

KEERTHI REDDY GAVINOLLA

Data Analyst

Roseville, CA, USA | +1 (209) 313-8865 | gavinollakeerthireddy@gmail.com | [Linkedin](#)

SUMMARY

- Data Analyst with **around 3 years of experience** across enterprise IT and marketing analytics, proficient in building **SQL pipelines, API integrations, and data transformation workflows** to process millions of records for global clients.
- Skilled in **Python, Scikit-learn, BERT, and NLP** for machine learning tasks such as **churn prediction, sentiment analysis, and hardware failure detection**, delivering measurable improvements in retention and product reliability.
- Designed and deployed **dashboards in Tableau, Streamlit, and Excel**, presenting insights that influenced leadership decisions, including **\$2.4M annual ad spend optimization** and warranty cost reductions.
- Applied **statistical analysis, predictive modeling, and simulation with MATLAB and Python** to improve system reliability, forecast failures, and reduce downtime by **12+ hours per cycle** in test environments.
- Strong collaborator with cross-functional teams, mentoring junior analysts, and aligning analytics with product and marketing strategies; holds a **Master's in Computer Science** from the University of the Pacific.

PROFESSIONAL EXPERIENCE

Data Analyst | Epsilon | USA

Feb 2025 – Present

- Constructed **SQL pipelines** consolidating **18M+ digital engagement records** across CRM and ad platforms, enabling near real-time campaign performance tracking and improving reporting cycles by **36 hours monthly**.
- Designed predictive models in **Python** using **Scikit-learn** and **statistical analysis** to forecast customer churn, providing insights that influenced retention strategies for 4 subscription-based product lines.
- Presented marketing KPIs in **Tableau** and **Streamlit dashboards**, delivering insights to cross-functional teams that optimized ad spend allocation by **\$2.4M annually**.
- Leveraged **NLP** with **BERT** on **1.5M+ customer reviews**, surfacing sentiment drivers that guided product managers in redesigning 3 features, directly impacting customer satisfaction scores across U.S. clients.

Data Analyst | Dell Technologies | India

Nov 2020 – Dec 2022

- Engineered **SQL pipelines** to consolidate **12M+ customer support records** across multiple systems, ensuring reliable data integration that improved service response analysis for 5 global teams.
- Developed **Python** models with **Scikit-learn** and **statistical analysis** to identify hardware failure patterns, reducing diagnostic turnaround by **18 hours per incident** for enterprise clients.
- Visualized operational KPIs in **Tableau** and **Streamlit** dashboards, presenting insights on 4 product lines to senior managers and guiding decisions that optimized warranty costs by **\$1.2M annually**.
- Optimized **MATLAB** simulations of system workloads, uncovering performance bottlenecks in high-volume deployments and enabling IT teams to cut downtime by **10 hours per quarter**.
- Implemented **NLP pipelines** with **BERT** to process **750K+ customer feedback entries**, surfacing recurring issues that directly influenced product enhancements in 3 Dell software releases.
- Collaborated with cross-functional engineers and product managers, translating analytics into actionable requirements, while mentoring 2 junior analysts on **SQL** query design and **API** data extraction best practices.

TECHNICAL SKILLS

- **Programming & Scripting:** Python, C, C++, JavaScript, MATLAB, HTML/CSS
- **Data Analysis & Machine Learning:** Scikit-learn, BERT, NLP, Data Modeling, Statistical Analysis
- **Data Visualization & Reporting:** Streamlit, Excel (Pivot Tables, Charts), Tableau, Power
- **Databases & Data Management:** SQL (queries, joins, aggregations), API Development, Data Cleaning, Data Transformation
- **Tools & Platforms:** Git, WordPress, Unity, Simulink, Axure
- **Core Concepts:** Multithreading, Virtual Memory, Simulation, Data Pipelines, Model Deployment

EDUCATION

University of the Pacific | USA

Jan 2023 – Dec 2024

Master's in Computer Science

Methodist College | India

Aug 2018 – Jun 2022

Bachelor's in Electronics and Electrical Engineering

PROJECTS

Customer Review Sentiment Analysis | Python, Scikit-learn, BERT, NLP, Streamlit

- Built an **NLP pipeline** using Python, Scikit-learn, and pre-trained **BERT embeddings** to classify 25K+ e-commerce customer reviews with 89 percent accuracy, enabling better understanding of user sentiment for product teams.
- Developed an **interactive dashboard in Streamlit** that visualized sentiment distribution and keyword trends, allowing business stakeholders to identify top 5 recurring issues and prioritize product improvements.

Predictive Maintenance Simulation | MATLAB, Python, SQL, Simulation, Data Modeling

- Designed a **predictive model in MATLAB and Python** that analyzed 1M+ machine sensor records from a simulated manufacturing dataset, predicting potential failures 3 days in advance with reduced false alerts.
- Stored and queried sensor logs in **SQL**, then applied statistical analysis and visualization to uncover performance bottlenecks, improving maintenance planning and reducing downtime in simulation tests by 12 hours per cycle.
