

Jwalitha Koppula

Supply Chain Analyst

jwalithakoppula7@gmail.com | (551) 328-1691 | USA | [LinkedIn](#)

Summary

Supply Chain Analyst with over 4 years of experience optimizing procurement, logistics, and inventory operations through advanced data analytics and process automation. Proficient in Power BI, Tableau, SQL, and Python for building KPI dashboards, forecasting models, and performance analytics. Experienced in ERP systems including SAP and Oracle NetSuite for material management, demand planning, and vendor coordination. Adept at improving operational efficiency, reducing costs, and driving cross-functional collaboration by transforming complex datasets into actionable business insights aligned with organizational goals.

Technical Skills

- Supply Chain Operations:** Demand forecasting, inventory optimization, procurement strategy, and order fulfillment under cross-functional coordination.
- Data Analytics & BI:** Power BI, Tableau, and Excel dashboards for KPI tracking, trend analysis, and decision support.
- Database & Scripting:** SQL for data extraction and reporting; Python (pandas, NumPy) for automation and predictive modeling.
- ERP Systems:** SAP (MM, IBP, BO) and Oracle NetSuite for material management, purchasing, and production planning.
- Process Improvement:** Lean Six Sigma, root-cause analysis, and workflow optimization to enhance efficiency and reduce costs.
- ETL & Data Integration:** Data warehousing, SSIS, and Azure Data Factory for pipeline creation and data governance.
- Cloud & Project Tools:** AWS / Azure platforms, Agile (Scrum, Kanban), JIRA, and Git for digital supply-chain projects.
- Communication & Leadership:** Cross-team collaboration, stakeholder reporting, and data-driven storytelling for strategic decision-making.

Professional Experience

Supply Chain Analyst , Prologis

09/2024 – Present | USA

- Reduced overall supply chain costs by 15% by designing and deploying real-time Tableau dashboards that tracked inventory turnover, vendor performance, and logistics bottlenecks, enabling proactive decision-making.
- Improved demand forecasting accuracy by 25% using R-based predictive models to analyze historical data, which minimized stockouts and optimized replenishment cycles.
- Enhanced supplier reliability by 18% through data-driven vendor scorecards and revised SLAs, resulting in better delivery consistency and cost predictability.
- Automated inventory audits using Excel macros and SQL queries, eliminating manual data errors and saving 40+ work hours per month.
- Achieved 99% accuracy in demand planning by integrating real-time data streams and aligning warehouse operations with forecast-driven scheduling, reducing downtime and order delays.

ML Data Operations Analyst, Connectial Infosolutions Pvt Ltd

06/2022 – 07/2023 | India

- Increased operational efficiency by 20% through the creation of interactive Power BI dashboards, providing real-time insights into procurement, logistics, and inventory KPIs.
- Reduced project turnaround time by 25% by automating procurement and reporting workflows using SQL, Python, and R, minimizing manual interventions.
- Improved cross-functional collaboration by conducting stakeholder workshops and integrating feedback loops, resulting in 10% faster decision-making and higher process transparency.
- Lowered customer churn by 15% using predictive analytics to identify supply risks early, improving responsiveness and product availability.
- Implemented a cloud-based supply chain monitoring system (AWS, Azure), improving uptime by 40% during peak demand and supporting seamless scalability.

Supply Chain & Operations Analyst, Buff India Receptacles Pvt Ltd

06/2021 – 05/2022 | India

- Streamlined data management processes by building and maintaining over 50 ETL pipelines in SQL Server and SSIS, reducing data processing time by 30%.
- Designed and deployed 25+ Power BI and Tableau dashboards to provide real-time supply chain visibility and enhance decision-making for operations teams.
- Improved inventory accuracy by 15% through statistical forecasting models that aligned production output with actual market demand.
- Automated manual reporting workflows using SQL queries and Excel macros, saving 40+ hours monthly and improving data reliability.
- Reduced project delivery timelines by 15% by applying Agile methodologies and managing workflows through JIRA for better task tracking and accountability.
- Enhanced coordination between supply chain, logistics, and finance departments, improving workflow transparency and reducing communication delays.

Education

Master of Science in Business Analytics

09/2023 – 12/2024

Sacred Heart University, Fairfield, CT, USA

Bachelor of Commerce

09/2019 – 05/2022

Kavitha Memorial & PG College, Khammam, Telangana, India

Certifications

- Google Data Analytics Certificate-Coursera
- Microsoft SQL Server 2019-Udemy
- Python for Data Science & Machine Learning - Udemy
- Data visualization in Excel - Udemy
- Statistics for Data Science – LinkedIn Learning
