

Ashrita Mishra

Data Analyst

Jersey City, NJ | 201-878-4326 | ashritamishra730@gmail.com

SUMMARY

Data analyst with 3+ years of experience in data analysis and data engineering, specializing in automation and optimization. Proficient in Python, R, SQL, and big data tools, including Hadoop, Spark, Databricks, cloud platforms AWS and Azure. Created dashboards in Tableau, enabling a 25% increase in data-driven decision-making across teams. Streamlined workflows in Agile teams, achieving a 20% improvement in project delivery timelines. Holds a Master of Science in Computer Science from the Pace University.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Languages: Python, Java, R, SQL

IDEs: Visual Studio Code, PyCharm, Jupyter Notebooks

Packages: NumPy, Pandas, Matplotlib, SciPy, Seaborn, Ggplot2

Visualization / ETL Tools: Tableau, Power BI, Microsoft Excel, Looker, SSIS, Informatica, Talend, Git, GitHub

Machine Learning & Deep Learning: Scikit-learn, OpenCV, TensorFlow, Keras, PyTorch, PySpark, SAS

Cloud Platforms: AWS, Azure, Snowflake

Big Data Technologies: Hadoop, MapReduce, Hive, Apache Spark, Pig, Databricks

Database: MySQL, PostgreSQL, Microsoft SQL Server

Operating System: Windows, Linux

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems, NY

May 2025

Master of Science in Computer Science

JB Institute of Engineering and Technology, India

September 2022

Bachelor of Technology in Electronics and Computer Engineering

EXPERIENCE

Citi Group, NJ | Data Analyst | January 2025 - Current

- Developed and deployed over 10 critical dashboards utilizing Power BI, resulting in a 30% increase in data visibility and a 25% boost in decision-making efficiency.
- Created and implemented 5 API endpoints to streamline data integration, resulting in a 40% reduction in system downtime and accelerated real-time data processing, significantly enhancing overall system functionality.
- Automated data extraction with multi-threaded Python scripts, which enhanced efficiency by 50% while minimizing manual tasks by 70%.
- Led the initiative for KPI reporting, providing accurate and timely performance metrics that elevated data-driven decision-making by 20% and fostered greater team accountability.
- Managed data operations in Microsoft SQL Server Management Studio (SSMS) by executing complex SQL queries.
- Orchestrated a large-scale migration project from internal servers to AWS and Digital Ocean, which elevated data accessibility by 40% and upgraded system reliability by 30%.
- Refined ETL processes, achieving a 30% boost in data accuracy and consistency across different systems, which streamlined operations and strengthened decision-making capabilities.
- Transformed Google Sheets and Looker to create interactive reports and dashboards, increasing stakeholder engagement with data by 20%.
- Implemented and deployed machine learning models with Scikit-learn and TensorFlow, achieving a 25% improvement in predictive accuracy.

Informative Web Solutions, India | Data Analyst | January 2021 - August 2023

- Collaborated with cross-functional teams in Waterfall environments, driving data solutions that improved business decision-making, resulting in a 10% increase in operational efficiency.
- Engineered and maintained automated data pipelines using Python (Pandas, NumPy) and AWS services (S3, Redshift, Glue), reducing manual reporting time by 30%.
- Designed interactive dashboards using Tableau and Power BI to visualize key performance metrics, enabling realtime sales performance tracking and leading to a 10% increase in quarterly revenue.
- Cleaned and wrangled messy datasets using Python and R (ggplot2, SciPy), ensuring high data quality and accuracy, which reduced data processing time by 25%.
- Built custom VBA macros in Microsoft Excel to automate complex reporting tasks, improving reporting accuracy and reducing manual effort by 40%.
- Created ad-hoc reports using SQL queries on MySQL databases, delivering insights that led to a 5% reduction in customer churn through personalized customer engagement initiatives.
- Collaborated with cross-functional teams, including marketing and operations, to define key business metrics, ensuring data-driven decisions aligned with overall company goals, leading to a 20% improvement in targeted marketing strategies.
- Executed comprehensive data cleaning techniques, addressing missing values and outliers, which enhanced dataset integrity by 30% and boosted overall data quality for analysis.
