

Data Analyst

Syed Abdul Qayyum Hamza

NY | (475) 308-7938 | syedhamza0599@gmail.com

SUMMARY

- Data Analyst with 3+ years of experience across banking and healthcare domains, skilled in transforming raw data into business insights.
- Proficient in SQL, Python, Tableau, Power BI, and data modeling with hands-on experience in Azure and AWS cloud ecosystems.
- Strong expertise in developing ETL pipelines, automating workflows, and designing analytical dashboards that support data-driven decision-making.
- Adept at statistical analysis, forecasting, and translating complex data trends into actionable recommendations.
- Experienced in applying data governance, quality management, and compliance standards to ensure accuracy and consistency across enterprise datasets.
- Experienced in collaborating across cross-functional teams and stakeholders to design and deliver analytics solutions aligned with strategic priorities.

SKILLS

Languages & Tools:	Python (pandas, NumPy, matplotlib, scikit-learn), SQL, R
Visualization:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Macros)
Databases:	SQL Server, PostgreSQL, MySQL, Snowflake, Redshift
Cloud & ETL:	Azure (Data Factory, Synapse, Data Lake), AWS (Glue, Lambda, S3), Alteryx
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ
Version Control:	Git, GitHub, JIRA
Methodologies:	Agile, SDLC
Other Skills:	SSIS, SSRS, SAS, Machine Learning Algorithms, Predictive Analytics, A/B Testing, Azure DevOps (ADO), Hadoop, MapReduce, Alteryx, Probability distributions, ANOVA, MS Office Suite.
Soft Skills:	Time Management, Leadership, Problem-Solving, Decision-Making, Documentation and Presentation, Analytical Thinking, Attention to Detail, Communication

EXPERIENCE

Data Analyst | Capital One Financial Services | New York, NY

Nov 2024 – Present

- Orchestrated end-to-end data workflows in Azure Data Factory, integrating multiple financial data sources into a centralized reporting structure.
- Created Power BI and Tableau dashboards to track loan performance, delinquency, and credit utilization trends for senior management.
- Developed Python scripts using pandas and PySpark for automated reconciliation and validation of transaction-level data across data marts.
- Designed forecasting models using time-series techniques such as moving averages and ARIMA to assess credit risk exposure and detect potential loan defaults.
- Collaborated with business stakeholders to define KPIs and metrics for performance and compliance reporting.
- Migrated legacy Excel reports to Power BI, reducing turnaround time by 35% and ensuring better governance through centralized, standardized reporting.
- Optimized SQL queries and ADF pipelines to enhance processing speed and system reliability.

Healthcare Data Analyst | Accenture, India

Aug 2019 - Nov 2021

- Developed ETL pipelines using AWS Glue and SQL Server to consolidate 5M+ EHR and claim records from EHR systems and other data sources.
- Built Power BI dashboards to monitor patient outcomes, provider efficiency, and cost-of-care trends, supporting data-driven decisions in healthcare operations.
- Implemented Python-based data cleaning and transformation scripts to improve data quality and integrity.
- Conducted EDA and regression analysis to identify high-cost treatment areas and key factors driving readmissions.
- Designed predictive models using scikit-learn to assist in clinical resource planning and preventive care strategies.
- Collaborated with healthcare analysts to define reporting standards and KPIs for executive-level dashboards.
- Established data governance and compliance frameworks ensuring audit readiness and consistent reporting practices.
- Documented ETL workflows, data dictionaries, and standard procedures for analytics maintenance and knowledge transfer.

EDUCATION

- **Master's in Data Science & AI**
Campbellsville University, Campbellsville, Kentucky, USA
- **Bachelor of Science (Civil Engineering)**
Osmania University (India)

Jul 2022 – May 2024

Aug 2016 – Aug 2020
