

Dakshanya Alokam

Data Analyst

Tampa, FL | (656) 205-1609 | dakshanya.alokam@hotmail.com | LinkedIn

SUMMARY

Data Analyst with almost 5 years of experience delivering business insights through advanced analytics and data-driven decision support. Strong expertise in SQL, Python, data modeling, and cloud platforms including AWS, Azure, and GCP. Proven ability to apply statistical analysis, machine learning, and forecasting techniques to solve complex business problems. Experienced in building executive dashboards and real-time reporting solutions using Tableau and Power BI. Hands-on experience with AI, NLP, LLM-assisted analytics, and data quality automation across large-scale datasets. Effective collaborator with cross-functional teams, translating analytical findings into actionable strategies for stakeholders.

EDUCATION

Master's in Business Analytics and Information Systems | *University of South Florida*

TECHNICAL SKILLS

Data & Analytics: SQL, Advanced Excel, Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning & Wrangling, Data Quality Management, KPI Definition, Business Intelligence, Data Storytelling

Programming & Querying: Python (pandas, NumPy, scikit-learn), R, SAS, SQL Optimization, NoSQL (MongoDB)

Statistics & Machine Learning: Statistical Analysis, Hypothesis Testing, A/B Testing, Predictive Modeling, Time Series Forecasting, Regression, Classification, Clustering, Feature Engineering, Model Evaluation

AI & Advanced Analytics: Applied AI, Machine Learning Pipelines, NLP Techniques, LLM-Assisted Analytics, Anomaly Detection, AI-Driven Data Validation, Insight Presentation, API Data Integration

Data Visualization & Reporting: Tableau, Power BI, Looker, Executive Dashboards, Real-Time Reporting

Cloud & Data Platforms: AWS (S3, EC2), Google Cloud Platform (BigQuery, Cloud Functions), Microsoft Azure (Data Factory, Data Lake, Synapse), Snowflake, Hadoop Ecosystem

Data Engineering & ETL: ETL / ELT Pipelines, Data Modeling, Data Warehousing, Batch & Streaming Processing

Collaboration & Delivery: Agile / Scrum, JIRA, Cross-Functional Collaboration, Stakeholder Management, Requirements Gathering, Client-Facing Communication, Workflow Automation

PROFESSIONAL EXPERIENCE

Data Analyst | *PNC Financials*

Aug 2025 – Present

- Optimized client reporting processes by redesigning ETL pipelines using SQL, Python, AWS, and ML-based data classification and enrichment, improving the quality and usability of reporting outputs.
- Drove revenue growth through predictive modeling and customer segmentation theory, applying R, SAS, and Excel to identify high-value customer cohorts and support data-driven upsell strategies.
- Standardized KPIs and dashboards across various projects with Power BI & Tableau, improving cross-functional visibility into key business metrics and reducing weekly meeting cycles by 30%.
- Automated data quality checks using Python, SQL, BigQuery, Cloud Functions, and AI-assisted validation techniques, significantly reducing manual validation efforts and strengthening executive-level data trust.
- Built forecasting models leveraging time series analysis theory (trend, seasonality, and autocorrelation), Python (scikit-learn), and NoSQL data stores (MongoDB), enhancing reliability of quarterly forecasts over legacy approaches.
- Collaborated with product and engineering teams using JIRA and Agile workflows, integrating NLP pipelines and LLM-assisted insight generation to support analytics prioritization and strategic outcomes.
- Presented analytical insights to C-suite executives and client stakeholders, leveraging data storytelling principles, PowerPoint, and Tableau to translate complex analyses into actionable strategic recommendations.

Data Analyst (Application Support) | *TATA Consultancy Services Limited (TCSL)*

Dec 2021-Jul 2023

- Leveraged SQL, Python, and Excel to analyze operational and service data across 10+ global regions, ensuring SLA performance insights, accurate reporting, and data-driven decision support for cross-functional stakeholders.
- Conducted Root Cause Analysis (RCA) using statistical methods and analytical tools to identify patterns in incident and performance data, reducing recurring issues and improving operational reliability.
- Built and optimized data pipelines, SQL/PL-SQL queries, and automated data workflows to troubleshoot production issues, enhance data quality, and support scalable reporting processes.
- Monitored key performance metrics and trends, applying data visualization (Power BI/Tableau) to translate complex datasets into intuitive dashboards that highlighted insights and recommended improvements.

- Automated ticket classification and escalation logic using scripting and algorithmic workflows, improving response efficiency and reducing manual handling for high-volume operational data.
- Collaborated with engineering, QA, and business teams to translate requirements into actionable analytics, dashboards, and reporting artifacts supporting data-informed decision-making.
- Designed and delivered executive dashboards and SLA performance reports, integrating operational KPIs and incident trends to improve visibility into MTTR, service delivery performance, and business impact.

Data Analyst | *Avenir Technologies*

Jul 2019 – Nov 2021

- Led enterprise-wide data consolidation across sales, operations, and finance using SQL, Python, and Snowflake, resulting in a 40% improvement in cross-functional reporting accuracy.
- Developed real-time dashboards with Tableau and Power BI, integrating machine learning-driven insights and hypothesis testing to validate demand patterns and support inventory optimization decisions.
- Implemented customer churn models using R, Python, and logistic regression, identifying at-risk segments and enabling retention strategies that decreased churn by 12%.
- Streamlined A/B testing frameworks using Python (pandas), statistical analysis, data cleaning and wrangling, increasing campaign ROI by 28% and enabling data-backed marketing decisions.
- Managed enterprise-scale datasets using SQL, Hadoop, and Azure cloud services, optimizing query performance by 60% and accelerating monthly reporting for leadership stakeholders.
- Partnered with senior leadership to define KPIs and business metrics using Excel & Power BI, driving alignment across sales and product functions with measurable performance improvements.
- Conducted training workshops on SQL, Python, and Tableau for cross-functional users, elevating analytics adoption and data literacy throughout the organization.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Google Data Analytics Professional Certificate (v2)
