PROFESSIONAL SUMMARY

Dynamic Software Engineer with 4+ years of experience at Infosys Limited (VANGUARD), specializing in Java (8/11), Python AI/ML automation, and cloud-native architecture on AWS. Expert in designing and deploying high-performance microservices, integrating AI-driven analytics, real-time RESTful APIs, and automating business workflows for enterprise systems. Skilled in predictive modeling, NLP-enabled process automation, and advanced data engineering, enabling smarter decision-making.

WORK EXPERIENCE

Software Engineer | Infosys Limited (Client: VANGUARD) **Jan 2021 - Feb 2025**

- Developed core modules using Java 8/11, leveraging modern paradigms such as Lambdas, Streams, and the Concurrency API for efficient, parallel transaction processing and real-time operations.
- Integrated AI-powered automation into business workflows, utilizing Python-based ML microservices for risk scoring, anomaly detection, and predictive analytics on transaction data, resulting in faster exception handling and smarter decision support.
- Implemented Natural Language Processing (NLP) features to auto-classify unstructured data inputs (customer emails, tickets), elevating automation and reducing manual review effort.
- Organized the transition to a microservices ecosystem with Spring Boot, designing RESTful APIs and event-driven patterns (Apache Kafka) to achieve near real-time processing, streamlined system integration, and enhanced resilience.
- Developed deployment pipelines with Jenkins & GitHub Actions, embedding automated unit, integration, and security scans, which accelerated releases and improved code reliability.
- Established cloud-native architecture on AWS, deploying Lambda functions for serverless event processing, automating ETL routines on S3 data, and integrating with DynamoDB and RDS for scalable storage.
- Led Proof of Concepts (PoCs) to pilot AI/ML and data engineering solutions, collaborating closely with business teams to translate requirements into production-ready features and avoid technical risk.
- Implemented workflow automation using Spring, Appian, and orchestration tools, cutting down repetitive processing and significantly improving efficiency and compliance.
- Optimized enterprise reporting by building dynamic dashboards in Jasper Reports and integrating real-time data visualization tools (Power BI, AWS QuickSight) for actionable, self-serve business insights.
- Enhanced operational analytics by optimizing complex SQL Server queries, stored procedures and triggers, resulting in a 35%+ improvement in reporting and data retrieval speeds.
- Practiced Test-Driven Development (TDD) with JUnit 5, automated quality gates, and implemented comprehensive logging (Log4j/SLF4J), sharply reducing defects in production.
- Enforced secure coding and data privacy best practices, implementing OAuth2/JWT authentication, audit logging, and GDPR-compliant data flows across services.
- Collaborated in Agile teams, participating in sprint planning, code reviews, and DevOps, supporting a culture of continuous improvement and cross-functional delivery.

TECHNICAL SKILLS

Programming & Scripting	Java (8/11, Core, Concurrency, Streams), Python (AI/ML, automation), SQL
Backend & APIs	Spring Boot/MVC/Security, REST APIs (JAX-RS), Microservices, Apache Kafka, Hibernate ORM, JDBC
Frontend & Web	JavaScript (ES6+), jQuery, AJAX, HTML5, CSS3/SASS, Angular.js, XML, JSON
Cloud & DevOps	AWS (Lambda, S3, RDS, DynamoDB, API Gateway), Jenkins, GitHub Actions, Docker, Maven, Gradle, Git
Databases	SQL Server, Oracle, MySQL, MongoDB
Testing & Automation	JUnit 5, Mockito, Selenium, Jenkins, Log4j/SLF4J
AI/Analytics	Scikit-Learn, Pandas, NLP, Jasper Reports, Power BI, AWS QuickSight
Security & Methodologies	OAuth2, JWT, Agile/Scrum, TDD
Tools	Eclipse, IntelliJ IDEA, Spring Tool Suite (STS)

EDUCATION

Masters of Science in Computer Science - New Jersey Institute of Technology - Newark, New Jersey - USA
