SUMMARY

- Leveraged **SQL (PostgreSQL, MySQL, Oracle)** and **Python (pandas, NumPy, matplotlib)** to design and execute queries that improved financial reporting accuracy by 18%, enabling faster month-end close processes.
- Built interactive dashboards in **Tableau, Power BI, and Looker** to visualize revenue trends, expense ratios, and forecasting models, providing leadership teams with data-driven insights that influenced \$5M+ in budget decisions.
- Applied regression analysis, **A/B testing**, and time series forecasting in **R** and **Python** to validate investment strategies and identify market risks, improving forecast reliability for quarterly planning cycles.
- Designed and maintained ETL pipelines using **dbt, Apache Airflow, and Snowflake**, reducing manual data preparation by 35% and ensuring consistent availability of financial data for stakeholders.
- Supported cloud-based analytics by integrating **AWS Redshift, Google BigQuery, and Azure Synapse**, optimizing query performance and enabling seamless access to multi-source financial datasets.
- Developed advanced Excel-based financial models with **Pivot Tables, Macros, and VBA** automation, streamlining variance analysis and saving over 10 hours per month in recurring reporting tasks.
- Collaborated with cross-functional teams under **Agile/Scrum frameworks (Jira, Confluence)**, gathering requirements, refining KPIs, and ensuring that business needs translated into actionable financial insights.
- Partnered with finance and operations teams to implement **Oracle Cloud ERP and EPM** reporting modules, enhancing real-time visibility into P&L, cash flow, and capital expenditure tracking.
- Automated data flows and reporting tasks using **Power Automate** and **SharePoint** integrations, improving team efficiency and reducing dependency on manual report consolidation.
- Explored **AI/ML** applications in financial analysis, including early adoption of Large Language Models (ChatGPT) and prompt engineering techniques, to accelerate financial data reconciliation and automate repetitive queries.

TECHNICAL SKILLS

Programming & Querying:	SQL (PostgreSQL, MySQL, BigQuery, Oracle), Python (pandas, NumPy, matplotlib), R
Data Visualization & BI:	Tableau, Power BI, Looker, Google Data Studio, Oracle FDI
Statistical & Analytical:	A/B Testing, Hypothesis Testing, Regression Analysis, Time Series Forecasting
Data Engineering & Warehousing:	Snowflake, Redshift, BigQuery, dbt, Apache Airflow, ETL Development, Data Modeling (Star/Snowflake Schema)
Cloud Platforms:	AWS (S3, Redshift, Athena), Google Cloud (BigQuery, Data Studio), Microsoft Azure (Synapse Analytics), Oracle Cloud ERP/EPM
Excel & Automation:	Advanced Excel (Pivot Tables, VLOOKUP, Macros, VBA, Financial Modeling), Power Automate, PowerApps, SharePoint
Project Management & Collaboration:	Agile & Scrum (Jira, Confluence), Stakeholder Management, Requirements Gathering, Cross-Functional Collaboration
Emerging Technologies:	AI/ML Basics, Large Language Models (ChatGPT), Prompt Engineering, Data Automation

PROFESSIONAL EXPERIENCE

Business Data Analyst

Capital One Financial | Virginia | May 2025 - Present

- Extracted and transformed 15M+ monthly financial transactions using **SQL (PostgreSQL, Oracle)** and **Python (pandas, NumPy)**, ensuring data accuracy for quarterly compliance and reducing reconciliation errors by 20%.
- Designed and deployed interactive **Tableau** and **Power BI** dashboards that tracked \$500M+ in loan portfolio performance, providing executives with real-time visibility into delinquency, charge-offs, and recovery rates.
- Applied time series forecasting and regression modeling in **R** to project interest income and credit losses, enabling treasury teams to improve liquidity planning and optimize capital reserves.
- Automated ETL workflows with **Apache Airflow** and **dbt**, integrating multiple banking systems into Snowflake, which shortened daily reporting cycles from 8 hours to less than 3 hours.
- Optimized data warehouse modeling (Star/Snowflake schemas) in **Redshift** and **BigQuery**, ensuring audit-ready structures that supported both regulatory filings and financial planning activities.
- Leveraged **AWS S3, Athena, and Redshift Spectrum** to process large-scale credit bureau files, enabling scalable analysis while meeting **SOC2** and PCI DSS compliance standards.
- Built Excel-based forecasting and investment models (**VLOOKUP, VBA, PivotTables**) that supported \$50M+ in asset allocation decisions, improving scenario planning accuracy by 15%.
- Deployed automation with **Power Automate, PowerApps, and SharePoint** to digitize financial close workflows, cutting manual processing time by 3 business days each month.

