

Dhathri Naga Mohana

Supply Chain Analyst

TX, USA | (551) 261-3199 | dnmgmohana@gmail.com

SUMMARY

- Supply Chain Analyst with **4+ years of experience** leveraging **SQL, Python, Excel, Power BI, and Tableau** to analyze inventory, demand, and supplier performance, enabling data-driven decisions to optimize operations and reduce costs.
- Designed and executed **inventory, procurement, and logistics strategies** using **ERP systems (SAP, Oracle SCM) and TMS**, improving stock availability, order accuracy, and transportation efficiency.
- Ensured **regulatory compliance (ISO, FDA, HIPAA)** while applying **Lean and Six Sigma methodologies** to streamline processes, enhance operational efficiency, and mitigate supply chain risks.
- Collaborated with **cross-functional teams and vendors**, delivering KPI dashboards, performance reports, and process improvements to support strategic business objectives and enhance customer satisfaction.

TECHNICAL SKILLS

ERP Systems:	SAP ERP, Oracle ERP Cloud, Microsoft Dynamics 365
Data Analysis & BI Tools:	Excel (Advanced functions, VBA), Python (pandas, NumPy), SQL, Tableau, Power BI
Forecasting & Demand Planning Software:	SAP IBP, Oracle Demand Planning Cloud, Kinaxis Rapid Response, Blue Yonder (JDA), Anaplan, o9 Solutions
Statistical Analysis:	SAS, SPSS, R
Supply Chain Management:	APICS knowledge (CPIM, CSCP), Demand Sensing, Collaborative Planning, Forecasting, and Replenishment (CPFR)
Analytical Skills:	Statistical modeling, Time series analysis, Predictive analytics
Project Management & Collaboration:	Microsoft Teams, Slack, Asana, Jira, Trello, Microsoft Project
Additional Tools & Platforms:	MES (Manufacturing Execution Systems), SCM Software, TMS, WMS
Process Improvement & Automation:	Business Process Management (BPM), Robotic Process Automation (RPA)
Quality Management:	ISO 9001 Standards, Total Quality Management (TQM)
Financial & Performance Management:	Financial analysis and budgeting, KPI tracking
Lean & Six Sigma:	Lean manufacturing principles, Six Sigma (Green Belt)
Logistics & Inventory Management:	Advanced planning and scheduling (APS) systems, Inventory optimization tools

EDUCATION

Master of Science in industrial engineering

- Texas A&M, college station, TX.

Bachelor of Technology in Aeronautical Engineering

- Institute of aeronautical engineering, Hyderabad, Telangana.

CERTIFICATION

- Six sigma green belt
- ANSYS fluent
- Power BI
- SQL

WORK EXPERIENCE

Supply Chain Analyst | Home Depot, USA

May 2023 – Present

- Optimized omni-channel inventory with SQL-driven predictive analytics on POS and loyalty data, boosting forecast accuracy by 21% and reducing \$2.8M in carrying costs while improving product availability across 1,200+ retail outlets.
- Coordinated NPI supply chain by aligning assortment planning, supplier onboarding, and omni-channel fulfillment, reducing time-to-market and eliminating launch-related stockouts across seasonal retail categories.
- Managed procurement and logistics, including sourcing contracts, reverse logistics, and compliance, streamlining vendor management, cutting landed costs, and improving operational efficiency across global retail supply networks.
- Designed AI-augmented transportation optimization strategies with TMS and route simulation, cutting last-mile costs, improving SLA adherence to 97%, and reducing delivery lead times by 1.8 days across distribution channels.
- Strengthened supplier partnerships by deploying predictive KPI dashboards and scorecard frameworks, increasing OTIF (On-Time In-Full) performance by 23% and ensuring consistent supply reliability for high-turnover retail merchandise.
- Directed demand and supply planning using KPI-driven frameworks and predictive simulations, improving replenishment accuracy, reducing overstocks, and achieving high service levels during peak holiday sales seasons.
- Built advanced SQL forecasting models using machine learning clustering and regression analysis, improving store-level allocation, reducing regional out-of-stock penalties by 16%, and minimizing \$1.4M in annual overstocks.
- Automated reporting processes with Excel VBA and ERP API integration, improving SKU velocity and gross margin visibility, reducing manual reporting time, and enabling executives to access real-time business intelligence dashboards.

Supply Chain Analyst | Wipro, India

May 2020 – Jul 2022

- Coordinated inbound logistics and international shipments, 5,000+ international shipments annually, ensuring timely global order fulfillment, accurate documentation, and strict compliance with international trade regulations.
- Managed vendor relationships through contract reviews, supplier scorecard evaluations, and negotiations to secure competitive pricing, strengthen sourcing efficiency, and mitigate procurement risks.
- Performed purchasing and cost analysis across multi-million-dollar operations, warehousing, retail events, and capital projects, reducing supply chain expenses by \$2.1M annually through sourcing optimization and cost-control strategies.
- Led Lean 6 Sigma initiatives in inventory optimization, applying analytical methods and process improvement strategies to streamline procurement workflows and enhance operational efficiency.
- Supervised demand planning and replenishment schedules, ensuring consistent product availability, accurate planning, and fulfillment of strict customer service-level agreements.
- Improved inventory accuracy to 93% by implementing standardized cycle count procedures, variance reporting, and automated Excel-based inventory tracking systems.
- Designed and deployed advanced forecasting models, reducing stockouts by 12% while improving production planning efficiency and on-time delivery performance.
- Facilitated requirement-gathering workshops with cross-functional teams to identify business needs, document objectives, and resolve process gaps during system implementation.
- Directed daily warehouse, distribution, and inventory management activities, overseeing \$50M+ in stock value, while ensuring compliance with KPIs and safety standards.
- Partnered with procurement teams to streamline sourcing workflows, vendor onboarding, and material allocation, ensuring timely supply for production and projects.
- Reviewed historical usage trends and service-level metrics, providing monthly recommendations to optimize replenishment policies and purchasing strategies.
- Applied statistical forecasting models, demand analysis, and predictive analytics to deliver accurate supply chain projections and support executive decision-making.
