PROFESSIONAL EXPERIENCE

Business Systems Analyst III for Charter Communications Charlotte, NC | September 2023

- Design, construct, and implement data reporting standards and validation for the Internal Audit Compliance team.
- Employ Visual Basics for Applications in Excel to increase speed and accuracy when developing reports.
- Work closely with teammates to improve data processes and increase accuracy on deliverables to stakeholders.
- Utilize Python to streamline validation by gathering reports and creating outreach emails.
- Cultivate working relationships with Information Technology developers to maximize understanding of their workflow.
- Conduct weekly data presentations on the Vulnerability Management project and other Key Performance Indicators to senior leadership.
- Partnering with leadership to create and execute the Transport Layer Security Remediation project, streamlining the process from identification to remediation of vulnerabilities.
- Execute and maintain weekly tracking dashboards using pivot tables for device vulnerabilities.
- Collaborate with colleagues on establishing quality metrics for data submission.

Data Analyst II for NC Department of Health and Human Services Raleigh, NC |

Feb 2021- Sep 2023

- Crafted a new Annual Adolescent Assessment using Excel and Tableau Prep to concatenate different immunization datasets and created visuals in Tableau to support the local outreach.
- Cleaned, analyzed, and reported data, creating new Tableau dashboards to highlight state and county standing with current vaccination trends.
- Trained colleagues on how to navigate new Tableau Dashboards and how to present them to third-party clients.
- Successfully transitioned dashboards from Tableau to Power BI
- Assisted colleagues with the collection and presentation of vaccination data for North Carolina.
- Implemented the Local Health Department Assessment to improve the overall coverage of immunizations at the county and local health department level.
- Presented findings to management prior to dispersing data reports for public outreach.

Data Analyst for Travel and Transport New York, NY | May 2019 – July 2020

- Managed and updated multiple Tableau dashboards to identify trends and support decision making for travel expenditures.
- Wrote structured query language queries to pull data into Excel.
- Collaborated with colleagues to develop a best practices procedure to ensure data integrity.
- Streamlined a vital database search in Excel by developing a cleaning process to match over 20,000 addresses to multiple databases.
- Developed reports in Tableau using Tableau Prep, detailing the location of over 1,000 hotels and their total spend throughout the previous fiscal year.
- Revised macros in Excel for the Hotel Decision Model, aiding corporate clients in their selection of hotel requests for proposals.
- Coordinated with travel agents to ensure the effectiveness of the requested deliverables.

Actuary Summer Intern for Beazley Insurance New York, NY | May - August 2018

- Collaborated with the Pricing Actuary to develop insurance premiums for a data breach by converting \$30,000,000 in revenue units to the number of participants.
- Developed a new dataset displaying revenue from each state based on different premiums.
- Identified inconsistencies and edited SQL queries within the company's proprietary database, resulting in increased reliability of the pulled data