Business Data Analyst (Intern)

Capital One Financial | Virginia | Nov 2024 – Apr 2025

- Queried and integrated 10M+ credit card transactions monthly using **SQL (MySQL, BigQuery)**, providing business leaders with granular insights into consumer spending behaviors and portfolio risk exposures.
- Developed **Looker** and **Google Data Studio** dashboards for CFO and FP&A teams, improving revenue and expense monitoring across 5 business units and replacing static Excel-based reporting.
- Designed and executed **A/B testing** on pricing and rewards programs, leveraging **R** and **Python** statistical libraries to validate results and increase customer retention by 7%.
- Built and maintained **BigQuery**- and **dbt-driven data** marts that centralized financial reporting, significantly accelerating month-end close processes for accounting teams.
- Modeled and governed **Snowflake**-based financial data structures, improving accuracy of reconciliations across ledgers and ensuring compliance with IFRS reporting standards.
- Deployed **Google Cloud BigQuery** pipelines to analyze >2TB of historical transactions, enabling strategic planning for new credit product launches across North America.
- Designed Excel forecasting and budgeting templates (**PivotTables, VBA, advanced formulas**), reducing manual preparation work by 15 hours per financial cycle.
- Streamlined expense approval and tracking workflows using **Power Automate** and **SharePoint**, increasing budget visibility for department heads by 18%.
- Collaborated with finance, compliance, and IT teams in an **Agile framework**, ensuring reporting pipelines aligned with SOX and regulatory audit requirements.

Business Data Analyst

Data Square | India | Jan 2021 – Jun 2023

- Queried large-scale **Oracle** and **MySQL** databases to prepare daily extracts for cash flow, revenue recognition, and balance sheet reconciliation, ensuring timeliness in reporting to FP&A.
- Created basic **Tableau** and **Power BI** dashboards to compare budget versus actuals across 10 departments, improving executive visibility into operating costs and performance drivers.
- Supported **regression** and **hypothesis testing** in **R** to evaluate repayment patterns on retail loans, contributing to enhancements in the institution's credit scoring models.
- Assisted in building **Python ETL** scripts that automated the ingestion of flat-file and legacy financial system data into Redshift, reducing dependency on manual uploads.
- Contributed to **Snowflake schema** modeling for account hierarchy structures, supporting consistent and audit-ready reporting across multiple financial systems.
- Leveraged Azure Synapse Analytics to consolidate regional reporting, reducing the month-end close cycle by 2 days and improving CFO visibility into global operations.
- Built **Excel pivot** dashboards with macros and formula-driven reports that streamlined expense reconciliation and reduced manual tracking by ~25%.
- Designed and maintained SharePoint-based workflows for financial document approvals, linking them to Power Automate for better compliance tracking.
- Participated in requirement-gathering workshops with finance managers and translated business needs into **SQL** queries and ad-hoc reports.
- Conducted revenue forecasting with time series models, providing finance leaders with early visibility into quarterly financial performance trends.

EDUCATION

Northwest Missouri State University | Aug 2023 - Dec 2024

Master of Science, Applied Computer science

SRK Institute of Technology, Vijayawada | Aug 2019 - May 2023

Bachelor of Technology, Computer Science and Engineering
