

Akhil Doddi

Data Analyst

USA|+1(302)607-3984|Email:dakhil@myworkmails.com|[LinkedIn](#)

Professional Summary

Analytical and detail-oriented Data Analyst with 3 years of experience transforming raw data into actionable business insights across finance, healthcare, and retail domains. Proficient in SQL, Python, R, Tableau, Power BI, and AWS Redshift, with proven success designing dashboards, automating ETL pipelines, and optimizing data quality frameworks. Adept at statistical modeling, predictive analytics, and KPI reporting to support executive decision-making. Recognized for streamlining reporting cycles, improving forecast accuracy, and driving data-driven strategies in Agile enterprise environments.

Professional Experience

Data Analyst, IBM(Internship), USA

June2025– Present

- Designed and maintained end-to-end ETL pipelines using Python (Pandas, NumPy) and AWS Glue to process multi-source data from CRM, ERP, and finance systems, cutting refresh cycles from 12 hours to under 4 and increasing pipeline reliability to 99.8%.
- Developed Tableau and Power BI dashboards for executive-level performance tracking, incorporating drill-down KPIs for revenue, churn, and ROI that improved real-time business decision-making efficiency by 25%.
- Utilized SQL(PostgreSQL, Redshift) for complex joins, window functions, and stored procedures to aggregate 1TB+ datasets, improving query performance by 40% through indexing and query optimization.
- Performed predictive analytics and regression modeling in Python (Scikit-learn, Statsmodels) to forecast product demand and identify customer segments, increasing forecast accuracy by 18% and marketing ROI by 12%.
- Partnered with data architects to design AWS data lake and Athena-based query layers, ensuring standardized data schemas and reducing data duplication across cloud warehouses by 22%.
- Leveraged PySpark on Databricks to clean, transform, and join high-volume clickstream data (100M+ rows daily) for customer-journey analysis, improving funnel conversion insights and campaign targeting.
- Automated monthly KPI reporting using Power BI REST APIs and scheduling scripts, saving over 80 staff hours per month and ensuring consistency across finance, operations, and product analytics teams.
- Implemented data quality frameworks with validation, deduplication, and profiling logic in SQL and Python, reducing erroneous entries by 95% and ensuring audit-ready datasets for compliance reviews.
- Collaborated with DevOps and engineering teams to deploy serverless data pipelines using AWS Lambda, Glue, and CloudWatch, increasing scalability while reducing maintenance overhead by 30%.
- Conducted A/B testing, hypothesis testing, and variance analysis for marketing initiatives, generating actionable insights that increased conversion rates by 12% and customer retention by 9%.

Data Analyst, TCS, India

Jan2021–July2023

- Designed and implemented data warehousing solutions integrating Oracle, SQL Server, and Snowflake using Informatica and SSIS to consolidate enterprise-wide data assets, improving reporting accuracy and consistency by 35%.
- Created Power BI and Tableau dashboards for sales, operations, and financial metrics with row-level security and automated refresh schedules, reducing manual reporting time by 60% and improving executive visibility.
- Developed optimized SQL stored procedures, triggers, and materialized views for business logic automation and ad-hoc analysis, improving database efficiency and reducing average query latency by 40%.
- Applied Python – based data analytics and R script to perform exploratory data analysis(EDA), correlation studies, and trend forecasting, uncovering 20+ actionable business insights quarterly.
- Built ETL work flows with Alteryx and Talend to automate data ingestion from CRM, SAP, and Excel-based sources into Snowflake and AWS Redshift, achieving 99.9% data load success across production pipelines.
- Conducted data cleansing and standardization activities by implementing validation rules, referential integrity checks, and data normalization, ensuring near-perfect data reliability for BI consumption.
- Collaborated with finance and operations departments to deliver predictive models for cost forecasting and performance benchmarking, improving accuracy of quarterly projections by 22%.
- Integrated AWS Quick Sight and Lambda for dashboard hosting and auto-refreshing datasets, lowering infrastructure dependency and operational cost by 18%.
- Led data governance and meta data documentation efforts using Confluence and Jira, aligning data dictionaries and KPIs across 4 major departments for better enterprise data understanding.
- Partnered with QA and business teams to perform UAT testing and validation of BI dashboards, resolving data inconsistencies and improving stakeholder trust in analytics reports by 25%.

Technical Skills

- Programming & Scripting:** Python(Pandas, NumPy, Matplotlib, Seaborn), R, SQL, Shell Scripting
- Data Visualization:** Tableau, Power BI, Qlik Sense, Looker Studio(Google Data Studio)
- Databases:** MySQL, PostgreSQL, Oracle, SQL Server, MongoDB, Snowflake, AWS Redshift
- Big Data Ecosystem:** Apache Spark, Hadoop, PySpark, Hive, Databricks
- ETL & Data Integration:** Informatica, Alteryx, Talend, Airflow, SSIS
- Cloud Platforms:** AWS(S3, Lambda, Glue, Athena), Azure Data Factory, Google BigQuery
- Machine Learning & Statistics:** Regression, Clustering, Forecasting, Hypothesis Testing, Time-Series Modeling
- Data Governance & Quality:** Data Cleansing, Normalization, Deduplication, Validation, GDPR & HIPAA Compliance
- BI & Reporting Automation:** KPI Dashboards, Drill-Down Reports, Storytelling with Data, Automated Scheduling
- Version Control & Workflow:** Git, Jira, Confluence, Agile Scrum, Kanban
- APIs & Integration:** REST API, JSON, XML Data Exchange, AWS API Gateway
- Advanced Excel & Analytics:** Pivot Tables, VBA, Power Query, What-If Analysis, Scenario Modeling

Education

Masters|Wilmington university DE, USA

Aug2023-Aug2025

Bachelors|Matusri engineering college, India

July 2019-May2023
