

Hemantha Parisa

Data Analyst

Pittsburgh, PA | 301-750-3645 | Hemanthaparisa@outlook.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience delivering **data-driven insights, dashboards, and advanced analytics** across enterprise technology, operations, and healthcare domains. Strong expertise in **SQL, advanced data analysis, BI reporting, and data visualization**, to support decision-making. Proven ability to work with **cloud-based data platforms (Azure and AWS), ETL pipelines and large-scale datasets**. Skilled in translating complex analytical results into **clear, actionable insights** for non-technical stakeholders, driving **measurable business impact**.

TECHNICAL SKILLS

Data Analysis & Business Intelligence: Data Analysis, Data Analytics, Business Intelligence (BI), KPI Tracking & Monitoring, Executive Reporting, Ad-hoc Reporting, Self-Service Analytics, Dashboard Development, Data Storytelling, Metrics & KPIs

SQL & Databases: SQL, Advanced SQL (Joins, CTEs, Subqueries, Window Functions), Data Modeling, Relational Databases, PostgreSQL, MySQL, MongoDB, Cassandra

Data Visualization & Reporting Tools: Power BI (DAX, Power Query), Tableau (Calculated Fields, LOD Expressions), Looker / LookML, Qlik Sense

AI & GenAI: OpenAI API, LangChain, LLM Integration, Prompt Engineering, AI-driven Automation, Document Intelligence

Statistics & Analytical Methods: Statistical Analysis, Hypothesis Testing, A/B Testing, Time Series Analysis, Forecasting, Regression Analysis

Programming & Analytics Tools: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R (exposure), SAS (exposure), Automation Scripts

Cloud Data & Analytics Platforms: **Microsoft Azure:** Azure SQL, Azure Cosmos DB, Azure Data Factory (ADF), Azure Event Hub, Azure Service Bus, Azure Monitor, Application Insights, Azure Cognitive Services

Amazon Web Services (AWS): S3, EC2, Lambda, CloudWatch, SageMaker, Redshift (exposure)

Data Engineering & Governance: ETL / ELT Pipelines, Data Cleaning & Transformation, Data Validation, Data Reconciliation, Data Quality Checks, Data Governance

PROFESSIONAL EXPERIENCE

Data Analyst | Qualcomm, PA, USA Jul 2025 - Current

- Analyzed **300K+ daily enterprise transactions** using **advanced SQL (joins, CTEs, subqueries, window functions)** and **relational databases**, delivering **operational, financial, and performance insights** for **8+ cross-functional business teams**.
- Designed **analytics-ready data models** and **ad-hoc reporting datasets** on **Azure SQL and Azure Cosmos DB**, supporting **self-service analytics, executive reporting, and KPI monitoring**.
- Built and maintained **Power BI dashboards** using **DAX and Power Query**, tracking **SLA compliance, throughput, latency, operational KPIs, and metrics**, enabling **real-time decision support analytics**.
- Developed **predictive analytics and machine learning models** (regression, classification) using **Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn)** to identify **performance bottlenecks, anomalies, and trends**.
- Implemented and optimized **ETL / ELT pipelines** using **Azure Data Factory**, handling **data cleaning, transformation, validation, reconciliation, and quality checks** for large-scale operational datasets.
- Integrated **AI-driven document analytics** with **Azure Cognitive Services**, improving **data extraction accuracy** and reducing **manual processing and workflow effort** through automation.
- Improved **data governance, observability, and reliability** using **Azure Monitor and Application Insights**, reducing incident resolution time and increasing trust in **BI and reporting outputs**.
- Collaborated with **technical and non-technical stakeholders**, gathering requirements, defining KPIs, presenting insights, and driving **process improvement and continuous improvement initiatives**.

Data Analyst / BI Engineer | HCL Tech | India Sep 2022 – Jul 2023

- Developed **SQL-based analytics, dashboards, and BI reports** for **order processing, asset tracking, and operational analytics**, supporting leadership decision-making.
- Designed and automated **ETL workflows on AWS (S3, Lambda, CloudWatch)** for scalable **data ingestion, transformation, and automation scripts**.
- Built **Tableau and Power BI dashboards** with **calculated fields, LODs, DAX**, enabling **KPI tracking, backlog monitoring, utilization analysis, and executive reporting**.
- Performed **data quality checks, validation, reconciliation, and testing**, improving **accuracy, consistency, and reliability** of enterprise reporting.
- Used **Python analytics scripts** to automate **recurring reports and ad-hoc analysis**, reducing manual effort and improving turnaround time.
- Worked closely with stakeholders on **requirements gathering, documentation, KPI definitions, and reporting standards**, ensuring **alignment across business teams**.
- Supported **version control (Git)**, documentation, and validation processes, maintaining clean and auditable analytics workflows.

Data Analyst (Product & Operations Analytics) | Hexaware Technologies | India Feb 2021 – Aug 2022

- Delivered **product, customer, and operational analytics** for a large-scale **e-commerce platform**, analyzing **order volume, revenue, fulfillment performance, returns, inventory, and market trends**.

- Built **interactive Tableau dashboards** for **data storytelling**, providing real-time visibility into **KPIs, metrics, and operational efficiency** for product and operations teams.
- Wrote **advanced SQL queries** on **PostgreSQL and MySQL** to support **high-volume reporting**, including peak sales and time-sensitive business events.
- Leveraged **AWS services (S3, EC2, Lambda)** for **data preparation, automation, and analytics processing** on large datasets.
- Conducted **root cause analysis** on order delays and system issues using **statistical analysis and trend analysis**, driving **data-backed process improvements**.
- Partnered with **product managers, operations, and business stakeholders** to deliver **actionable insights**, improving **customer experience, efficiency, and ROI**.

EDUCATION

Robert Morris University, Pittsburgh, PA	Aug 2023 – May 2025
Master of Science in Data Analytics	GPA: 3.90
Bapatla Engineering College, Bapatla, India	Jul 2018 – May 2022
Bachelor of Technology in Electronics and Communication Engineering	CGPA: 7.48

PROJECTS

AI-Driven Document Analytics

- Developed an **AI-based document analytics solution** using **OpenAI API and LangChain** to extract and structure data from unstructured documents.
- Implemented **data validation and reconciliation** pipelines to improve accuracy and reporting reliability.
- Created **Tableau dashboards** to track automation efficiency and error reduction.

Customer & Product Analytics Dashboard (E-Commerce)

- Performed **customer, revenue, and order analytics** using **advanced SQL (CTEs, window functions)** on transactional datasets.
- Built **Tableau dashboards** with calculated fields and LOD expressions for KPI tracking and data storytelling.
- Conducted **trend and root cause analysis** to identify drivers of returns and order delays.

Healthcare KPI & Time Series Analytics

- Analyzed healthcare KPIs and patient trends using **Python and Excel**, applying **time series analysis and forecasting** techniques.
- Built interactive **Tableau dashboards** to present insights to non-technical stakeholders.
