SUMMARY

Software Quality Assurance professional with 6 years of experience in Manual black and white box Software Testing, API validation, and backend data verification for Web-based and Mobile applications. The last few years of my career I've spent working in the payment industry. I tested payment applications for a variety of payment terminals (Linux and Android based POS) along with a cloud-based payment processing platform (PayiQ).

TECHNICAL SKILLS

- **RDBMS:** Azure Cosmos DB, MySQL
- **Operating Systems:** Windows, Linux, Android, macOS
- **Tools:** Microsoft Office, Azure DevOps, Azure Application Insights, Postman, MobaXterm, PayDroid Tool, Pax Automation Tool, Appium
- **Bug Tracking:** Azure DevOps, JIRA
- **SOFT SKILLS:** Critical thinking and problem-solving, Attention to detail, Quick learner, Excellent communication and teamwork skills, Being able to collaborate effectively with developers, project managers, and other team members, Ability to prioritize tasks and meet deadlines in a constantly changing environment

WORK EXPERIENCE

PayiQ (Division of Quisitive)

Oct 2022 - May 2024

Software Quality Assurance Analyst

Dallas, TX

- Analyzed product requirements and acceptance criteria from user stories to develop test cases and expected test results, ensuring comprehensive manual testing coverage.
- Developed and executed test plans for multiple sprints, incorporating scenarios for backend data validation and API testing.
- Performed functional, negative, positive, regression, smoke, integration, end-to-end, and GUI testing, including API validation using Postman to verify request/response accuracy.
- Queried within Azure CosmosDB to validate transaction request and response codes, as well as clearing and settlement blocks for MasterCard and Visa, aligning with backend testing practices.
- Examined transaction messages (auth request/response, reversal request/response, etc.) and logs in Azure Application Insights to ensure data integrity.
- Reviewed mapping documents to test Settlement and Clearing files for MasterCard and VISA, supporting accurate data transformation and validation.
- Participated in VISA certification testing with a VISA brand representative, contributing to compliance and quality assurance deliverables.
- Collaborated in daily stand-ups, sprint planning, refinement, demo, and bug refinement meetings, aligning testing strategies with project requirements.
- Conducted bug refinement sessions and worked closely with product owners and developers to identify and address missed scenarios.
- Created a QA workflow "Sign off" document to formally finalize sprints.

PAX Technology

Feb 2021 - Sep 2022

Quality Analyst

Jacksonville, FL

- Reviewed business and functional requirements along with design documents to ensure accurate test coverage.
- Developed detailed test cases and expected results from functional requirements to validate system integrity.
- Performed functional, negative, positive, regression, smoke, end-to-end, and user acceptance testing, contributing to high-quality software releases.
- Addressed QA tasks arising from customer-reported issues, focusing on troubleshooting.
- Utilized the proprietary Pax Automation Tool to create scripts for automating regression testing and full UAT, thereby enhancing overall testing efficiency.
- Provided training on the Pax Automation Tool to enable team members to create and manage their own automation scripts.
- Investigated transaction host messages using MobaXterm and analyzed application logs to support backend testing initiatives.

InfomatrixGlobal Inc.

Jul 2018 - Jan 2021

Software QA Analyst

Denver, CO

- Analyzed product requirements and designed test cases based on user stories, ensuring comprehensive coverage and improved software reliability
- Participated in daily Stand-up, Backlog Grooming, Sprint Planning Meeting, Demo, and Retro meetings, ensuring alignment with project-related artifacts like User Stories and Defects/Bugs, which enhanced team collaboration and project efficiency
- Analyzed Business and Functional Requirements and Design Documents, contributing to accurate test planning and execution
- Performed Functional, Negative, Positive, Integration, Regression, Database, End to End, and User Acceptance Testing, ensuring high-quality software delivery and user satisfaction

- Developed test cases and expected test results from Functional Requirement Specifications, facilitating effective implementation through the testing process and enhancing test accuracy
- Participated in walk-through inspections with project managers, business analysts, QA leads, and developers at various stages of the development life cycle, providing valuable inputs that improved requirement document accuracy and project outcomes

EDUCATION

Portnov Computer School

2018

Software Quality Assurance

Modern Academy for the Humanities

2006 - 2011

BS, Psychology
