SUMMARY

Senior Data Analyst with 10+ years of experience delivering high-impact analytics and executive reporting across finance, operations, and consulting environments. Proven expertise in advanced SQL, business intelligence, and ETL workflows, with strong ownership of KPIs, data quality, and end-to-end reporting solutions. Recognized for translating complex data into actionable insights that drive business outcomes. **U.S. Green Card holder and open to relocation**

EDUCATION

Rivier University
Masters, Computer and Information Science

2024
Nashua, NH, USA

TECHNICAL SKILLS

- Data Analytics & Business Intelligence:** Advanced Data Analysis, Business Intelligence, Executive & Leadership Reporting, KPI Ownership, Trend and Variance Analysis, Root Cause Analysis, Ad Hoc Analysis, Operational and Financial Analytics
- SQL & Data Platforms:** Advanced SQL (Joins, CTEs, Window Functions, Sub queries, Query Optimization), Snowflake, SQL Server, Large-Scale Data Analysis (1M–5M+ records), Data Reconciliation, Metric Validation
- ETL & Data Engineering:** End-to-End ETL Processes, SQL-Based Transformations, Python Data Pipelines, Source-to-Target Mapping, Data Extraction, Transformation and Loading, Pipeline Monitoring
- Visualization & Reporting:** Power BI Dashboards, Tableau Dashboards, Executive Reporting, Drill-Down Analytics, Scheduled Refreshes, Excel Advanced Analytics (Pivot Tables, Power Query)
- Programming & Automation:** Python (Pandas), Reporting Automation, Data Transformation, Process Optimization
- Data Quality & Governance:** Data Quality Controls, Accuracy and Completeness Checks, Anomaly Detection, Discrepancy Resolution, Reporting Controls, Documentation
- Stakeholder Engagement:** Requirements Gathering, Cross-Functional Collaboration, Data Storytelling, Executive Communication

PROFESSIONAL EXPERIENCE

- State Street**
Senior Data Analyst

Aug 2023 - Present
MA, USA

 - Lead development of Power BI and Tableau dashboards for senior leadership, replacing manual Excel reporting and reducing turnaround time by 40%
 - Design and optimize complex SQL queries using CTEs and window functions to support high-volume reporting and analytics.
 - Analyse 5M+ row financial and operational datasets to identify trends, risks, and performance drivers
 - Own KPI validation and reconciliation across Snowflake and SQL Server, preventing inaccurate metrics from reaching leadership reports
 - Build and maintain SQL- and Python-based ETL workflows to deliver trusted, analytics-ready datasets..
 - Automate recurring data preparation and reporting using Python, reducing manual effort by 35%.
 - Implement data quality checks for completeness and freshness, lowering downstream reporting errors by 25%.
 - Communicate insights clearly to non-technical stakeholders, accelerating decision-making timelines
- Accenture**
Data Analyst

Dec 2019 - Dec 2021
India

 - Delivered SQL-driven reports and BI dashboards supporting performance tracking for multiple enterprise clients..
 - Analysed large datasets (1M+ records) to identify cost trends, efficiency gaps, and performance drivers
 - Built Power BI and Tableau dashboards tracking 20+ KPIs across regions and business units.
 - Supported ETL processes by transforming and standardizing multi-source datasets for analytics use.
 - Reduced reporting discrepancies by 30% through rigorous data validation and reconciliation.
 - Translated business questions into actionable analysis under tight client deadlines.
 - Documented metric definitions and assumptions, reducing recurring clarification requests.
- Toptal**
Data Analyst

Mar 2014 - Nov 2019
India

 - Analysed operational and usage data using SQL and Excel to support internal planning and reporting.
 - Cleaned and transformed large datasets to improve data accuracy and usability
 - Tracked core business metrics and flagged anomalies for early issue detection.
 - Validated dashboard inputs and resolved data inconsistencies, reducing recurring errors by 20%.
 - Responded to ad hoc data requests and produced executive-ready summaries.
 - Created standardized Excel reports using Pivot Tables and formulas to improve consistency.
 - Maintained reporting documentation to support knowledge transfer and continuity.
