PROFESSIONAL SUMMARY

Data Analyst and Data Engineer with over four years of experience using SQL, Python, and R to build reliable datasets, automate reporting, and develop Power BI and Tableau dashboards. Skilled in streamlining data pipelines and ensuring data quality to support performance tracking and operational decision-making. Versed in cross-functional collaboration across nonprofit, academic, and enterprise environments, with exposure to manufacturing and industrial reporting contexts.

WORK EXPERIENCE

Community Dreams Foundation

Sep 2025 - Present

Data Analyst

Florida, USA

- Managed core reporting datasets using SQL, Python, Excel, and data modeling best practices to ensure accurate and consistent organizational reporting.
- Built and automated Power BI, Tableau, and Microsoft Power Platform dashboards for leadership, supporting performance tracking and portfolio monitoring.
- Designed and implemented ETL pipelines to integrate data from multiple systems, improving reporting workflows and reducing manual effort.
- Performed regular data cleaning, deduplication, and validation to maintain data quality for reporting and forecasting.
- Applied data science techniques using Python and R for statistical analysis, segmentation, and basic forecasting to support outreach and planning initiatives.
- Worked closely with leadership and cross-functional teams to understand reporting needs, document solutions, and support self-service dashboards.

Kent State University

Nov 2023 - May 2025

Student Manager | Data Analyst

Kent, OH, USA

- Maintained datasets related to inventory, usage, and suppliers to support operational and KPI-driven financial reporting.
- Designed Power BI and Microsoft Power Platform dashboards to track resource utilization, cost trends, and performance metrics for leadership review.
- Developed data pipelines using SQL, Python, and R to analyze trends and support data-driven planning decisions.
- Conducted routine data cleaning and validation to ensure reporting accuracy across systems.
- Created documentation and trained staff on dashboards and standardized reporting processes to support self-service data use.

Mphasis

Dec 2021 - Aug 2023

Data Engineering | Data Analyst

Chennai, India

- Built and maintained data pipelines and reporting tables using SQL and Python to support analytics and business reporting.
- Supported large-scale data migration from Teradata to PostgreSQL and optimized queries for improved performance.
- Implemented data quality checks and automated recurring data processes to reduce manual effort.
- Used DBT and Apache Airflow to manage data transformations and scheduled workflows.
- Collaborated with analysts, data scientists, and business teams to translate reporting requirements into data solutions.
- Monitored pipelines and resolved data issues to ensure reliable and consistent reporting.

EDUCATION

Kent State University

May 2025

Master of Science, Computer Science

Kent, OH

Chadalawada Ramanamma Engineering College

Aug 2021

Bachelor of Technology, Electronics and Communication Engineering

Tirupati, India

SKILLS

- **Coding Languages:** SQL, PostgreSQL, Teradata, Python, R
- **Data Visualization:** Power BI, Tableau, Microsoft Excel
- **Data Engineering:** ETL/ELT, Data Pipelines, Data Modeling, Data Validation, Data Quality
- **Databases:** PostgreSQL, Teradata
- **Cloud Platforms:** Azure, AWS
- **Workflow Orchestration:** Apache Airflow
- **Tools:** DBT, GitHub, Visual Studio Code, Microsoft Power Platform, Data Science

PROJECTS

Sales Data Analysis & Dashboarding

- Built dashboards using R Shiny and Python to track KPIs and operational metrics.
- Prepared clean datasets and automated recurring reporting tasks to improve efficiency.

Customer Churn Prediction

- Developed churn prediction models using Python and R to support segmentation and planning.
- Automated data preparation and generated reports to communicate results to business teams.
