SUMMARY

Security-focused **Software Engineer and Database Specialist** experienced in building resilient enterprise systems at scale. Proficient in SQL, Python, Java, and Version Control (GitHub), I specialize in risk documentation, automated vulnerability assessments, and AI-driven security to enhance SDLC resilience. Passionate about safeguarding digital systems at the intersection of AI, software, and security.

EDUCATION

Hofstra University – Hempstead, NY

Bachelor of Science in Computer Science; Cybersecurity

Honors: Dean's Scholarship, Provost List Spring 2024, UPE Computer Honors Society

Coursework: Network Security, Programming Languages, Software Engineering, Systems Analysis, Ethical Hacking

GPA: 3.32/4.00

Graduated May 2025

Cornell University – NY

Break Through Tech AI - Cornell Tech, Certificate in Machine Learning & AI Foundations

April '24

SKILLS

Languages: Python, SQL, Java, PowerShell, React, .NET, JavaScript, Typescript, Rust, C++/C (Angular, Jupyter Notebooks)

Security & Ops: Vulnerability Management (Nessus), SIEM (Graylog, Splunk), CIS Hardening, IR, CI/CD, Ubuntu Linux, OS

Databases & Cloud: AWS (RDS/S3), Schema Design, Query Optimization, Data Validation, NoSQL, ETL, Git, REST APIs

PROFESSIONAL EXPERIENCE

Deutsche Bank – Columbus Circle, NYC

Jul '25 – Dec '25

Windows Migration Specialist | Full time, In person, Contract/Temporary | Scripting, Visual Studio Code, IT Help

- Supported deployment of CIS-compliant Windows and Linux images, strengthening baseline system hardening.
- Helped lead the enterprise-wide migration of 500+ workstations from Windows 10 to Windows 11 as part of a contract engagement.
- Executed proof-of-concept testing to validate hardware readiness and compatibility for Windows 11 adoption.
- Designed and developed a custom Python-based Wake-on-LAN automation solution to support remote system maintenance and post-patching recovery, reducing manual intervention and system downtime by 40%.
- Resolved high-priority production issues across Citrix environments and secure network tunneling solutions, ensuring 99.99% uptime.
- Troubleshoot performance degradation, upgrade issues, and client authentication/login problems to maintain seamless end-user access.

Resilience, Inc. – Remote / FL

Jun '25 – Present

Monitoring Team Project Lead | Cybersecurity Analyst Intern | Remote | Linux/Windows, Virtual Machines, AI, Databases

- Conducted regular vulnerability assessments across all endpoints and virtualized environments, reviewing, documenting, and prioritizing critical security findings by remediating vulnerabilities through security updates to ensure continuous regulatory compliance.
- Configured and managed Graylog sidecar SIEM agents on virtual machines to enhance centralized logging and threat visibility.
- Developed security risk documentation and contributed to incident management processes to improve organizational security posture.

Hofstra Makerspace – Science and Innovation Center, Hofstra University

Sep '24 – May '25

Technician Assistant | VS Code, Python, Java, TypeScript, JavaScript, Git Version Control, Documentation

- Diagnosed technical issues and engineered secure features for the internal platform, enhancing system reliability for 650+ students.

OTC Markets – 300 Vesey, NYC

Jun '23 – Aug '23 | Jun '24 – Aug '24

Security Intern – Dynamic Cybersecurity Internship Program | Microsoft Office, Excel, Power Point, Python, Java, ServiceNow

- Executed daily security checkouts and vulnerability patching across enterprise systems to maintain a hardened security posture.
- Maintained a hardened security posture by refining cloud-based forensic analysis procedures within the internal Incident Response Plan.

LEADERSHIP EXPERIENCE

Women in Cybersecurity – Hofstra Chapter

Aug '21 – May '25

Secretary | Vice President | President

Aug '22 – May '24 | Aug '24 – Dec '24 | Jan '25 – May '25

- Facilitated security awareness and professional development initiatives to foster technical growth for underrepresented groups in tech.

PROJECTS

JobMate – Hofstra University | LLMs, Git version control, Machine Learning, JavaScript, Databases

Senior Design Project – Job Matching Website and Extension

Sep '24 – May '25

- Built backend pipelines for ML job scoring with strict input validation, integrated phishing detection using AI, and MFA implementation.

phishNet – Hofstra University | Python, Java, Cybersecurity, Databases

Software Engineering Term Project – Phishing detection web extension

Feb '24 – May '24

- Engineered SQL backends and neural network classifiers with secure authentication, tuning models to minimize false positives.

Google, Cornell Tech – Break Through Tech AI | Python, ML Libraries, Artificial Intelligence

Aug '23 – Dec '23

- Developed and optimized generative AI models and pipelines, improving the accuracy and efficiency of healthcare data evaluations.

Physics Research – Hofstra University | JAX, Python, Secure Simulations of Electron Behavior

Dec '24 – May '25

- Constructed high-performance simulations using Python/JAX to model experimental data, utilizing unit tests to ensure dataset integrity.
