SOFTWARE ENGINEER | BACKEND | PYTHON

PROFESSIONAL SUMMARY

Software Engineer with over 1.4 years of experience at Broadridge Financial Solutions, specializing in high-volume enterprise financial systems and backend automation. Master of Science in Cybersecurity and AWS Certified Developer with a proven track record of reducing production defects by 20% through systematic debugging and Python-based automation. Expert in Python, SQL, and batch processing optimization.

TECHNICAL SKILLS

- **Languages:** Python (Proficient), Java, SQL, COBOL.
- **Cloud & Databases:** AWS (Certified Developer – Associate), MySQL, SQL Server.
- **Tools & Frameworks:** RESTful API Concepts, Docker, Git, Jira, Postman, VS Code.
- **Competencies:** Batch Processing, OOP, Data Structures, SDLC, Agile/Scrum.

PROFESSIONAL EXPERIENCE

Broadridge Financial Solutions | Member Technical | Aug 2022 – Dec 2023

- Designed and enhanced COBOL-based backend systems for institutional stock record and margin-processing applications.
- Managed high-volume batch processing workflows, ensuring data integrity and compliance with financial business rules.
- Reduced recurring production defects around 20% via root cause analysis, legacy code refactoring, and systematic debugging.
- Developed Python automation scripts for log cleanup and batch processing, increasing operational efficiency by roughly 30%.
- Resolved critical production incidents to maintain system uptime and stability within an Agile environment.
- Partnered with business analysts to translate complex financial requirements into scalable backend logic.

PROJECTS

Student Results Portal with Facial Recognition (Python)

- Developed a Python-based authentication system using computer vision for secure facial matching and login.
- Integrated backend validation logic to provide secure, controlled access to academic results for authenticated users.
- Engineered end-to-end backend architecture, coordinating with cross-functional teams for seamless delivery.

Python Automation Suite

- Created scripts for automated data extraction and file processing, reducing manual effort for backend workflows by 40%.

EDUCATION

- **Master of Science in Cybersecurity** | Rowan University, USA | **Dec 2025**
- **Bachelor of Technology in Computer Science** | KIET-II, India | **May 2022**

CERTIFICATIONS

- AWS Certified Developer – Associate
- Python Programming Certification
- Java Developer Certification
