PROFILE SUMMARY

Analytical and results-oriented **Data Analyst & Business Intelligence Specialist** with 3+ years of experience in **data visualization, automation, and predictive analytics**. Proficient in **Python, SQL, Power BI, and Tableau** for transforming raw datasets into strategic business insights. Skilled in **data cleaning, KPI tracking, forecasting, and statistical modeling** that enhance decision-making and operational efficiency. Proven ability to automate workflows, optimize performance, and drive ROI through data-driven solutions.

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy, Matplotlib), R, Java
- **BI Tools:** Power BI, Tableau, Looker, Alteryx, Google Analytics
- **Machine Learning:** Predictive Modeling, Forecasting, Regression, Random Forest, Feature Engineering
- **Database & Cloud:** SQL, PostgreSQL, Oracle, AWS, Azure, Databricks, ETL/ELT Pipelines
- **Project Tools:** Agile, Jira, Confluence, Kanban, Excel Macros

CERTIFICATIONS

- Diploma of Completion - [Robotic Process Automation](#)
- NPTEL - [Data Analytics with Python](#)
- NPTEL - [Cyber Security and Privacy](#)
- Johns Hopkins University - [Excel for Business Analytics](#)

EXPERIENCE

Financial Analyst (Part time) **Oct 2025 – Present**

Ruby Enterprise, New Jersey

- Designed and automated Power BI dashboards for tracking financial KPIs, improving reporting efficiency by **25%**.
- Streamlined month-end closing using SQL scripts and Excel Macros, reducing manual workload by **30%**.
- Conducted cost variance and cash flow analysis, improving forecasting accuracy by **12%**.
- Partnered with leadership to implement automation tools that enhanced data visibility and decision transparency.

Data Analytics Extern **Oct 2025 – Nov 2025**

HorizonX, Remote

- Developed AI-based lead scoring models, improving B2B conversion rates by **18%**.
- Created Tableau dashboards for marketing campaign optimization, enhancing visibility of key performance trends.
- Automated KPI standardization with SQL and Python, ensuring cross-department data consistency.

Business Analyst Intern **Apr 2025 – May 2025**

Sales Strategy

- Built interactive Tableau dashboards that reduced reporting turnaround time by **40%**.
- Leveraged Python and SQL to analyze large-scale datasets, boosting sales forecast accuracy by **15%**.
- Automated ETL pipelines and ensured data integrity across executive dashboards.

ACADEMIC PROJECTS

AI-Driven Baggage Tracking System | LAX World Airports **Apr 2025 – May 2025**

- Engineered a **data pipeline architecture** using SQL and Python to process 50K+ records, reducing baggage delay incidents by **20%**.
- Designed **real-time Power BI dashboards** integrated with Jira for instant trend detection and performance monitoring.
- Automated **data validation and reporting workflows**, cutting manual report preparation by **35%**.
- Deployed a **GenAI-assisted anomaly detection module**, accelerating error identification in luggage routing systems.
- Collaborated with airport analytics teams to translate raw data into actionable service performance insights.

Sleep Pattern Analysis (ML Project) | UC Irvine

Apr 2025 – Jun 2025

- Developed and trained **XGBoost and Bootstrap ML models** to predict stress-related outcomes with **97% accuracy**.
- Executed comprehensive **data wrangling and feature engineering** on 10,000+ records using Pandas and Scikit-learn, improving dataset quality, consistency, and reliability for advanced analytics and predictive modeling.
- Conducted **statistical testing (t-test, ANOVA)** to validate behavioural patterns across multiple demographics.
- Deployed an **interactive Streamlit dashboard** for real-time visualization of stress metrics and model predictions.
- Authored a detailed report outlining key findings and proposed interventions to reduce occupational stress indicators.

Jewelry Store Expansion Analysis | UC Irvine

Apr 2025 – Jun 2025

- Conducted **geospatial and demographic analysis** on 290+ zip codes using Python, Tableau, and ParseHub datasets.
- Used competitor mapping to identify 7+ high-profit zones, increasing **ROI by 20%**.
- Created **heatmaps and visual dashboards** in Tableau to support strategic marketing and location planning.
- Synthesized business insights into a **data-driven expansion model**, enabling evidence-based investment decisions.
- Presented recommendations to faculty and industry mentors, receiving top scores for analytical rigor.

Sign Language to Text Conversion (Deep Learning Project) | UT Dallas

Jul 2022 – Aug 2022

- Designed a **CNN** gesture recognition system with TensorFlow and OpenCV, achieving **90% accuracy**.
- Optimized **image segmentation and preprocessing techniques**, enhancing recognition speed by **28%**.
- Built a **real-time gesture-to-text interface** in Python to facilitate communication for non-verbal users.
- Integrated a **custom GUI layer** for seamless model deployment and improved user accessibility.
- Documented system architecture and performance metrics to guide future development and scaling.

LEADERSHIP & INITIATIVES

Business Analytics Section Representative | UC Irvine

Sep 2024 – Jun 2025

- **Led survey-driven data initiatives** to enhance student engagement, resulting in a **7% improvement** in participation.
- **Organized peer-led analytics sessions** on Python and Tableau, strengthening collaborative learning among 40+ students.

Event Manager | Atrium Club, Rajalakshmi Engineering College

Sep 2022 – Sep 2023

- **Directed 10+ campus events** and implemented an online registration workflow, reducing coordination time by **50%**.
- **Trained 30+ students** in public speaking and presentation techniques, boosting confidence and event quality.

Team Lead – Sponsorship & Finance | Rajalakshmi Engineering College

Jan 2023 – May 2023

- **Secured ₹1M+ in sponsorships** through strategic negotiations and corporate outreach initiatives.
- **Introduced Excel-based budget tracking tools**, increasing financial reporting transparency and accuracy by **20%**.

EDUCATION

Master of Science in Business Analytics (M.S.), CA

June 2025

The University of California, Irvine

GPA: 3.5

Relevant Coursework: Foundations of Business Analytics, Deep Learning Applications, Natural Language Processing, Customer and Social Analytics, Business Data Management, Big Data Management Systems, Foundations of Marketing, Micro Marketing, Statistics for Data Science

Bachelor of Engineering in Computer Science and Engineering (B.E.), Tamil Nadu

Nov 2020 – May 2024

Rajalakshmi Engineering College, Chennai

GPA: 3.7
