SUMMARY

Senior Software Engineer with **20+ years of experience** building and modernizing scalable web applications across healthcare and e-commerce. Strong background in full-stack development with a front-end focus using React, TypeScript, and modern JavaScript. Proven ability to deliver reliable, compliant, user-focused systems while mentoring teams and improving development practices.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), TypeScript, Python, SQL, C#

Frameworks/Libraries: React, Next.js, Laravel, AngularJS, Vue.js, jQuery

Frontend: HTML5, CSS3, SCSS, LESS, Tailwind

Databases: PostgreSQL, MySQL

APIs: REST, SOAP, JSON, XML

Tools: Git, GitHub, GitLab, Docker, AWS, GitHub Copilot, LLMs (ChatGPT, Claude)

Architecture: MVC, OOP, System Design

PROFESSIONAL EXPERIENCE

Independent Consultant & Developer | *Remote*

Oct 2025 – Present

- **Village Wine & Spirits** (project): Architecting a serverless web solution using **React** and **Next.js**. The application features a **PostgreSQL (Neon)** database and utilizes a full **CI/CD pipeline** via **GitHub** and Vercel for automated deployments.
- **Technical Expansion:** Broadening backend expertise by adding **Python** to a deep foundation in PHP, while modernizing frontend skills with **TypeScript** and advanced asynchronous JavaScript patterns.
- **AI-Augmented Engineering:** Integrating LLM-based tools (GitHub Copilot, ChatGPT) into development workflows to accelerate code generation, automate refactoring, and explore AI-driven feature integration.

Radicle Health — Senior Software Engineer | *Remote*

Jul 2015 – Sept 2025

- Led development of a multi-tenant **EHR platform** supporting 1,000+ agencies across the U.S. and Canada
- Designed and implemented responsive, user-facing features for clinical, billing, and documentation workflows
- Built and maintained **REST APIs** and backend services in **PHP** and **SQL**
- Modernized legacy systems using **MVC architecture** and Zend Framework
- Collaborated with product and QA to ensure strict **HIPAA/PHI compliance** across all new feature releases
- Reduced production issues by 80% by implementing **automated regression testing**, monitoring, and greatly improved release processes
- Mentored junior developers through code reviews, technical guidance, and onboarding

Teamworld Corporate Programs — Software Engineer

Sept 2005 – Jul 2015

- Developed and maintained a customizable e-commerce platform powering 100+ client storefronts
- Built dynamic front-end interfaces using modern JavaScript, HTML, and CSS
- Integrated payment gateways, inventory systems, and order management tools
- Implemented user authentication, account management, and reporting features
- Optimized database queries and backend services for performance and scalability
- Worked directly with clients to translate business requirements into technical solutions
