$150K development costs.
- Mapped end-to-end patient **supply chain workflows** using **SQL** queries and **Python** scripts identifying critical control points in intake processes, redesigned automation steps cutting processing time impacting 500+ patients.
- Partnered with data engineers coordinating **user acceptance testing** for clinical reporting tools, resolved 15 data quality issues through **predictive analytics** and **Python** ensuring zero critical defects saving \$80K rework.
- Created **Power BI dashboards** for decision support systems visualizing clinical **KPIs** and supply chain performance metrics, enabling healthcare providers optimize patient flow increasing throughput by 12% affecting 1,200+ patients monthly.
- Collaborated with medical compliance teams redesigning patient verification processes using **SQL** queries for **gap analysis** and **Python** for **data mining**, reducing manual record reviews by 25% saving 40 hours weekly.

Business Data Analyst | Vivma Software Inc, India

February 2020 - August 2023

- Identified data integrity challenges through **requirements gathering** and **GAP analysis**, implementing **SQL/Python** cleansing protocols using **Agile methodology**, increasing data reliability for regulatory reporting and **stakeholder communication**.
- Designed interactive **Tableau** dashboards following **BRD documentation** and **user story mapping**, enabling **cross-functional collaboration** with senior leadership to identify market opportunities that improved client reporting efficiency.
- Conducted **business impact analysis** on market trends using **Python Pandas/NumPy** and **statistical methods**, applying **cost/benefit analysis** that optimized investment recommendations and increased portfolio returns by 70%.
- Led **Agile Scrum** projects in **JIRA/Confluence** addressing process inefficiencies through **business process modeling** and **user interviews**, analyzing operational workflows with **hypothesis testing** techniques that reduced processing time.
- Developed **regression models** with **scikit-learn** for regulatory forecasting, conducted **risk analysis** and created business requirements documentation, presenting findings to **stakeholders** that influenced key portfolio adjustment decisions.

Business Data Analyst | Informative Web Solutions, India

July 2017 - January 2020

- Performed data quality analysis using **Python** and **SQL** queries in **MySQL**, developing standardized validation procedures that reduced data inconsistencies by 40% while improving analytical accuracy.
- Designed executive dashboards in **Tableau** focusing on core business metrics, enabling data-driven decision making that resulted in 30% faster response to market trends.
- Developed **user stories** and mockups using **Confluence** and **MS Visio** for sales dashboard features, translating business requirements into technical specifications supporting high-value prospect identification.
- Performed validation rules definition and **UAT testing** using **SQL Server** queries for guest checkout implementation, ensuring regulatory compliance while achieving 20% conversion improvement.

PROJECTS

Quarter-End Financial Reporting Mock-Up (Excel, SQL): Simulated a quarterly close using sample general ledger and trial balance data. Built journal entries, reconciliations, and reports in Excel, with Power BI visuals for readability.

Sales Summary Dashboard (Excel, Power BI): Created an Excel dashboard for daily/weekly sales using pivot tables and Power Query. Added interactive visuals in Power BI.

Survey Data Analysis (Python, Excel): Analyzed Google Form survey responses using Python (pandas, matplotlib) and Excel. Delivered insights on user satisfaction trends.
