

JOSE ECAHVARRIA

[LinkedIn](#)[Tableau](#)[GitHub](#)

Hazleton, PA 18201

Skills

- **SQL** (SQL Server, MySQL, PostgreSQL)
- **Python** (Pandas, NumPy, SciPy, Matplotlib)
- **Tableau**
- **Excel** (VLookup, Conditional Formatting, Pivot Tables)
- Microsoft Power BI
- Statistical Analysis
- Data Cleaning
- Data Labeling
- Warehouse management
- Root Cause Analysis
- Compliance
- Data Visualization
- ETL
- Statistical Modeling
- Predictive Analysis

Projects

COVID-19 DASHBOARD – Personal Project – Tableau: [Dashboard](#) - [GitHub](#) April 2024

- Utilized SQL to analyze 85K+ records of global COVID-19 data, generating insights into infection, death, and vaccination trends to support public health comparisons.
- Implemented Tableau filters and drilldown functionality to allow users to explore COVID-19 trends by country, date, and metric.
- Aggregated and analyzed datasets using SQL, Tableau, and Excel to produce professional analytical reports.

NBA PLAYER PERFORMANCE ANALYTICS – Personal Project - Tableau: [Dashboard](#) - [GitHub](#) February 2020

- Developed six Tableau visualizations and an interactive dashboard to compare team and player performance across multiple seasons.
- Utilized SQL to analyze NBA player performance data, identifying trends by age, draft year, and nationality to uncover factors influencing scoring and productivity.
- Applied exploratory data analysis to identify scoring patterns among international players, generating insights relevant to scouting and recruitment strategies.

NETFLIX DATA ANALYSIS – Personal Project - [GitHub](#) January 2025

- Utilized Python to analyze content type, country distribution, and ratings, uncovering global viewing trends to support content strategy insights.
- Performed data cleaning on 5,000+ Netflix records to resolve missing values and inconsistent formats, ensuring accurate analysis of global content trends.
- Applied exploratory data analysis and visualization techniques to identify international content growth and genre diversity trends, improving insight clarity by approximately 25%.

Work Experience

INSPECTOR/PACKER – Multi-Plastic – Hazleton, PA January 2025 - April 2025

- **Consolidated and analyzed production metrics** (roll counts, defect rates, material usage) to identify data inconsistencies and quality issues across shifts.
- **Monitored usage trends and audited cross-shift logs**, reducing reporting delays by **20%** and improving data accuracy and communication.
- **Maintained validated production records** to support real-time reporting and faster supervisory decision-making.

ADMIN COACH – Staffmark – Hazleton, PA July 2021 - July 2023

- **Managed and reconciled employee and logistics data** using Excel and internal systems, improving reporting accuracy and delivery tracking.
- **Audited shipping and receiving records** to eliminate errors and duplicate entries, supporting operational efficiency and data integrity.
- **Developed standardized Excel templates and analyzed scheduling trends**, reducing form errors and improving workflow reliability.

Education

BACHELOR OF SCIENCE IN DATA ANALYTICS – Southern New Hampshire University

Expected graduation: December 2026

ASSOCIATE OF SCIENCE IN DATA ANALYTICS – Southern New Hampshire University

Graduated: December 2025
