

SUMMARY

Supply Chain Analyst with 3+ years of experience supporting end-to-end supply chain operations, improving inventory accuracy and reducing costs across large-scale distribution networks. Analyzing stock movements, streamlining reporting processes and enhancing forecasting accuracy. Proven ability to support cross-functional teams, optimize vendor performance and improve on-time delivery metrics. Recognized for implementing data-backed solutions that drive efficiency, reduce manual effort and support strategic decision-making in fast-paced environments.

TECHNICAL SKILLS

Supply Chain & Operations: End-to-End Supply Chain Processes, Inventory Planning, Demand Forecasting, Procurement Support, Order Fulfilment, Logistics Coordination, S&OP Involvement
Analytics & Reporting: Advanced Excel (Power Query, PivotTables, VLOOKUP/XLOOKUP, Macros), SQL (Basic to Intermediate Queries), Power BI, Tableau, Root Cause & Variance Analysis
Key Metrics Expertise: Inventory Turnover, OTIF (On-Time In-Full), Fill Rate, Cycle Time, Lead Time, Forecast Accuracy, Cost-Benefit Analysis
ERP & SCM Systems: Hands-on experience with SAP S/4HANA (MM/SD), Oracle SCM Cloud, NetSuite, Microsoft Dynamics 365, Kinaxis, Blue Yonder (JDA) (basic to intermediate use)
ETL & Cloud Tools: Exposure to Alteryx, Snowflake, Google Big Query, Amazon Redshift, Microsoft Office Suite (Excel, Word, PowerPoint, Outlook)
Process Improvement: Lean & Agile Concepts (practical use without certification), Value Stream Mapping (VSM), 5S, Process Mapping, Inventory Optimization Initiatives
Soft & Business Skills: Strong Communication, Cross-Team Collaboration, Stakeholder Reporting, Project Coordination, Documentation

PROFESSIONAL EXPERIENCE

PepsiCo, AL, US
Supply Chain Analyst

June 2024 - Current

- Built automated dashboards using Power BI and SQL to track OTIF, fill rate, and inventory turnover across 12 distribution centres; simplified reporting time by 66% and increased data accuracy by 37%.
- Solved reorder patterns in SAP S/4HANA for 500+ SKUs; collaborated with planning to cut excess stock by 11% YoY while sustaining a 98% fill rate for high-priority items.
- Created a stockout alert system in Excel using Power Query and XLOOKUP, which decreased emergency orders by 35% and prepared unplanned shipping costs by 22%.
- Combined forecast and order data from Oracle SCM to support monthly S&OP cycles; developed forecast accuracy by 13%, reducing short-term inventory gaps by 19%.
- Tracked shipment delays across 3 vendor lanes; analysis revealed timing gaps in 18% of deliveries, leading to updated SLAs and a 17% reduction in lead time for top SKUs.

Hexaware Technologies, India
Supply Chain Analyst

Jan 2021 – Aug 2022

- Reconciled item-level inventory data across Microsoft Dynamics 365 and NetSuite for four regional warehouses by performing data audits, resolving mismatched transactions, and standardizing SKU-level inputs; implemented inventory accuracy by 17% and supported quarterly audits.
- Developed daily operational dashboards in Excel and Tableau to track order cycle time, inventory aging and fulfilment accuracy; assessed manual reporting time by 50% and created visibility for warehouse managers and planning teams.
- Established demand forecast vs. actuals for 6 seasonal product lines over 12 months; identified consistent under-forecasting trends that caused out-of-stocks, and proposed forecast buffer adjustments that guided fill rate by 9% during peak months.
- Designed a PO vs. GRN mismatch detection system using Excel with custom formulas and validation rules, enabling real-time discrepancy tracking and reducing manual data correction by 78%, saving approximately 10 hours per week.
- Mapped inbound material flow using VSM and on-site interviews; implemented layout and sequencing changes, reducing staging delays by 21% and improving flow efficiency.
- Standardized field mapping between ERP export files and Tableau inputs to ensure seamless integration for business reporting; this advised data preparation time by 35% and eliminated reporting delays for weekly supply chain reviews.
- Collaborated with warehouse and operations teams to conduct a root cause study on long picking times; identified misplaced high-frequency SKUs and recommended layout adjustments that decreased average picking time by 11% within the pilot area.

EDUCATION

Master of Science in Data Science
University of Alabama at Birmingham (UAB) - Birmingham, AL

Aug 2022 – Apr 2024

Bachelor of computer science
Mallareddy Institute of Technology - Hyderabad, India

Jul 2018 – Jun 2022
