SUMMARY

Data Analyst with **4+ years** of experience delivering actionable insights through advanced data analysis, visualization, and reporting across healthcare, consulting, and financial domains. Expert in SQL, Power BI, Tableau, Excel (Pivot Tables, Power Query, VLOOKUP), ETL, and data warehousing to support business intelligence, KPI tracking, and decision-making. Proven ability to design interactive dashboards, automate reporting, and build scalable data pipelines while ensuring data accuracy, governance, and compliance. Strong background in statistical analysis, ad-hoc reporting, and stakeholder collaboration within Agile/SDLC environments, translating complex datasets into clear business insights that drive operational efficiency and strategic growth.

SKILLS

Databases & Querying: SQL, MySQL, SQL Server, Google BigQuery

Programming & Scripting: Python, R, VBA

Data Analysis & Statistics: Statistics, Correlations, Data Analysis, Ad-Hoc Reporting, SWOT Analysis, ETL, Data Warehouse, Data Cleaning, Data Mining

BI & Visualization Tools: Tableau, Power BI, DAX, SPSS, Smartsheet, PowerApps

Microsoft Tools: MS Excel (VLOOKUP, Power Query, Pivot Tables, Accounting Functions), MS Office, PowerPoint, MS Visio

Project & Process: SDLC, Agile, Waterfall, Scrum, Project Management

Operating Systems: Linux, Windows, Mac

Soft Skills: Communication, Stakeholder Management, Problem Solving, Critical Thinking, Attention to Detail, Time Management, Team Collaboration, Documentation, Presentation Skills

WORK EXPERIENCE

Data Analyst

| Jun 2023 – Present

Arietis Health LLC - Durham, NC

- Analyzed and managed large-scale healthcare datasets (2M+ patient records) using SQL, MySQL, and advanced Excel (VLOOKUPs, Pivot Tables, and statistical functions) to support clinical, financial, and operational reporting.
- Designed and automated ETL workflows using Power Query to extract data from multiple sources (Excel, CSV, SQL, APIs), clean, transform, and load data into structured analytical models.
- Built and maintained advanced Excel dashboards using Pivot Tables, Power Query, Power Pivot, slicers, and charts to deliver real-time business insights.
- Automated recurring reports using Power Query refresh and VBA-free automation, reducing manual effort and improving reporting accuracy.
- Designed, developed, and maintained 10+ interactive Power BI dashboards using DAX and data modeling techniques, enabling leadership and clients to monitor KPIs, trends, and performance metrics in real time.
- Built and optimized ETL workflows to extract, transform, and load data from multiple source systems into reporting layers, improving data accuracy, consistency, and accessibility.
- Partnered with operations, finance, and compliance teams to deliver standardized and ad-hoc reports that met regulatory, performance, and business requirements.
- Led provider enrollment and credentialing analytics, transitioning from Verity Enrollment Software to an internal system while ensuring data integrity, audit readiness, and workflow optimization.
- Performed data reconciliation and validation of banking and operational records, reducing reconciliation time by 30% and improving financial accuracy and reporting reliability.
- Applied statistical analysis and correlation techniques to identify trends, anomalies, and process gaps, supporting data-driven operational and strategic decision-making.
- Supported data warehouse reporting initiatives and ensured documentation aligned with SDLC and Agile methodologies.
- Created executive-ready presentations and documentation using PowerPoint, Excel, and MS Office, translating complex data into clear business insights.

Data Analyst

| Aug 2021 – Jun 2023

McKinsey & Company - Atlanta, GA

- Engineered complex SQL queries for data extraction, transformation, and loading (ETL), ensuring accurate and efficient data retrieval from various databases.
- Build and publish customized interactive reports and dashboards using Tableau, ensuring accessibility and report

scheduling for stakeholders.

- Applied advanced formulas (XLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, IF, IFS, TEXT, LEFT/RIGHT, MID) to perform complex data analysis and reconciliation.
- Developed data cleaning and normalization logic using Power Query (remove duplicates, merge queries, conditional columns, unpivot/pivot data).
- Administer and maintain databases in MSSQL Server, ensuring data integrity and security while performing regular backups and optimizations to enhance database performance.
- Automate Excel-based reporting tools, achieving a 70% reduction in manual reporting efforts and enhancing report generation efficiency.
- Worked on Data cleansing and Data staging of operational sources using ETL processes and developed data visualizations using graphs, charts, and tables to communicate findings to a lay audience
- Designed dynamic Power BI dashboards that provided actionable insights for strategic decision-making, leading to a 10% reduction in excess inventory.
- Created 5+ Excel dashboards using Pivot Tables and VLOOKUP, tracking marketing performance metrics for campaigns in regions.
- Produced ad-hoc analytical reports and SWOT analyses to support executive decision-making and strategic planning initiatives.
- Create the Business metric KPI (Key Performance Indicator) to evaluate factors for different modules

Data Analyst Intern Mega Bank, Nepal

| Dec 2018 – Feb 2019

- Assisted in data collection, data modeling, documentation, financial analysis, and industry research for loan documentation.
- loan eligibility requirements, background check, and funding business loans and personal loans.
- Worked with a loan officer to create an application profile in the system and review key information at various stages within
- the process to secure good candidates.
- Created reports and dashboards using visualization tools such as SPSS and R on large sets of data

EDUCATION

Master of Science in Business Analytics (3.82 GPA)
Grand Canyon University, Phoenix, Arizona

| Sep 2021 – Apr 2023

Bachelor in Business Administration
Excel Business College, Kathmandu, Nepal

| Sep 2015 – Sep 2019

CERTIFICATION

Certified R Programming A-Ztm R for Data Science

| Apr 2023

PROJECTS

Adventure Works Cycles Company

- Connect and transform raw data.
- Used SQL to make a sales Management project.
- Created new calculated columns and DAX measures.
- Build a relational data model.
- Design an interactive report to analyze and visualize data.

AHA Data Analysis Project

- Learned tracking intensive care unit patient status, and ways to reduce wait time for them using predictive analytics techniques.
- Find out alternative payment models and know how to maximize quality by ensuring supply chain demand.
- Learn to monitor cost, Quality, and utilization patterns using visualization tools like Tableau and Power BI.
- Management of admissions, ED visits, and staffing.
- Learn how to analyze patient volume trends and improve operational excellence.
