

Hemanth Korrapati | Data Analyst

Jersey City, NJ, USA | +1 (484)-364-8334 | hemanthkorrapati363@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst with **3+ years of experience** using SQL, Python, Power BI, Tableau and AWS to deliver business-critical insights across finance and healthcare. Automated reporting processes, optimized ETL pipelines and conducted large-scale data analysis to improve decision-making and reduce operational costs. Fraud detection, A/B testing and real-time dashboard development. Strong technical and business teams, with a focus on accuracy, speed and delivering measurable impact through data.

EDUCATION

New Jersey Institute of Technology, Newark, NJ Masters in Data Science	Sep 2023 - Dec 2024
University of Derby, Derby, UK Bachelors in Cyber Security	Aug 2018 - May 2021

CERTIFICATION

Deloitte Australia - Data Analytics Job Simulation Server | Microsoft Power BI Data Analytics - Associate

PROFESSIONAL EXPERIENCE

Capital One, USA Data Analyst Key Tools: Python, SQL (T-SQL, PostgreSQL), Power BI, Tableau, AWS Glue, Airflow, Excel - Automated recurring reports using Python and SQL, reducing manual work by 60%, cutting reporting errors and saving 20+ analyst hours monthly across credit, risk and product teams. - Analyzed 3M+ customer records via A/B testing and regression models, improving segmentation logic and increasing financial product campaign conversion rates by 14% across targeted user groups. - Replaced Excel tracking with Power BI dashboards using DAX, giving 25+ business users real-time access to KPIs and cutting report turnaround time from 4 days to under 6 hours. - Developed ETL jobs in AWS Glue and Airflow to cleanse and transform raw transactional data, increasing pipeline success rate by 35% and reducing data staleness in daily loads. - Detected \$1.2M in potential fraud by writing SQL queries and Python rules to flag transaction anomalies, leading to early intervention and faster escalation by risk investigation teams. - Converted fragmented financial data into structured reporting tables using SQL and Python, enabling faster queries and reducing ad-hoc data requests from business teams by 40% monthly.	Aug 2024 - Current
Cloud Odyssey IT Solutions Ltd, London, UK Associate Data Analyst Key Tools: SQL (MySQL, PostgreSQL), Python, Tableau, Power BI, Excel, Google Data Studio - Reduced total healthcare cost by 12% for 50,000+ members by analyzing EHR and claims data, identifying avoidable spend patterns and delivering actionable cost-saving insights to client teams. - Lowered patient readmission rates by 8% by creating Tableau dashboards that visualized outcome variations, helping care teams intervene earlier with chronic condition management strategies. - Wrote Python validation scripts that reduced data quality issues by 40%, catching schema mismatches and duplicate records before data entered downstream patient reporting environments. - Conducted regression and trend analysis on chronic illness cases, identifying gaps in care delivery and supporting treatment changes across 10+ enterprise health clients. - Maintained 100% audit readiness by standardizing HIPAA-compliant data audit workflows, enabling smooth internal reviews and external compliance checks during sensitive healthcare project deliveries. - Increased cross-team reporting consistency by 30% during EHR integration by rewriting SQL logic and aligning dashboard structures between UK-based analysts and Indian offshore delivery teams.	Jun 2021 - Jun 2023

TECHNICAL SKILLS

Data Analysis & Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R, SQL (MySQL, T-SQL, PostgreSQL), Excel (VBA)
Statistical Methods: Descriptive & Inferential Stats, A/B Testing, Hypothesis Testing, Regression, Time Series Forecasting
Data Visualization & BI: Power BI (DAX, Power Query), Tableau / Tableau Cloud, Excel (Pivot Tables, Charts), Google Data Studio
ETL & Automation: Python ETL Scripts, SQL Procedures, AWS Glue, Azure Data Factory, Apache Airflow, AWS Lambda, Cron Jobs
Cloud & Data Warehousing: AWS (S3, Glue, Lambda, SageMaker), Microsoft Azure, GCP (BigQuery), Snowflake, Redshift
Databases & Data Quality: SQL Server, MySQL, PostgreSQL, MongoDB (basic), Data Cleansing, Validation, Normalization, Auditing
Version Control & DevOps: Git, GitHub, JIRA, Confluence, Agile, Scrum
Soft Skills: Business Acumen, Stakeholder Communication, Insight Presentation, Team Collaboration

PROJECTS

Retail Sales Forecasting and Inventory Optimization Tech Stack: Python, SQL, Tableau Cloud, AWS SageMaker	2023 - 2024
- Built demand forecasting models in AWS SageMaker using historical sales data, reducing stockouts by 25% and improving inventory turnover by 35% across key product categories. - Queried and cleaned retail data using SQL and Python (Pandas, NumPy), resolving data discrepancies and increasing forecasting model accuracy by over 20%.
