

Sahithi Singu

Data Analyst | +1 (334) 895-9655 | sahithisingu92@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3 years of experience delivering data analytics and reporting solutions across Finance and IT domains. Skilled in SQL for data extraction, transformation, and analysis, including joins, subqueries, CTEs, and query optimization on large relational databases. Experienced in data warehousing and ETL workflows, performing data validation, reconciliation, and source-to-target checks to ensure the accuracy and consistency of analytical datasets. Proficient in developing dashboards and standardized reports using Tableau, Power BI, and Excel to track KPIs, financial performance, and operational metrics. Collaborated with stakeholders to translate business requirements into technical solutions, supporting data-driven decision-making in Agile environments while maintaining data quality and reporting efficiency.

SKILLS

Databases & Querying: SQL Server, Oracle, MySQL, SQL, PL/SQL

Programming & Scripting: Python (Pandas, NumPy)

Data Analysis & Reporting: Data cleaning, validation, reconciliation, trend analysis, KPI tracking, ad hoc analysis

ETL & Data Warehousing: SSIS, Informatica, source-to-target mapping, data quality checks, data marts, fact & dimension tables

BI & Visualization Tools: Tableau, Power BI, Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, basic macros)

Data Modeling Concepts: Star schema, Snowflake schema, OLAP vs. OLTP

Tools & Methodologies: JIRA, Confluence, Agile/Scrum, SDLC

Operating Systems: Windows, Linux/Unix

PROFESSIONAL EXPERIENCE

Intel | Data Analyst Intern | Santa Carla, CA

Oct 2025 – Present

- Assessed 50+ financial and operational reports to identify data trends, outliers, and inconsistencies, supporting improvements in reporting accuracy by 12%.
- Assisted senior analysts in interpreting analytical outputs and preparing summaries for 5+ business and finance stakeholders.
- Monitored data quality metrics and performed routine checks across 10+ datasets, ensuring completeness, consistency, and validity.
- Helped document 15+ data definitions, business rules, and reporting logic, improving clarity and knowledge sharing across the team.
- Supported testing and validation activities for reporting deliverables, contributing to 20% reduction in post-release errors.
- Coordinated with cross-functional teams to track reporting requests and clarify requirements, ensuring on-time delivery of 10+ analytics outputs.
- Prepared presentation materials and insights for internal reviews, helping stakeholders understand key performance trends.
- Participated in 6+ Agile-Scrum sprints, contributing to sprint reviews and discussions, supporting timely analytics delivery.

IBM | Data Analyst | India

Jul 2021– Nov 2023

- Extracted, cleaned, and validated large financial datasets from SQL Server and Oracle, improving overall reporting accuracy and reliability by 12%.
- Developed and optimized complex SQL queries, stored procedures, and views for financial reporting, reducing data processing time by 20% and supporting faster decision-making.
- Maintained and enhanced data models and marts in the finance data warehouse, improving accessibility and enabling more efficient reporting and analysis.
- Built interactive dashboards and reports in Tableau and Power BI, visualizing KPIs, trends, and financial metrics for management.
- Conducted detailed data reconciliation and variance analysis, identifying and resolving discrepancies to improve data accuracy.
- Automated recurring reports, dashboards, and workflows, reducing manual effort by 15% and improving team productivity.
- Verified ETL processes in SSIS, ensuring accurate data transformation and maintaining dataset integrity.

EDUCATION & CERTIFICATION

Master's in Management Information Systems | Auburn University at Montgomery | GPA: 3.74

Dec 2025

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Certified Data Analytics (In progress)
