PROFESSIONAL SUMMARY

Analytical supply chain and materials planning professional with experience supporting clinical and commercial manufacturing in regulated environments. Strong background in SAP ECC, MRP logic, BOM management, and inventory optimization, with a proven ability to design data-driven planning solutions where system limitations exist. Adept at translating complex data into actionable insights for procurement, manufacturing, and leadership. Seeking technically focused or strategic planning roles leveraging analytics, systems thinking, and supply chain fundamentals.

PROFESSIONAL EXPERIENCE

Astrazeneca

Apr 2025 – Present

Global Materials Planner

Gaithersburg, MD

- Manage hundreds of direct BOM raw materials across multiple manufacturing sites within the Cell Therapy unit, executing procurement and planning activities in SAP ECC.
- Support **\$10M+ in raw material inventory**, balancing clinical demand variability with service, shelf-life, and cost constraints.
- Implemented **data analysis best practices** to streamline:
 - BOM creation and maintenance
 - Inventory planning logic
 - Master data requests for new ERP part numbers
- Designed and built a **semantic relational data model in Excel Power Pivot** to automate and mimic core **MRP functionality** in the absence of a deployed SAP MRP module due to project timeline constraints.
- Develop long-range clinical raw material forecasts to support **supplier capacity planning and procurement negotiations**.
- Identified and investigated **inventory discrepancies caused by ERP integration issues**, creating dashboards and tracking mechanisms to drive cycle counts and corrections.
- Collaborate cross-functionally with:
 - Manufacturing
 - Quality Assurance
 - MSAT
 - Process Development
 - Procurement
 - Finance
 - Product Planning
- Act as a key planning and analytics resource bridging operational execution with strategic supply visibility.

Becton, Dickinson and Company

Nov 2020 – Mar 2025

Senior Supply Chain Planner

Jan 2025 – Mar 2025

Production/Supply Planner

Jan 2024 – Jan 2025

Buyer

Jul 2022 – Jan 2024

Material Handler III

Nov 2020 – Jul 2022

Hunt Valley, MD

- Participated in **S&OP cycles**, translating aggregate demand plans into executable production and materials schedules.
- Planned and scheduled **300+ MTS/MTO finished goods and sub-assemblies** representing **\$30MM+ annual volume**.

- Automated **daily SAP data extractions** into dashboards and KPI reports, improving visibility across plant operations.
- Identified and corrected a critical planning error, preventing **~\$300K in materials and overhead spend risk**.
- Resolved **\$1MM+ customer backorder** by aligning production schedules with capacity constraints.
- Reduced inventory investment by **\$2MM+** through lead-time analysis, JIT purchasing, and supplier management.
- Reviewed MRP action messages daily and partnered with operations to mitigate supply risks.
- Reduced GR/IR discrepancies by **90%+** within assigned purchasing scope.
- Supported onboarding and training of junior planners and buyers.

Southwest Airlines Co.

May 2015 – Nov 2020

Ramp Agent

Baltimore, MD

- Coordinated ground operations to support aircraft turnaround and logistics execution.
- Contributed to sustained **90%+ on-time performance** through efficient load planning and execution.
- Trained new hires on safety, SOPs, and operational best practices.

EDUCATION & CERTIFICATIONS

Bachelor of Science - Supply Chain & Operations Management

Western Governors University (WGU)

Certified in Planning and Inventory Management (CPIM)

Mar 2024

Association for Supply Chain Management (ASCM / APICS)

TECHNICAL & PROFESSIONAL SKILLS

ERP & Planning Systems: SAP ECC, SAP APO, MRP logic, BOM structures, master data management

Analytics & Data: Advanced Excel, Power Pivot, Power BI, relational data modeling, forecasting, KPI dashboards

Supply Chain: Materials planning, inventory optimization, demand & supply planning, S&OP, procurement support

Methodologies: Lean, JIT, Theory of Constraints, Six Sigma, Continuous Improvement

Emerging Skills: Python (foundational), SQL (foundational), R (foundational), Tableau
